3. Declaration of Generative AI in Scientific Writing

Guidelines for Declaring the Use of Generative AI in Scientific Writing:

These guidelines focus solely on the writing process and not on using AI tools for data analysis in research. Authors should prioritize enhancing readability

and language when utilizing generative artificial intelligence (AI) or AI-assisted technologies during writing. However, it's crucial to exercise human oversight and control, reviewing and editing the output due to AI's potential to generate authoritative yet inaccurate, incomplete, or biased content.

Authorship and Citation: Generative AI and AI-assisted technologies should not be credited as authors or co-authors or cited as authors. Authorship responsibilities and tasks are inherently human and are detailed in our AI policy for authors.

Disclosure Instructions: Authors using generative AI must disclose this in their manuscript. A statement in a dedicated section titled 'Declaration of Generative AI and AI-assisted technologies in the writing process' should outline the tool or service used for the purpose and affirm the author's responsibility for content accuracy. Basic tools for grammar, spelling, and references are exempt from this disclosure.

Sample Statement: During the preparation of this work, the author(s) used [NAME TOOL / SERVICE] to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the publication's content.

This declaration does not apply to basic tools for checking grammar, spelling, references, etc. There is no need to add a statement if there is nothing to disclose.

4. Acknowledgement: A one- to two-line statement of appreciation for other services from organizations or individuals

5. Ethical Approval: A statement declaring the ethical approval of the research and a declaration of the ethics approval code.
