

## **KAMALA HARRIS RAN A PERFECT RACE. THAT'S WHAT WORKED AGAINST HER**

Due to Donald's ability to buy his way through life, he didn't have to develop the character and intellect that most of us had to develop just to survive. Instead of having to study to take the SAT test to get into college, Trump simply paid someone to take the test for him. Thereafter, he bought his friends, and bought his stature among his friends. As a result, he "grew" into an extremely flawed and uninformed individual.

That made him the perfect advocate for the dregs of society, because he's one of them. They too benefited from something other than character and intellectual development to achieve their status in society - their White skin. Just as Donald was given a leg up due to his wealth, the dregs were given a leg up due to their White skin.

So while listening to the talking heads discussing how and why Kamala Harris came up short in the election, it was immediately clear to me that they were overanalyzing. The answer to why Kamala Harris lost the election to Donald Trump is plain and simple - she's a Black female, or what Donald and his dregs consider the "enemy from within."

Kamala represents what made Barack Obama such a hated figure to Donald Trump and the dregs. Like Barack, Kamala's excellence and intellectual attainment worked against her, making her a threat to the dregs of society, so the more she shined, the more Trump's base hated her, because she's a symbol of what threatens their way of life - Black excellence. It's plain, simple, and crystal clear.

This is not just speculation on my part. I'm a Black man who has had to step over the dregs' bitter sense of entitlement my entire life. It's what's made me, me.

A guy named Steve called me while on vacation after being fired from his job, so I came in and got his job back on a technicality. A few months later, the very same people who fired him used him to spy on me. The depths of some of these people's bigotry is unbelievable.
