

Export Import Tasks:

Pre-requisites

*** Be sure to set ORACLE SID

. oraenv --> BATCH52

*** Be sure to create a unique directory for your work.

mkdir -p /u18/BATCH52/Moid

*** Be sure to change directory before executing exp command

cd /u18/BATCH52/Moid

1) Write command to export full database.

exp system/abc123 file=BATCH52_full_exp.dmp log=BATCH52_full_exp.log full=y statistics=none

2) Write command to export full database DDL.

exp system/abc123 file=BATCH52_full_exp_DDL.dmp log=BATCH52_full_exp_DDL.log full=y rows=n

statistics=none

3) Write command to export scott schema without any grants.

exp system/abc123 file=scott_exp.dmp log=scott_exp.log owner=scott statistics=none grants=n

4) Write command to export scott and Nilesh schemas

exp \
system/abc123 \
file=scott_nilesh_exp.dmp \
log=scott_nilesh_exp.log \
owner=scott,nilesh \
statistics=none

5) Export DDL of the entire database. Do not export indexes, grants, constraints.

exp \
system/abc123 \
file=BATCH52_DDL_exp_wo_igc.dmp \
log=BATCH52_DDL_exp_wo_igc.log \
indexes=n \
grants=n \
constraints=n \
rows=n \
statistics=none

6) Export entire database into four .dmp files. Each file should not exceed 25 MB.

```
exp \  
system/abc123 \  
file=BATCH52_full_exp_1.dmp,BATCH52_full_exp_2.dmp,BATCH52_full_exp_3.dmp,BATCH52_full_exp_4.dmp \  
log=BATCH52_full_exp.log \  
filesize=25M \  
full=y \  
statistics=none
```

7) Export EMP table from scott schema.

```
exp \  
system/abc123 \  
file=emp_exp.dmp \  
log=emp_exp.log \  
tableS=scott.emp \  
statistics=none
```

8) Export EMP and DEPT from scott schema.

```
exp \  
system/abc123 \  
file=emp_dept_exp.dmp \  
log=emp_dept_exp.log \  
tableS=scott.emp,scott.dept \  
statistics=none
```

9) export emp table for all employees who are working in dept30

```
exp \  
system/abc123 \  
file=Dept30Emp_exp.dmp \  
log=Dept30Emp_exp.log \  
tables=scott.emp \  
Query='\where deptno=30'
```

10) export emp table for all employees who are working in dept30 and making more than \$1499 in salary.

```
exp \  
system/abc123 \  
file=Dept30Emp_exp.dmp \  
log=Dept30Emp_exp.log \  
tables=scott.emp \  
Query='\where deptno=30 and sal>1499'
```
