# Trading Platforms and Tools - What are the Benefits

<https://fiestadelucro.com/smart-business-corp/>

Webull lacks some of the tools of TD Ameritrade and TradeStation. But Webull will satisfy most traders otherwise.

## **Platform Charting**

Webull offers standard charting features. Different chart types, drawing tools, and technical indicators. They have grid layouts to compare

<https://fiestadelucro.com/smart-business-corp/>

charts too. The desktop app includes lists such as "Hot ETFs" and "Essential Watch Lists," in addition to screener functionality. Charting was easy to use on both web and desktop.

## **Replay of the Market**

Webull offers a unique feature unlike any other service when it comes to viewing stock charts. Users can replay the day's price action through video, a perspective not found at any other broker.

## **Quote data**

Traders pay a fee to view the level-2 quotes. You will have to pay this after your free data subscription expires. Webull has recently dropped its Level 2 subscription cost to \$1.99 per month. So this makes it more bearable. But the basic data is free. If you want options data (OPRA) you must trade at least one options contract per month with Webull.
