

Podcast Planning Doc

Podcast Myth/Topic:

Group members:

Format: What is the format for the podcast? (ie: One host, one guest. One host, multiple guests. More than one host, one or more guests. A group of hosts, no special guests. Other?). Choose from above, then state *specifically* the role each student will play.

Structure. What is the structure of the podcast? (Possible structures: A theme for the episode, with questions or talking points. A Q&A based on listener (or predetermined) questions. An informal, meandering discussion. A formal, information-based lecture. Other?).

Content. List your interview questions and/or discussion topics below. This section should be *lengthy and thorough*. If your group would like a more-structured option for planning the content (including minute-by-minute outlining), use [this optional document](#) and turn in as well.

Tone. Will your podcast have a formal or informal tone? Explain.

Music and Sounds. Are you planning to use music (intro, segues, outro) or "environmental sounds" (background noise to enhance what's being discussed) or neither? If so, where and why? (If you used the more-structured "optional planning document," no need to complete this question).
