

Sargis Ghukasyan

DOB: 05.07.1987

80 Andranik street, apart.39, Yerevan, Armenia

+37444204220

ghukasyansci@gmail.com

I am a highly competent analyst with a proven track record in business analytics, data analytics, as well as designing networking, and managing databases. I believe that teaching is one of the best way to learn, and I have always engaged in the informal teaching process regardless of employment. After many years of diverse freelance work, I believe it is time to settle with the very one job and work under the logo of the company close to my ideology and enthusiasm (math., tech., education). I have strong technical skills and mind of creative mathematician that contributes to my analyst personality. The preference to work at the "Mkhitar Sebastatsi" educational complex is due to the fact that the teaching methodology and author's education are close to my views.

PERSONAL INFORMATION

I was born and raised in Yerevan, in the family of a scientist and a physician. My father is a doctor of chemical sciences, my mother is a neonatologist, my brother is a military doctor and a medical service major. There was always a warm atmosphere in the family.
