

- metadata blocks may be different
- groups (defined at dataverse level) may not be available:  
<https://github.com/IQSS/dataverse/issues/2412>
- roles (including their permissions), will they carry over? some of them inherit from the parent dataverse so those will be impacted
- Solr re-indexing must happen
  - So that "Search \*THIS\* dataverse" continues to be accurate
