## Layers of the Earth model/visual

6.E.2.1

Level 2

## **Directions:**

- 1. Using your resources, create an accurate model/visual of the Earth's structure
- 2. In any accurate model, thickness and location of the layers should be accurate
- 3. Your model/visual must include everything listed on the handout
- 4. Use table to check off elements as they are included in your visual/model

## **Handout in 6.E.2.1 resources**
