Dear Parents and Guardians,

We are excited to share some news regarding an innovative step we are taking to enhance the educational experience of your children in science. In our constant pursuit of providing the best possible education, we are embarking on a pilot program to introduce new instructional materials in selected classrooms.

The world of education is ever evolving, and it is our responsibility to ensure that our students are equipped with the most current and effective learning resources. With this in mind, we have carefully selected a set of new instructional materials that we believe hold the potential to significantly enrich the learning experience of our students.

Your child's class has been chosen to participate in this pilot program, which means they will have the opportunity to explore and engage with these new resources firsthand. The adoption of new materials is a vital step in our commitment to keeping our curriculum up-to-date and aligned with the latest educational standards. We are confident that this initiative will contribute to a more engaging and dynamic classroom environment.

We greatly value the input of our parents and guardians, as your perspective is invaluable in shaping the direction of our educational initiatives. As part of this pilot program, we kindly request your participation in providing feedback on the new instructional materials. Your insights and observations will play a crucial role in helping us assess the potential of these resources for wider implementation within Wicomico County Public Schools.

In the coming weeks, you will receive more detailed information about the specific materials being introduced, as well as instructions on how to provide feedback. We encourage you to actively engage with your child's experience during this pilot period and share your thoughts with us. Your feedback will aid us in making informed decisions about the adoption of these materials for the benefit of all students in our district.

Thank you for your continued support and partnership in our mission to provide exceptional education. We look forward to working together to create an even brighter future for our students.

Should you have any questions or concerns, please do not hesitate to contact me at hbhaskar@wcboe.org.

Sincerely,

Hemalatha Bhaskaran
