- Roadshow Presentation Deck:
<https://confluence.hl7.org/display/CDA/CMG+Dashboard?preview=/31687593/171450857/DRAFT+CMG%20On%20the%20Road%20Talking%20Points+20230615.pptx>
- Sample request email for time:
 - So much exciting stuff is happening with CDA and C-CDA that the CMG team is bringing a short Product Family update out to each of the HL7 Workgroups who actively contribute to the body of work in the CDA Product Lines.

We have a few slides to keep your team informed, and we're open to hearing from your team to provide feedback and insights on your continued and future uses for CDA in your overall work product strategy. I think we would need about 15-20 minutes (longer if you think we'll have more to talk about). Let's say 20-30 minutes max, depending on what you can spare out of an upcoming agenda.

Can you offer us a couple of time slots in the next few weeks where a couple of us from CMG could visit to present our CMG CDA Roadshow? We'll confirm which would fit best for us and get something booked quickly.

- 7 topics in 15 minutes (said by Lisa, recording was more like 25-30 min)

Presentation Summary Notes

- First Screens
 - Thank you for making time for us
 - We've been working on this "road show" to get the word out on what CDA MG is up to, and any possible interactions you may have
 - Ask questions as we go is fine.
- CDA Publication Checklist
 - Resource to help IG authors produce high quality specifications
 - Checklist of what you need to do and know to submit a CDA publication.
 - Location: CMG Dashboard, 3rd column middle
 - We look at it a couple times a year
 - Info:
 - You can copy the page into your own project area in confluence
 - How to organize a github repo
 - Source of making sure people are doing the checklist items
 - Don't know that you are writing IGs anymore, but if you decide to again, this is a resource

- Even if you aren't creating resources, if you are involved in reviewing ones by other groups, checking this list as you go will help out so there are not slow down on moving through the process. You should be able to say "let us see your checklist".
- New structure definition publishing
 - New pub tool to CDA (from FHIR)
 - CDA Structures can be represented now as FHIR logical model definitions
 - New capabilities to develop new guides
 - Jan 2024 ballot, a new version of C-CDA published using the new tool, using Structured Definition that is using what FHIR is
 - Green band is for CDA product family
 - Publishing "Jan 2024 Version C-CDA SD edition" in May 2024 (slide has 2.1 in recording, if not fixed, it will be Jan 24)
- New cycle that will be repeatable
 - New versions will publish in July
 - Looking at US Core and C-CDA changes affecting CDA
- Asset List
 - Keeping track of assets we've created in the past
 - Google sheet to track: (link here, from the deck)
 - Show IGs for WG I'm on, and suggest if they don't see CDA assets here, and think about roadmap of updating IGs and let us know.
 - Eventually adding a link to the "IG Registry" on the FHIR page (hl7.org/cda)
- Continued use of CDA R2.0
 - Withdrawing the reaffirmation of R2.1 to ISO as a base standard.
 - 2.0 stays the base standard, reaffirming in 2025 with ISO.
 - Don't want to put any "squeeze" on implementers to move from 2.0 to 2.1 when FHIR is the ultimate "future"
 - Work done for 2.1 may be implemented as "extensions" to 2.0
- Future of CDA
 - Expect the standard will be going for "decades" likely.
 - Still large reliance on CDA, even in only "maintenance mode"
 - CDA to FHIR mapping
 - Value Set alignment (CDA/FHIR)
 - USCDI alignment
- CCDA IATs
 - Two a year (spring, late summer/early fall)
 - Aug 23-24, 2023 (add link)
 - Show "save the date" message approved on 7/12
- CMG Membership
 - Open seats available... term limits are in place, so need "new blood"
 - Weekly Meetings Wed 1-2:30p
 - Roles needed:
 - Implementers
 - EHR Representative
