

 **AI Asset Factory**
10-Minute Quick-Start Guide

(From zero → sales-ready asset)

 **MINUTE 0–1 — WHAT YOU’RE ABOUT TO DO**

In the next 10 minutes, you will:

Run one prompt

Answer one question

Receive one finished, sellable mini eBook / report

No setup.

No prep.

No thinking.

 **MINUTE 1–2 — COPY THE ENGINE**

Open ChatGPT

Copy the AI Asset Factory Master Prompt

Paste it into the chat box

👉 Do not edit anything.

👉 Do not add instructions.

Press Enter.

 MINUTE 2–3 — ANSWER THE ONLY QUESTION

You'll see one question:

“Who do you want this asset for?”

Pick one example OR write your own:

WarriorPlus PLR sellers struggling with low conversions

Beginner YouTubers stuck below 1,000 subscribers

Local service business owners relying only on referrals

Coaches selling offers but not getting consistent buyers

Freelancers struggling to position their services clearly

OR your own specific niche

 Be specific.

 One sentence is enough.

Hit Enter.

 MINUTE 3–6 — WATCH THE ASSET BUILD ITSELF

Do nothing.

The system will automatically:

Lock one painful problem

Choose one uncommon angle

Target one buyer with intent

Output a complete mini eBook / short report

What you'll see on screen:

A brutal title

A sharp opening

3–5 tactical sections

A usable checklist

A clear expansion page

That's your finished asset.

 MINUTE 6–7 — SAVE THE ASSET

Copy the full output

Paste it into:

Google Docs

Word

Or your favorite editor

(Optional):

Add a cover

Export as PDF

You now own a sellable digital product.

 MINUTE 7–8 — CREATE A SECOND ASSET (PROOF)

Go back to ChatGPT.

Type exactly this:

Run it again.

Press Enter.

Result:

Same niche

Different problem

Different angle

Completely new asset

This is how you build collections, bundles, and libraries.

 MINUTE 8–9 — HOW PEOPLE USE THESE ASSETS

Each asset can be:

Sold standalone

Bundled together

Used as a lead magnet

Repositioned for a related audience

You don't decide the idea.

The system does.

 MINUTE 9–10 — YOUR NEW DEFAULT MOVE

Any time you want a new asset:

Paste the prompt

Answer one question

Collect the output

That's it.

No brainstorming.

No friction.

No burnout.

 YOU'RE LIVE

You are now fully operational.

Most people use AI to generate words.

You use AI to manufacture products.

That difference compounds fast.
