WHITE LIGHT CONNECTION PROTOCOL

Point your hands towards the floor and imagine a bright white light coming up from the crystal grid of the earth, lift this light up from the earth through the room, through your body and your clients, lift it up towards the ceiling and see it spreading up and out towards the stars. You are creating a white light of clearing for the room and the both of you. (5 mins)

- When we run a healing the first and most important thing to do is to create a clear and protected space for you to run your healing. You are making a connection to the spiritual realm and in order to keep and clear any negative energy away you need to create a clearing using high frequency white light which works instantly to create a shield of protection.
- The white light procedure draws up the **crystalline light from the crystal grid of the earth**. This crystal grid, also called the **Global Grid Matrix or Ley Lines**, is *infused with stellar light from the star and planetary systems*, it is also *filled with the vibrations and frequency of the earth crystals and the crystalline core of the earth*, it is alive!
- You will connect with this light by pointing your hands down towards the earth and pulling the light up from the earth and you will see, sense and feel it coming up through the room, through you, through your client, clearing, cleansing and purifying everything it passes through and you will lift it up and out through the top of the room and see it going up out to the universe.
- This procedure will be used again at the end of the healing to clear anything that was released during the healing.

4 PILLARS OF LIGHT, BUILD A TEMPLE

Once you have energetically cleared your space with the White Light Procedure you will build a temple of light around you and the client. With this procedure you are energetically creating a doorway into another realm with the pillars of light, you may well feel like you are standing in another place with no sense of time. You are recreating your healing space but at a different frequency, at a higher vibration. With this procedure it does not matter what shape your room is, you will imagine there are 4 corners, they don't have to be 4 corners of a perfect square, and at each of the corners you will point to the floor with your power finger (this can be your right or left index or middle finger) and you will

see, sense and feel yourself pulling up a pillar of light from the floor into the ceiling. What you may start to feel once you have done this is the presence of guides starting to come through at this point, in my personal experiences I often see them step through the pillars and stand by them waiting to be invited in. It doesn't matter if you don't see this, you may instead feel something but just feel reassured that they are around and that it is easier for them to connect with you and your client at this point.
