

X4_V1.5.0 Update Announcement

Dear Users:

We are pleased to announce that the X4_V1.5.0_20240704 version update has been released. This update brings numerous enhancements and crucial bug fixes aimed at improving your user experience:

Bug Fixes:

- Fixed the issue where button response was slow, requiring multiple clicks.
- Fixed the issue where print time was reset after power interruption.
- Fixed the issue where an environmental abnormality prompt appeared when restarting or emergency stopping.
- Fixed the issue where file names and preview images were displayed incorrectly during online printing.
- Fixed the issue where preview images refreshed twice during power resumption printing.
- Fixed the issue where the completion button displayed abnormally after automatic bed leveling.
- Fixed the issue where the screen did not switch during printer anomalies while pausing and resuming printing.

Feature Enhancements:

- Enhanced resonance compensation parameters.
- Modified certain English and German terms.
- Optimized material loading and unloading pages and action commands.
- Added hot-swappable camera functionality.
- Optimized parameters for automatic bed leveling.
- Enhanced Z-offset functionality parameters.
- Added a popup for print completion time.
- Added a waiting prompt popup when pausing during print heating.
- Introduced repeatable upgrade functionality post-update.
- Optimized startup guidance for material loading actions.
- Added Z-offset functionality to startup guidance.

Thank you for your continued support and trust. For any questions or assistance, please feel free to contact our technical support team.

Best regards,

Artillery Development
