

Glogster Directions and Requirements

Your assignment for Glogster is to create an interactive poster which expresses something you are passionate about. For instance you could make a glog about a band you really like, or cause you believe in, a game you play, a movie star you like... anything. Once you have picked a theme all of the objects in your glog should reflect that topic. For instance if I was making a glog about a band I really like I would include the title of the band, some pictures of the band, a music video from the band, possible tour dates titles of some of the songs I like and anything else related to the band that I could think of.

Below are the minimum requirements. Please feel free to add as much as you want to your glog, just make sure you have at least the following:

Name your Glog

3 Graphics

3 Images From the Internet Uploaded to Glogster

1 Video

2 Links

A Wall or Background

Also make sure you edit your profile so that your first name, last name, gender and birthday are all correct. It will be very hard for me to grade if you don't change your name.

Once you have finished your glog save, publish it and make sure it is public. ~~Once you have done thing you will get a link. Go to your wordpress site and post the link to your glog as a post. As always I will be grading from your wordpress blog so it is important to make sure you add the link to your glog on your wordpress site.~~
