

Cryptodiffer.com

The main purpose of the Site is to be an aggregator of opinions and evaluations of bloggers on ICO projects (initial coin offerings), the goal is to collect ratings and comments of TOP bloggers and websites in one place. The site is built on wordpress using plugin "Salient".

1. Site description

Homepage (<http://cryptodiffer.com/>)

On the homepage tables with the headers "Blogger name" and "score" are displayed. In the columns Ico names has a hyperlink which leads to the Ico page. Tables currently can only be edited/added manually.

Task: We need these tables to use data from SQL database (available in admin panel)

ICO page (as an example: <http://cryptodiffer.com/Everynym/>)

Description:

The ICO page has a following design: on the top there is a title "Title ICO", below title there is a "short description of ICO", on the left there is a logo of this ICO.

Next two blocks are: picture or video on the left and information about ico on the right. Under the ico information block we have two buttons: "website" and "whitepaper" with hyperlinks. If the link is missing then the button is not shown. Under the buttons there are social network icons with hyperlinks.

Task: to make SQL database the source of information for this page

2. Objectives

Database

- Creating universal database with all data we use, with opportunity to pull data from api (especially coinmarketcap.com).

Homepage

- Automatically pull information “ico name” “score” etc (look additional data) into the table from database.

ICO Page

- Creating template for ico page with id identifier which automatically pulling data “ICO_name” “Ico_decription”, “ICO_Image” e. t. c. from database with this id. Example: “Icodrops.com”
- Pulling data to “TOP ICO EXPERTS OPINIONS” from database with adding

progress bars. Example:

Categories/Peer Analysis

The main idea of the “category/peer analysis page” is to display on one page an INTERACTIVE treemap of all the crypto-currencies presented in the database. (VARIABLES: Type, Category, Subcategory, Name, Market Capitalization, Return on investments, Features).

Interactive buttons and tools:

- Search by name of cryptocurrency or ticker. If an item is found, then a drop-down list appears with the name of Crypto-currency which was searched and other cryptocurrencies from the same subcategory (if subcategory column is EMPTY, take category column instead). Name, Market Capitalization, Return on investments, Features, must be shown as in the EXAMPLE 1. !!!Cryptocurrency that was searched must be highlighted.
- First block contains General TYPE of CryptoCurrency. When you click on it, CATEGORY list appears
- Second block contains CATEGORY of Cryptocurrency, which is more detailed. When you click on it, SUBCATEGORY list appears
- Third block contains SUBCATEGORY of Cryptocurrency (direct competitors). When you click on it, Names of ICOs appears with all information about them: Market Capitalization, Return on Investment and features

- Add buttons to hide already opened types/categories/subcategories. But it must be possible to open several types/subcategories/categories tabs in one moment of time.
- Button - HIDE ALL and OPEN ALL.
- Place all main Items (Type/Category/Subcategory/Name) in alphabetical order.
- Name must contain a name of cryptocurrency with link to it on our page/coinmarketcap website/other source we want to include.
- CoinMarketCap have to be shown in Currency format \$US,

Additional info:

- Data columns: Type, Category, Subcategory, Name, Features we will fill manually.
- Market cap in ETH (ethereum) must be taken from site <https://coinmarketcap.com/> using API.
- ROI is calculated value = (ETH price of taken Cryptocurrency) / (ETH price on ICO)
- ETH price on ICO we will fill manually.

Data used for Categories page

Type	Categoty	Subcategory	Name	Mcap	Features	ETH ROI since ICO	ETH ICO

Сайт.

1. Главная Страница

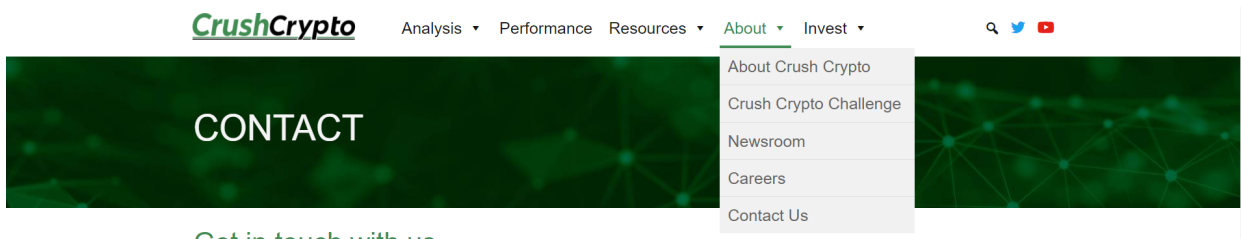

На главной странице

2. Навигационное меню

Навигационное меню должно присутствовать на каждой странице сайта.

