

The Leaflet's Top 3

1. I probably wouldn't right now because hybrid is more smart. Going all in on full EV can be costly and impractical if you're not driving upwards of 60-70 miles a day.
2. I would buy one second hand. The ethical implications of cobalt mining is just not worth contributing to the EV industry.
3. Yes, I would. It seems inevitable too. I live in CA, and the state has given EV owners incentives for years, and CA hopes to phase out new gas-powered car sales by 2035.

All Responses

1. I sure would. Love the idea of being free from burning fossil fuels.
2. I probably wouldn't right now because hybrid is more smart. Going all in on full EV can be costly and impractical if you're not driving upwards of 60-70 miles a day.
3. Yes. However, at the moment, I think my next car will be a hybrid. And honestly, since the incentives are gone for now, I'm not sure when that will be.
4. I like hybrids better due to weather issues for EVs.
5. I would buy one because charging the car is no different than getting gas and gas is also expensive.
6. Yeah if I find one I like. I've heard good things about them
7. Yes, we have one! We bought it to reduce our carbon footprint - and because we don't do a lot of driving for our daily commutes.
8. I would buy one second hand. The ethical implications of cobalt mining is just not worth contributing to the EV industry.
9. Yes, if charging was convenient when traveling.
10. Yes, I would. It seems inevitable too. I live in CA, and the state has given EV owners incentives for years, and CA hopes to phase out new gas-powered car sales by 2035.
11. Yes, try to shrink my carbon footprint
12. Hell yeah
13. Yes, they are cool and futuristic
