

Current To-Do Items

Merge the [One CHI to Rule Wiki](#) into the Chima Wiki

- Write down which of the 265 pages to keep
 - This could be done by comparing a list of Special:Allpages on the OCtR Wiki to the Special:Allpages list on the main Chima Wiki.
- Special:Import these pages to the Chima Wiki
- Add Template:Fanmade to all of these articles
- Copyedit the pages, fix their categories, and clean them up in any other ways needed
- Have the One CHI to Rule Wiki closed

Once this is all done, this will end the Chima fanon -> Chima canon wiki merger. After that, if anyone wants, the [Lego Chima Wiki](#) could be merged into the main Chima wiki (if it agrees) along with any other relevant Chima wikis that agree to be merged in or simply don't respond soon enough (see https://community.fandom.com/wiki/Help%3AMerging_communities).
