

My [Linktree](#) for my current active socials. **If you want to translate anything go for it!** But I ask that you **give me credit for the scans** and **send me back a link cause I want to read them and share them with other fans too!** Also, some older works may have an old scanner note while my newer ones do not as I **might** on update them all with a text file version of that sometime in the future or at the least drop the file in the Google Drive version, we'll see..

All complete Manga/Comics are available here and [archive.org](#) too. Anything here marked with an * needs to be completed.

Upcoming Projects (In no order, subject to change)

- Kirby of the Stars: The Story of Dedede Who Lives in Pupupu (Hoshi no Kirby: Dedede de Pupupu na Monogatari) - Kirby Manga Mania is the official English translation but is 'Best Of' collection with new stories, so it's unlikely that we'll get all the stories from the original Japanese translated, much less see them.
- Rips of some old PC CD games that are currently unavailable to play anywhere

Doujinshis are fan-made comics from Japan created by fans for fans. Some are **R-18** and are marked accordingly. All are in an Asian language (Mostly Japanese but one is Chinese/Mandarin). **Doujins** are fanfiction versions of this.

Warning: *Future Channel (Mirai Chan'neru)* has consensual but underage kissing in the first story and a teenager and vague-aged individual consensually kissing as well in the second story.
