

Each group member should draw a sketch of a potential rube goldberg machine that satisfies the constraints of the project. Please label each simple machine present in your drawing, label the stages, and make a materials list of who is bringing what from your group.

5 Points	4 Points	3 Points	2 Points	1 Point
All simple machines identified. All transfers of energy identified. Materials list is present and corresponds to the drawing. Drawing is clear enough that someone could build the machine from the picture.	One component missing	2-3 components missing	4-5 components missing	6+ components missing
