

# SpeeDRAFT RULES

- We use a snake draft, so if you get first pick from the first round of drafts, you get last pick for the second. If you were last for the first round of drafts, you're first for the second.
- The order of picks will be determined by a randomizer.
- You will type the name of the person you choose when you choose them, and you will put your name next to it. From then on no one can pick that same name.
- The name you choose will be added somewhere on your Fantasy League template you have made. You can put it at the bottom or somewhere and wait to choose which slot to put it in, or you can put it straight in your roster.
- Trading can happen anytime after the draft. Not during.
- And remember, ONLY SPEEDCUBERS FROM NORTH AMERICA.
