

1. Sign up for free Vultr account
2. Add your billing
3. Get your Vultr API key
4. Sign up for XCloud and add your Vultr API key within XCloud
5. Within XCloud, choose your Vultr package that starts from as little as \$10 per month. This will give you super fast sites (Xcloud can also help you with migrating from different hosting if you contact them on live chat).
6. Within XCloud, you can clone a site in a matter of seconds. Tony has done a video on this under the virtual assistant section on the tutorials page.
