

# Custom Character Rules

1. All character models used in a run should be **linked in the run's description**. The download must be public to be used in a run. Additionally, the description should **say which character it replaces**. For example:
2. **Crewboom must be used**, and the logo visible on the title screen.
3. NPCs (opposing crews and story characters) **cannot be replaced**. Only Red (*excluding* his dream counterparts), Bel, Tryce, and Faux may be replaced. If you own the extra character DLCs, you can also replace both models.
4. Mods reserve the right to deny models seen as **problematic in nature, NSFW, etc.** per speedrun.com rules.
5. Custom characters should be **humanoid in nature** (up to verifier discretion) and **three-dimensional**. Additionally, they should fit in a specific height requirement, pictured below:

# Custom Character Rules

If you have concerns about specific models, feel free to reach out to a leaderboard mod with the link to the model.
