BUILT - Introduction (Postgraduates)

Thinking of how to strengthen your profile as a Postgraduate Researcher?

TEAM PRIZE FUND: £15k*

1st place: £10k. 2nd place: £3k. 3rd place £2k.

In times past, being a postgraduate researcher meant going out in the world of work and marketing yourself in terms of your thesis. In the present, this is far from being the case! Employers of all kinds will of course be interested in your research achievements during your time here at Bangor. However, equally importantly, you are going to be asked to showcase a whole range of skill sets to stand out in a very competitive marketplace. Through training opportunities made available to you by the Doctoral School workshops, and training sessions available in your School, you are inevitably enhancing your profile.

In addition, Bangor University is uniting with its alumni to extend this offering with a wholly new challenge linked to an interdisciplinary team-based initiative, designed to bring together postgraduate researchers from across all three colleges. You will not only have the chance to meet and work with your peers in other disciplines and with Bangor alumni, but will also fine-tune your skills in self-presentation, strategic thinking, team-working and in creativity. Why not take up the challenge alongside pursuing your postgraduate research and learn how you can succeed outside your comfort zone.
