

How to share the Introduction of the Civilian Climate Corps & the GND Resolution

Today, Rep. Ocasio-Cortez and Sen. Markey, and more are introducing the *Civilian Climate Corps for Jobs and Justice Act* alongside a re-introduction of the *Resolution for a Green New Deal*.

Since the resolution was introduced just two years ago, the movement for a just and livable future has grown exponentially. In 2020, we saw candidates across the country not only run on a Green New Deal, but win on bold climate action. The resolution has completely reshaped the conversation around climate change and made bold, real climate action a top legislative priority for Democrats across the country. Today, the Green New Deal is the DNA of the climate movement, continuing to push us to take bold and urgent action to save our planet, create millions of new jobs, and deliver environmental justice.

Help us share a hopeful vision for the future and establish these proposals as the common sense policy we need to meet the gravity of the moment.

In 2019, we introduced the GND as a guiding vision for a more just society. It's 2021 and we're still facing skyrocketing inequality, unemployment, and the ticking time bomb of the climate crisis.

We have the chance to make the GND a reality. It's time we usher in the Decade of the #GreenNewDeal.

Twitter

A Civilian Climate Corps would put 1.5 million Americans in good-paying jobs to work on:

- ✓ Rebuilding communities
- ✓ Transforming our infrastructure
- ✓ Halting the climate crisis

There is so much work to be done. Let's kickoff the Decade of the #GreenNewDeal with a CCC.

Facebook/Instagram

Two years ago, @AOC and @EdMarkey introduced a bold vision for the future with the first Green New Deal. Today, we are excited for the next phase of this fight. This new, concrete legislation for a CCC would begin making real the #GND and transform our country.

The Civilian Climate Corps represents the most significant public investment in our climate and in the people of this country since the New Deal. If funded adequately, we can create 1.5 million high-paying jobs, restore our climate, and redistribute resources to frontline Black and brown communities.

We need to be bold, we can't afford to do otherwise. Together, let's show leadership that the people are demanding Good Jobs for All and a #GreenNewDeal! We are demanding a fully funded Civilian Climate Corps that meets the scale of the crises we're facing!
