Subject line: How I got betrayed for the first time:

Two days ago, he agreed that he would give it to me, but now he has flipped sides.

It was the 'Diary of a Wimpy Kid.'

My mind was constantly saying that it was the best book.

I had just asked him for a reading and could not believe he would deny it.

So, I reached home and went straight to my room with a crying face.

What would a 9-year-old do except for crying!!

I kept pondering, "Why wouldn't he give me the book for reading?"

Well, I haven't found out till now.

But something crazy happened that day.

My elder brother hopped in my room and said, "What's your hobby?"

I said, "Reading."

He maintained his stoic face and went out.

I didn't think about it much.

After 4 days, he again came into my room and said, "I have a present for you."

My eyes lit up, my heart raced, and a tide and a tsunami of questions rose in my mind.

"What is it? Is the Diary of the Wimpy Kid? Is it something cooler?"

And I am sure if I gave you 10 chances to answer, you wouldn't even get close to it.

It was a book!!

But not the one that I wanted.

That book propelled me to what I am today,

And because of it, I can write this email.

You must have guessed it by now.

It was a book on "How to immerse readers into writing" or something like that.

But the times have changed.

Traditional knowledge is becoming outdated.

Bookwriting has never been this easy.

With the help of AI, it can be written within days.

Here are 6 best AI Tools for writing books:

1. Bookwiz

It's an AI-powered platform that helps authors with the book-writing process. It uses GPT-4 to assist with brainstorming ideas, and creating characters, outlines, and chapters.

2. Instabooks AI

Generate Custom AI Textbooks Instantly. Tell them what topic you want to read an in-depth book about, and we will generate an in-depth textbook on it.

3. ChildrenBook AI

Create a unique children's story with our easy-to-use AI storybook maker. The personalised children's books are fully customised with original characters, illustrations, and an imaginative plot.

4. Sudowrite

Write your novel or screenplay faster with the best AI writing tool according to The New Yorker, NY Times, The Verge, and many more. Start for free today.

5. NovelistAI

NovelistAI harnesses the power of artificial intelligence to craft distinctive novels, insightful non-fiction, and immersive interactive books.

6. AIBookGenerator

Generate a book in seconds with AI. Sell it on bookstores like Amazon and make money!

Above are some of the most easy ways to write a book and earn money.

Combine them with your talent and earn money.

From the future,
Aditya.

SUBJECT LINE: Work hard in the right direction.

You all must have heard, "Work hard, and you will succeed."

But there's a twist in the tale: "Work hard at the right things, and you will succeed."

Working hard in a 9-5 is not the correct direction.

You should know the areas where you should work hard.

Let's take an example:

A labourer works hard but remains a labourer no matter how hard he works.

Whereas if a millionaire works hard, he generates thousands of dollars in a short period of time.

The millionaire knows the right direction, whereas the labourer does not.

And that made a massive difference in their lifestyle.

Here are some of the right areas to work on to replace your 9–5:

Websites: No code

Build and sell websites using no-code tools.

→ Durable

→ Framer

→ 10web

Create and sell e-books

You can use ChatGPT to write an ebook for you.

It can include:

→ How-to-guides

→ Courses

→ Books

Sell it on Gumroad or similar platforms.

Comic book creation

You can easily create comic books using Dall-E3.

[Click here to learn.](#)

Selling digital products

Making digital products that you can sell is easy now with all the AI tools.

You can make

→ E-books

→ Templates

→ Digital art

Promote it and sell it on Gumroad or similar platforms.

Copywriting:

You can write copy for businesses or solopreneurs, such as:

→ E-mails

→ Articles

→ Social media posts

Use tools like ChatGPT, Rytr, WriteSonic, CopyAI+, and many more.

Content creation

Create and monetize content on your own social media.

→ Develop engaging content.

→ Use platforms like X, Instagram, LinkedIn, etc

Monetize your content through:

→ Collaborate with brands for sponsorship.

→ Sell digital products and services directly to your followers.

Drop-shipping

Start a drop-shipping business to sell items online.