Содержит следующие кнопки: **Upcoming ico**, **Ended ICO** странички, **Highlights**, **Ico Review**, **Ratings**, **About**, **Peer Analysis**.

Когда подносишь курсор к кнопке, выпадает окно с подкнопками. Пример:

Кнопка Upcoming ICO - без подкнопок

Кнопка Ended ICO - без подкнопок

Кнопка Highlights from TOP ICO EXPERTS - без подкнопок

Кнопка ICO Review - без подкнопок

Кнопка ALL ICO Ratings - подкнопки: Изменения рейтинга вчера-сегодня, общий-топ (агрегированный) рейтинг, все рейтинги экспертам

Кнопка Peer Analysis - без подкнопок

Кнопка About - подкнопки: Дисклеймер, Эксперты, Наша команда, Контакты.

- + Поисковик - при вводе названия, должен выпадающим окном выдавать подходящие варианты страниц, совпадающие по введенным первым буквам.
- + Иконки на наши социальные платформы: Телеграм, Медиум, Твитер, Реддит. При нажатии на иконку, социальная страница должна открываться в Новом окне.

При нажатии на кнопку/подкнопку/медиа-иконку, сайт переходит на соответствующую страницу.

При скроллинге сайта вниз, навигационно меню НЕ должно фиксироваться(оно скрывается). Но когда происходит скролинг вверх оно появляется.

3. Страница ICO

Есть уже готовый вариант страницы ICO (в качестве примера:
<http://cryptodiffer.com/Evernym/>)

Описание:

Страница ICO имеет следующий вид: сверху есть заголовок «Title ICO», ниже заголовка есть «краткое описание ICO», слева jп - логотип этого ICO.

Под описанием идет видео или баннер.

FLOGmall (PreICO)

An international e-commerce site

FLOGmall is a great aggregator for all of crypto society, which is not limited to a specific category of goods or services. We bring you millions of products, from electronics and clothing to accessories and cars or rental housing. It's all what you're used to buy in regular stores for fiat money. FLOGmall is one platform, hundreds of altcoins and dozens of saved hours in search of the goods or services acquired for the cryptocurrency. FLOGmall is a comprehensible free resource with a user-friendly interface and easy market launch from any part of the world. FLOGmall is a modern ecosystem of goods and services purchase and sale in a new format. It is a new video format for sellers - LiveStore with powerful features for your business presentation. FLOGmall is a unique solution for making possible extra income up to 600% by ICO participants by using the proper ATES service.

Далее будет блок ICO Market&Returns

MARKET & RETURNS

CPC token price

\$0.203387 (-6.33%)

0.000258452 ETH

0.0000191 BTC

24h Volume

\$1,917,370

Market Cap

\$46,111,057

Returns since ICO

2.00x
USD**2.58x**
ETH**2.10x**
BTC

These numbers show how much the token price has changed relative to the initial ICO token price.

Пример (<https://icodrops.com/cpchain/>)

В котором данные подтягиваются с базы данных а та через api coinmarket cap и будут отображаться

- Цена Токена
- Returns since ICO
- Market cap

Если эта информация отсутствует в базе данных, весь блок не показывает.

Следующий блок Peer Analysis в котором показывается type, category и subcategory избранной ICO (той чья страница) из базы данных.

