

JOB DESCRIPTION - RAPIDOR

Job Type	Full-time
Experience Level	L4 : 4 - 6 years experience
Role	Team Lead
Industry	B2B & B2C ecommerce
Company Size	20+
Company Funding	VC Funded

JOB DESCRIPTION

PlaceOrder in its current growth phase is looking for experienced developers to resolve real-world and real-time ecommerce domain problems by leveraging best practices, modern stack and AI/ML technologies.

Opportunity to work on topics ranging from object-oriented/functional and reactive programming to build highly performant and scalable products for the Indian and international market. Solve the real problems in the tech stack of your choice.

ABOUT RAPIDOR & PLACEORDER www.placeorder.com

We are a team of over 20+ people from multiple locations in India. Rapidor, a product from AcelrTech Labs is changing the way small and medium size businesses do their day-to-day operations and business workflows. We help them in making everything automated in the supply/chain, ecommerce and real-time sales team monitoring and

management to reduce errors from more than 50-70% to near 0%. Rapidor mobile applications which work both online/offline are used by 1000s of sales team members across 100s of customers.

Current solution channels and processes orders worth over millions of dollars per month.

Allows multiple businesses to interact with each other, to transact and manage smooth supply chain operations; while ensuring individual enterprises' data safety and ownership. The product has strong integration capabilities using well structured APIs.

A new age version of the platform on ONDC network for ecommerce in India and exports called PlaceOrder was recently launched and able to gather huge limelight in the ecommerce domain and able to scale to thousands of sellers within a span of a quarter.

We are now looking for the next great addition to our team in the capacity of the role defined above to accelerate the growth and be part of the next generation product development.

As a team player at PlaceOrder you will be part of a talented and motivated agile development team.

That is responsible for building the backend and frontend using the modern stack. Although we are extremely proud of what we have achieved at PlaceOrder and Rapidor already, there is still some space for improvement and lots of interesting technical challenges to overcome going forward for scalability, performance and UX.

Are you a creative, task and data oriented person? Then please have a look at below requirements in more detail:

- Lead, mentor, and guide a team of full stack developers.
- Ensure the team adheres to best coding practices and standards.
- Work closely with product managers, UX/UI designers, and stakeholders to transform ideas into tangible features. Act as a bridge between technical and non-technical teams.
- Conduct regular code reviews, ensuring code quality and consistency. Collaborate with QA teams to ensure rigorous testing and bug tracking.
- Optimization & Maintenance: Monitor platform performance and troubleshoot issues. Drive continuous improvements in terms of code quality, security, and scalability.

- Hands-on experience with any of the mainstream programming language: Python/Java/Kotlin/Scala
- DevOps mindset and experience with full SDLC including troubleshooting in Dev/Staging/Live environments.
- In-depth understanding of data structures and basic algorithms is a must have skill.
- Experience with API design, microservices architecture, and headless eCommerce solutions.
- Familiarity with modern front-end technologies and platforms.
- Excellent communication skills, both written and verbal.
- Most important: You should have a great positive attitude towards the team and be willing to get the job done in the best capacity of yourself.

What can you expect from joining Rapidor?

- With an office in the heart of Cochin's most happening place, you have the opportunity to work from the office and can work from home in some cases.
- A diversified team from different parts of India.
- Great opportunities to learn, grow and develop the way you want
- Opportunity to be part of learning groups, conferences and seminars
- Competitive compensation and relocation support
- Flexible working hours
- Medical insurance and
- Much more ...
