

"Bright Side"

When the smoke cleared
I saw the bright side of the moon
And when the day ended
I was laying next to you

I knew then
We were all, all in
I couldn't plan it better than this again

When the fire went out
I was running my mouth
About the breeze and the trees
On our way out of town

Why don't you walk on the bright side for once
I can't keep talking with my mouth wired shut
We can keep rolling this rock up the hill til we get to the top
But wandering eyes will get us caught up in the drop

When the sun came out
It was years from now
Saw the way it could tame
All the ins and the outs

"Forget The Memories"

All I remember from those days in bed
Was a couple of card games and a broken leg
We spent so many nights on our graveyard street
Dreaming up sandbars and sun burnt cheeks

I wanted to run as far as I could
To forget the memories that did me no good
But I'm older now and that chip is worn down
So I'll drop you a line sometime and we'll work it out

All I remember from those morning drives
Was the haze of the steel mill in the traffic lights
We spent so many hours taking our sweet time
Spending all of daddy's cash til the well ran dry

I wanted to fly as high as I could
To forget the memories that did me no good
I had to move on to look back on it all
I'll tell you now I forget all the terrible

I remember in that Mustang red
Driving down Highway 1 in a tailspin
There was nothing left but the two of us kids
Looking up to you for some relevance

I had to forget to forgive you my dear
I had to grow up to understand my fears
But it's over now and we made it out
Past the trapdoors of our hometown

“Juniper”

Juniper, I hear you're kicking up a storm
Though we haven't met I know what I'm in for
I can see all the crashing waves we'll go toward
But I'm ready to pull you into the shore

My little June Bug
I hear you walking the floor
I get ahead of myself
I keep begging for more
Before you came I was a ship in the night
Now I'm sailing into sunny skies
I wanna stay in your light

Juniper, I hear you calling me out
In this house I can hear every scream and shout
I imagine where we'll be a few years from now
On the coast with the most wonderful crowd

I was a rolling stone until I found my home
It was in my wildest dreams
That I could spend my days any other way
Than without you here with me

Call me when you're on your way
And I'll be waiting every day for ya
Wild eyed child

“Worlds Collide”

I didn't want to drop you off that night
I thought we owed it to ourselves to enjoy the ride
But now I'm thinking there was a reason
I didn't see at the time
Until I felt you in my arms in the moonlight

I didn't know if I could be your type
A little rough around the edges and you're so refined
But now I see her, you are a dreamer
We are both one of a kind
And we'll go singing in the street in the summertime

When our worlds collide
I see the future it's bright
We'll build our own pie in the sky

I didn't ever wanna say goodbye
So I quit the band and moved in with my alibi
And now I see it, you are the reason
That I am even alive
And we'll go walking through this world with a big smile

“Show You Love”

Born on the 1st of July

You got your momma's eyes
You got your daddy's crooked smile
I think we'll keep you a while

Growing up in modern times
We had to keep you inside
But you were burning bright
We couldn't keep out the sunshine

I wanna see you grow up in a world so simple
I'll be at the show until you burn into a golden ember
I wanna let you run into the glow of the summer sun
I wanna show you love that is never done

Calm in the dead of night
By day you're a wildfire
I've seen the many signs
And I'm along for the ride

I'll wipe your tears dry
And keep your foes on the outside
If you'll be my butterfly
And keep your head in the blue sky

"Best I Can"

When the day is ending
And the night closes in
I'll remember each moment
Like the back of my hand

Little brown eyes shining
With your hair in a twist
I will leave this letter
Seal it up with a kiss

I'll be the man you wanted and the one you deserve
If I can just get out from all the pressure
I'll wear that armor like a badge of honor
Til I can be the best I can
A perfect gentleman

When the sirens racing
And the lights turning red
You will find me waving
So jump on in

I will fight your battles
And I'll die for you kid
If you come unraveled
I'll be your medicine

Are you wondering where I am when the house is quiet
I'm somewhere smiling, trying to get you fed
I'll be under the lights again, singing songs in silence
I hope you'll try and remember what I said

“Galaxy”

Be still my heart
Don't turn the other way
Don't let me fall apart
Don't let me break
In a million different ways
Over a million days

I saw the tarot cards
Now I know my fate
I'm headed for the stars
Another galaxy
I'm a million different shades
Wide as the everglades
I have a million different dreams
But not the energy

At the end of the day
I'll find a way
To keep you out of the dark
To see the best in me
In the million different sides
Of my wandering mind
You're a million different stars
In my golden sky
All my days and my nights

If I fly away to the moon
Will you find a way there too
We could spend the afternoon
Swimming in the deepest blue
I'll see you soon

“Calling Us Home”

What in the world did we do with ourselves
Where'd all the time go when the empire fell
It was all blue skies turning to grey
Can we cope at the end of the day

What in the hell do we tell all our friends
They were like family
Left them for dead
Where'd all the kind go
All went away
Now we're alone at the end of the day

I know a place where nothing ever changes
Long are the days and no one's a stranger
I know a song we can sing til we're gone
Cause it feels like heaven's calling us home

Nobody noticed a frame out of focus
When we were all golden
When we were still holding on
Nobody mentioned that we were all fenced in

While the fire was burning everything around

What do we do at the end of the day
When all that we worked for goes flying away
Where will we turn to and what will we say
All I know is that I love you today
