I am a frontend engineer who specializes in developing user-centric digital experiences that are visually and functionally cohesive. My focus is on crafting designs that are harmonious and intuitive to use, while also ensuring a high level of functionality.

## EXPERIENCE

### [Shopthru](#), Remote — Lead *Frontend Engineer*

JUNE 2023 - SEPT 2024

- Optimized the Shopify stores' pop-up extension, enhancing performance and user experience by implementing a new design and targeted improvements.
- Reduced the bundle size of the Shopthru pop-up extension by 39.98%, significantly improving browsing speed and user interactions.
- Developed reusable components for the new Shopthru Shopify app, streamlining integration with multiple platforms.
- Designed and implemented key features for the Shopthru curators and shopper experiences platforms.
- Built Snicketts WebApp: A platform unlocking exclusive benefits from thousands of brands and businesses.

### [Thepeer](#), Remote — *Frontend Engineer*

JAN 2023 - APRIL 2023

- Worked on the rebranding of the Thepeer website, which aimed to enhance user experience and more effectively showcase our range of products.

### [Fluidcoins](#), Remote — *Frontend Engineer*

JAN 2022 - NOV 2022

- Worked on the [Flip](#) website, [Flip Blog](#), which provided a platform for users to send, receive, and earn interest on their cryptocurrencies conveniently.
- Worked on both version 1 and version 2 of the [Fluidcoins](#) website, with the goal of enhancing user experience and effectively highlighting our product offerings.
- Worked on [Fluidcoins Dashboard](#), an online platform designed to enable African businesses to accept cryptocurrencies seamlessly.

### [Zuri Chat](#), Remote — *Frontend Developer*

AUG 2021 - DEC 2021

During the three months, As a Frontend Developer for three months, I collaborated with cross-functional teams to acquire new skills and contribute to project success. Specifically:

- Worked closely with the Design Team to generate and implement ideas for project development.
- Developed a YouTube music plugin for Zuri Chat in collaboration with the team responsible for the integration of music plugins into the platform. This plugin enables users of a specific workspace to join a music room and play, add, or delete songs.
- Contributed to the team by delivering pixel-perfect UI implementations for the plugin.

## STACK

Git | React | Next Js |