With drop-shipping, you don't need to keep items in stock.

→ Use websites like Shopify to create your store.

→ Pick products from suppliers and show them in your online store.

And that's it.

Master any one or multiple of these skills and start earning.

But remember, it takes patience and hard work to succeed using these skills.

So don't forget to put in the necessary reps.

From the future,
Aditya.

EMAIL 3

Subject line: 2024 made easy for you.

Hey, wonderful readers!

It's here.

2024.

That's why you have been waiting for your ass to get up to work.

Now get up, step out of that little fragile bubble you have created for yourself, and attack life.

Because if you don't, you will be knocked out cold by a devastating punch.

And it will be really hard to get up.

That was my experience speaking, not me.

Well, enough of the advice.

Let's go through the world of AI and find some amazing websites to make 2024 easier for you.

Last one is of God level.

1. Temp-Mail:

Provides disposable email addresses for temporary use, avoiding spam in your main inbox.

[Visit here.](#)

2. MicroCopy:

Offers free AI-powered copywriting tools for generating marketing materials and creative content.

[Visit here.](#)

3. Convertio:

Converts various files between formats, including documents, images, and audio.

[Visit here.](#)

4. ScribeHow:

Creates step-by-step guides from screen recordings, perfect for documenting processes or tutorials.

[Visit here.](#)

5. Wolframalpha:

Uses AI to answer complex questions in various fields, from math and science to history and literature.

[Visit here.](#)

6. BookBub:

Finds discounted ebooks and audiobooks, helping you access great reads for less.

[Visit here.](#)

7. TinyWow:

Offers free versions of popular online tools like PDF editing, image resizing, and video conversion.

[Visit here.](#)

8. Skrapp:

Finds the email addresses of website owners and employees, helpful for outreach and networking.

[Visit here.](#)

And that's it.

Thanks for reading this email.

And also show it to your friends and family.

I am sure that they will love at least one .

From the future,

Aditya.

EMAIL 4

Subject line: AI would take over, but there's a twist.

When ChatGPT was launched, people believed AI would take over jobs.

But when people started using it, they found it was too dumb to take over.

But here's a hot sauce:

It will take over for the lazy and people who don't use AI.

And you don't want to be left out and remain illiterate about AI.

Here are the best YouTube channels to learn AI from:

1. **Open AI's** official YouTube channel is like a jackpot for those who want to learn AI. They frequently release videos demonstrating the capabilities of AI, especially ChatGPT.
2. **Sentdex**: Harrison Chase runs this channel. It offers a wide range of tutorials on various AI and machine-learning topics, among many others. He practically gives coding examples, offering hands-on learning experiences.
3. **Two-minute papers**: The owner of this channel is Karoly Zsolnai-Feher. It provides quick and informative summaries of research papers in the field of AI.
4. **CodeEmporium**: This channel, led by David Foster, offers in-depth tutorials on AI and machine learning, with a specific focus on practical implementation.
5. **Yann LeCun** is a key figure at Facebook AI Research and occasionally shares insightful v.ideos on his YouTube channel. It provides a broader context for understanding the role of models like ChatGPT in the field of artificial intelligence.

So these are some of the best YouTube channel that drops valur bombs.

Follow them and get superior.

From the future,

Aditya.

Email 5:

Subject line: The day I got some serious scolding.

He overheard us and smashed his cup of tea on the ground.

"You said what??" he said in an enraged tone.

I could see the fire and the anger that filled inside him.

My head bent low as I realised the wrong thing at the wrong time.

My coding teacher scolded me for a good half an hour.

And I think that my habit of speaking slang had gone too far.

What happened was that I received my test copy back, and I failed.

I shouted, "FUCKKK", and some other slang in my native language.

I did not realise that he was behind me and overheard me.

The relationship only worsened after that.

I lost interest in coding after that.

Although I passed the examination with flying colours, my enthusiasm for coding was over.

And this is how I lost a valuable skill.

Learning a new skill is like moving mountains nowadays.

So here are some AI tools that will help you gain high-income skills faster:
