Crypto Price Analysis: Bitcoin (BTC), Ripple (XRP), Solana (SOL), Hedera (HBAR), Remittix (RTX) & Cardano (ADA)

As Bitcoin's price continues to make headlines—recently surpassing $95,000—key players like Ripple (XRP), Solana (SOL), Hedera (HBAR), and Cardano (ADA) are often discussed. However, a new name is emerging: Remittix (RTX). Discover what analysts are saying about these digital assets and their potential.

Standard Chartered: Bitcoin Price May Hit $120,000 Soon

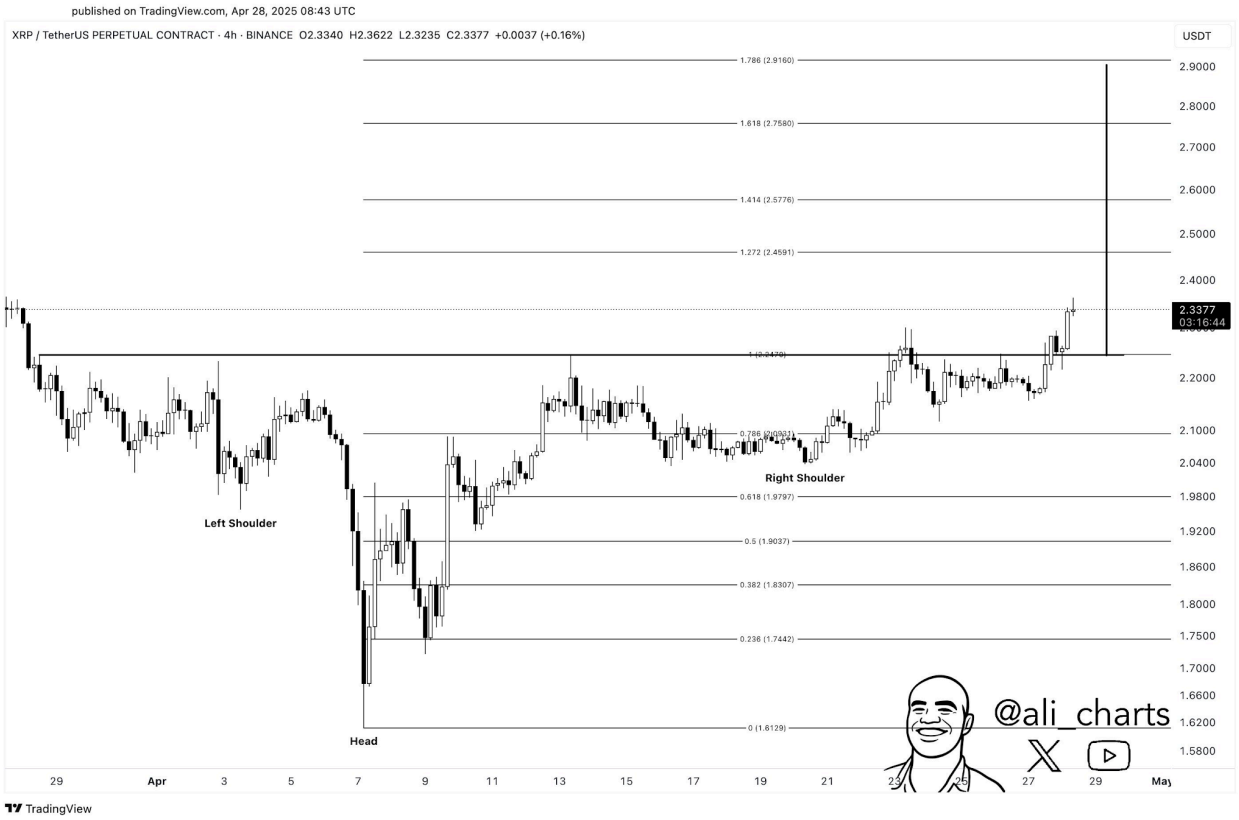

Source: CoinMarketCap

Standard Chartered predicts Bitcoin could reach $120,000 by the end of this quarter. Geoffrey Kendrick, head of digital assets at the bank, cites strong market signals, including a rise in the U.S. Treasury term premium, which influences Bitcoin's price.

Investors are moving from dollar assets to Bitcoin following Trump's tariff pause. Kendrick predicts a rise of over 26% to $120,000 from current levels, with a year-end target of $200,000.

Expert Predictions: How High Could XRP Go in This Rally

Source: [Ali Martinez on X]

[XRP] is seeing a boost with a 9% increase on the weekly charts after reaching a new monthly high of $2.35. This rise is part of a chart pattern called the Reverse Head and Shoulders, which indicates strong buying interest. From [Ali Martienz's perspective], the $2.70 – $2.90 price range seems to be the most realistic target.

Solana Eyes Breakout as Price Nears Key $153 Resistance

Source: CoinMarketCap

Solana has increased its price by 8% over the past week. It is on its way up to beat the major resistance level at $153.65. Solana is creating a cup and handle pattern that has indicated even more appreciation in price in the past.

Solana's MACD indicator is also indicating bullishness, with the possibility of a target of approximately $180 if it manages to break this resistance.

Render Breaks Key Resistance at $4.28, Eyes Further Gains

Source: CoinMarketCap

The price of Render (RNDR) has hit an important barrier at $4.28 — a level it has struggled to get past before. Even though it's been rejected several times, the recent price movements show some hope for a comeback.

If RNDR can break above $4.28, the next targets for the price would be around $5.40 and then $6.70. Fortunately, Render has broken the resistance level, and is trading at 21% up per month.

Cardano Soars 13% Following Golden Cross Breakout

Source: CoinMarketCap

Over the past week, Cardano has seen a 13% price increase. It has also formed a “golden cross,” indicating that the price may rise further. The daily trading volume of ADA has increased by 55 percent to $900 million, indicating growing confidence in the market. The altcoin’s next major resistance level is at $0.7289. If it breaks through this level, it could move toward $0.76.

Send Crypto Anywhere Instantly: Remittix Breaks New Ground

Remittix, unlike the price of Bitcoin or any other altcoin, whose value can be swayed by everything from a news event to a global economic shift, is touted by experts as offering something very promising and useful to investors in the industry.

Remittix is one of the significant advancements, moving away from a large number of banks across the globe, and allowing their clients to quickly and easily transfer crypto assets to anyone and receive them in fiat currencies.

This significant use case addresses a major pain point in the crypto world, making Remittix a much-needed service for workers paid in crypto, international freelancers, businesses, and everyday users who want simpler and cheaper ways to move money globally.

Join the Remittix Presale Today

Priced currently at $0.0757, Remittix has successfully raised over $14.64 million and sold over half a billion tokens during its presale phase. These numbers clearly show growing confidence and interest from early investors.

Due to its real-world utility, experts believe Remittix could experience a 50-fold increase once it fully launches. It's not just another token riding the hype—Remittix has a purpose.

Discover the future of PayFi with Remittix by checking out their presale here:
