

IBD Center of Manhattan

In [IBD Center of Manhattan](#) we are working with Inflammatory bowel disease (IBD) that refers to chronic inflammatory conditions of the intestines, including Crohn's disease and ulcerative colitis. The gastroenterology and gastrointestinal (GI) surgery program. The internationally recognized IBD specialists at IBD Center of Manhattan are dedicated to providing outstanding, patient-centered care for the management of IBD, and are engaged in groundbreaking research to help cure these diseases.

Given the similarities of [IBD symptoms](#), an accurate diagnosis is the best way to identify your condition and find an appropriate treatment plan to help you maintain a healthy lifestyle. Our experts are experienced in accurately identifying this frequently misdiagnosed disease. The causes of IBD remain unknown, but they likely include a combination of genetic, immune and environmental factors.

Crohn's disease and ulcerative colitis are lifelong chronic illnesses and patients can have symptoms ranging from mild to severe. Steroids have been a mainstay of treatment but can be riddled with side effects.
