

Sussex, Wisconsin

Sign Fabrication Technician

We're looking for a reliable and detail-oriented Sign Fabrication Technician to join our team in producing high-quality signage. You'll be hands-on in fabricating, assembling, and finishing signs using a variety of materials - including aluminum, acrylic, paint, vinyl, and LED components.

You'll operate tools and equipment, follow shop drawings, ensure top-notch craftsmanship, and maintain a clean, safe workspace. Collaboration is key - you'll work closely with designers, project managers, and installers to deliver signs that meet design and quality standards on time.

The ideal candidate can read specifications, work autonomously, and is comfortable using hand and power tools. Strong attention to detail, safety awareness, and teamwork are essential.

Be part of a skilled and growing team producing custom signage for businesses and organizations throughout the region. We offer a positive, safety-focused work environment and opportunities to expand your fabrication skills.
