Professional Summary

Software Developer with over a year of experience building clean, responsive web applications using C#, Razor Pages, Python, and JavaScript. Completed a 2-year degree in Software Programming and actively freelancing on client projects. Builder of PulsePanel CMS and professional portfolio sites for small business owners. Passionate about user-friendly design, efficient backends, and real-world solutions that convert.

Technical Skills

Languages: C#, Python, JavaScript, HTML, CSS, SQL

Frameworks: ASP.NET Razor Pages, Entity Framework, React (basic), Bootstrap

Tools: Git, GitHub, Visual Studio, Canva, Carrd, Trello, Figma

Database: SQL Server, NoSQL (conceptual)

Other: REST APIs, CMS design, ATS resume optimization, remote async collaboration

Projects

Karmella Stylist Website | Freelance Client | Decatur, IL | June 2025

Built a clean, mobile-friendly Razor Page website for a local hairstylist, showcasing services, booking links, and gallery.

Used custom theming, CSS variables, and responsive layout for fast user experience.

Connected to a lightweight CMS backend (PulsePanel) for non-tech client editing.

PulsePanel CMS | Demo & Client Product | Jan 2024 – Present

Developed a custom CMS using C#, Razor Pages, and Entity Framework to allow non-technical clients to manage content.

Included features like image uploads, WYSIWYG editing, SEO fields, and login-based admin panel.

Used in client projects like hairstylist and lawn care business websites.

Client Websites & Brand Kits | Freelance | Remote | 2023 – Present

Created single- and multi-page websites with Razor Pages, HTML, and CSS.

Designed brand kits including palettes, fonts, and editable style guides for small business clients.

Managed hosting, domain setup, and training for non-technical business owners.

Professional Experience

Technical Specialist – Richland Community College | Decatur, IL | Aug 2023 – May 2025

Supported 1,200+ users with troubleshooting software and hardware issues across campus.

Helped deploy updates and fix bugs in internal .NET tools used by faculty and staff.

Worked closely with technical operations on backend systems and automation.

Freelance Software Developer | Remote | Jan 2023 – Present

Delivered website builds, resume services, and branding kits to small business owners.

Used storytelling and clean UI to turn client goals into functional, elegant solutions.

Built internal tools like PulsePanel CMS to streamline project delivery and income.

Education

Associate of Applied Science – Software Development
Richland Community College, Decatur, IL | May 2025
