

Associate of Science Oregon Transfer Degree (ASOT) – Planning Map- Business

-The Statewide Associate of Science Oregon Transfer degree in Business is designed for students transferring to baccalaureate degree programs as business majors. Below is a 4 year plan intended to help GPHS student's determine when they would need to consider dual credit courses offered at GPHS in order to work toward earning their ASOT by the time they graduate high school. Those completing the ASOT-Business degree are assured junior-level standing for registration purposes and will have met the lower-division general education requirements of any Oregon public university. Students should be aware that if they transfer before completing this degree, courses will be evaluated individually toward the general education requirements. Students are encouraged to work closely with their academic advisers from both GPHS and RCC.

Associate of Science Oregon Transfer Degree (ASOT) – students need a minimum of 90 college credits to earn the ASOT
