

Reading

1. In week 1, you read only the introduction of this reading. In week 2, we saw *part* of the body of the article. This week you will read the remaining body of the reading. What will this part be about? How do you know this?

This part of the reading will talk about...

2. The Question Theme for this week is short answer questions, for which you will sometimes need to copy sentences or phrases from the reading or rephrase the information from the reading in your own words. On your exam, some questions will be worth 2 or more points based on the difficulty of the question or how many answers they are asking for. The work you do this week will focus on that style of question as well as completion exercises (sentences, summaries, tables) from past weeks.

- a. What term is used that means a doctor puts the sick person's needs first? (1 point)
- b. Which sense is not mentioned of the ones that Chinese doctors use during examinations? (1 point)
- c. What might a doctor ask questions about that may not appear connected to the illness? (1 point)
- d. After observing the patient, what do Chinese doctors use to determine a patient's illness? (1 point)

- e. How are the measurements used by Western doctors different from those used by Chinese ones? (2 points)
- f. Which other people help doctors to diagnose patients? (1 point)
- g. What is physically taken from patients in order to be evaluated? (1 point)
- h. What are two sources of medical information used to determine what an illness is? (1 point)
- i. What is one similarity mentioned between Chinese and Western doctors? (1 point)

Vocabulary

3. Using this link, <https://www.oxfordlearnersdictionaries.com/> please check any vocabulary words you don't know. Copy and paste a definition beside the word for future reference.

Academic Word List

analyze	conduct	guidelines	practitioners	rely
capable	data	interaction	interpretation	require

Other Vocabulary

array	extensively	generalists	pulse	technicians
cross-reference	extent	impersonal	seemingly	

4. Look at excerpts from the reading again which contain the vocabulary from the Weekly List. Try re-writing the excerpts by replacing those words with synonyms. In some sentences, you may be able to replace the word directly, but in others you may need to change other vocabulary as well. The first one has been done as an example.

a. Both systems...have their own techniques they use to actually **conduct** the diagnosis...

Both systems...have their own techniques they use to actually **carry out** the diagnosis...
