

Who is coming to see us?

A special visitor is coming to see Year 6 to talk to us about electricity.

This is not the same as our usual afternoon. That is **OK**. Trying new things is fun.

We will sit nicely on the floor and look and listen to the information they have to tell us. If we have a question, we can put our hand up and wait to be asked to speak.

During the workshop, we will learn about what electricity 'is', how we use it, how it can be generated, how its generation & use can impact on climate change - and the structure, function and components of electric circuits.