Пример

Chimaera	Gaming	General Gaming	Gamedev
----------	--------	----------------	---------

(Все вкладки кроме названия Ico с гиперссылками и ведут на страницу Peer analysis, с настроенным фильтром в зависимости от нажатой вкладки)

Дальше идут конкуренты (все ICO с базы данных у которых совпадают тип категория и субкатегория) и их маркет кап и ROI (если есть) с два столбца до 6 ico в сумме (если больше то внизу списка стрелочка при нажатии на которую разворачиваются оставшиеся)

Competitors	Market cap	ROI (in ETH)
Gamecom	10mln	0.5x
Refferum	TBA	TBA
Araram	228mln	17x

На каждую ICO гиперссылка которая ведет на страницу этой ICO.

В нижней части страницы есть «ТИП ICO EXPERTS OPINIONS» - сейчас реализована в гугл таблицах:

EXPERT

About

I have been working as an advisory board member for several other successful ICO launches who have achieved their ICO targets, to help with marketing, media, PR and strategy. With the opportunity to leverage my digital footprint of 115,000 followers on Twitter (31% in US) and 22,000 on LinkedIn.

ICO Success Score

10. Peer Analysis - отдельная страница-инструмент

В самом верху страницы локальный(база данных категории) поиск по названию криптовалюты, ICO, трекеру, типу, категории, субкатегории.

При вводе первых букв в поиск появляется выпадающее окно с возможными вариантами поиска. Пример:

При успешном поиске, разворачивается дерево тип-категория-субкатегория и отображается ICO, криптовалюта, которая искалась (выделена цветом) и другие криптовалюты, которые находятся в той же субкатегории (категории если отсутствует раздел субкатегории).

Если криптовалюта, которая искалась, имеет несколько субкатегорий/категорий, то отображаются все возможные варианты.

Рядом (справа) от названия криптовалют должны отображаться следующие элементы:

- 1) Ticker
- 2) Features(short description)
- 3) MarketCap
- 4) ROI

В название криптовалюты должен быть встроен гиперлинк с переходом на “!!!!!!!!!!!!!!”

Если поиск не осуществляется то страница выглядит следующим образом:

- 1) Иерархическое дерево начинается с Типа криптовалюты
- 2) Следующая ветвь - Категории
- 3) Следующая ветвь - Субкатегории (может отсутствовать)
- 4) Конечный элемент иерархической цепи - сами ICO/криптовалюты

При нажатии на элемент иерархического дерева, открывается выпадающим списком следующая ветвь.

Есть возможность открывать несколько ветвей параллельно.

Есть возможность скрыть все открытые ранее ветви.

Есть возможность открыть все возможные ветви.

Возможные варианты оформления.

Button 1	SQL	Contains word "Score" and HYPERLINK to score source, related to given expert	"Score" SQL
Button 2	SQL	Contains Expert_Name from database and HYPERLINK to the given page.	cryptodiffer.com/experts
Button 3	SQL	Contains ICO_name and HYPERLINK to Ico page from our website	cryptodiffer.com/"ICO_name"
Panel 1	SQL	Contains grade as text/icon from our database related to given in Button 3 - ICO_name. GRADES could be presented as text, number, icon	No link

ADDITIONAL INFO:

- ICOs in each block must be sorted by logical grade from higher to lower.

This filter/sorter should have custom settings for example: we could choose what grade is high and what is lower.

EXAMPLE OF CUSTOM SORTING:

"Good / Good" - 1st place, "Good / Neutral" - 2nd place, "Neutral / Good" - 3rd place, "Neutral / Neutral" - 4th place

OR "Interested" - 1st place, "Passed" - doesn't even appear in the table

OR "Possitive" - 1st place, "Stable+" - 2nd place, "Stable" - place.....

- IF there are less than 15 ICO's rating for given EXPERT in our database, just left empty space.
- IF there are several similar grades in last rows (10 ICOs with A score and 10 ICOs with B score), take 10 ICOs with A score and 5 ICOs with B score sorting them by (((Name/ICODate/we have to decide!!!)
- Blocks on the page sorted by EXPERT ID, for example: ICODROPS have ID=1, so they appear in 1st place.
- If we add new EXPERT and his rating, new block must appear on "TOP 15" page
- USE "CSS GRID" (what we want:

<https://cdn.shopify.com/s/files/1/0533/2089/files/css-grid-layout-repeat.gif?v=1513171029> - the same must happen with our BLOCKs)
