

Approaching the Integration of Technology

** copy and paste or recreate this grid in a Google Doc.*

PART I: Individually, watch the videos available about the different frameworks for educational integration, and then as a group, complete this graphic organizer with your peers – work together! The final result should be made from the contributions of *ALL*. I would suggest you make an initial after your addition, or perhaps write in different colors! Everyone **MUST** participate.

1. *Describe* the framework – can you summarize it for us?

Framework	Description of Model	Strengths/Issues	ISTE Standards Connections	Examples of Use?
SAMR				
TPCK				
Triple E				

2. Identify *Strengths* and *Issues* of the framework from a teacher's perspective!

3. Identify and explain at least one *ISTE Standard* (Educator or Student) that the framework really connects with

4. Take a lesson example through each model – put the framework into action!

When you have completed the document – share the Google Document with me – udcbruewer@gmail.com

Thanks!
