

OpenTelemetry PHP

**THESE MEETINGS ARE RECORDED
AND AUTOMATICALLY POSTED TO
ZOOM CLOUD**

Meeting Time: Wednesdays, 8:00am
Eastern

Repos:

- <https://github.com/open-telemetry/opentelemetry-php>
- <https://github.com/open-telemetry/opentelemetry-php-contrib>
- <https://github.com/open-telemetry/opentelemetry-php-instrumentation>
- <https://stackoverflow.com/questions/tagged/open-telemetry+php>

<https://packagist.org/packages/open-telemetry/opentelemetry/stats>

✓ <https://packagist.org/packages/open-telemetry/api/stats>

<https://packagist.org/packages/open-telemetry/sdk/stats>

Standing Agenda Items:

- Open PRs
 - [open-telemetry/opentelemetry-php · GitHub](https://github.com/open-telemetry/opentelemetry-php)
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-instrumentation/pulls>
- Open Issues
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>

2024-10-09

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Bob Strecansky**
- **Sergey Kleyman**
- **Pawel Filpczak**

Agenda Items:

- [BM] - weaver for semantic conventions [[issue](#)]
 - Second request, old one is not supported anymore
 - Using the new tool to generate what we already have
- [BM] - took some time to look at the Elastic distro for OT
 - Impressed with what he saw Pawel & Sergey
 - Tomorrow is the next Alpha version for the [elastic agent](#)
 - Async sending
 - Creating a thread
 - For each worker it creates an additional thread
 - Improvement for production
 - Focusing on the instrumentation for the curl
 - Implement features 1 by 1
 - Glad to contribute back to upstream
 - How should it be? Implemented in native
 - Is it okay to be a part of the extension? A separate extension?
 - Brett had been playing around with implementing OT C++, small wins
 - Elastic It could be a part of our extension
 - Eventually needs to be a single process instead of threads for a single worker
 - Should we wait for that or contribute now?
 - If the API doesn't change with an improved implementation
 - Sergey - working on auto-instrumentation in k8s
 - Opentelemetry-operator
 - Webhook tech that k8s supports
 - Special notation on your pod, a piece of code is auto called before the pod is deployed
 - Tweak configuration of pod, env vars, etc

- We will put contrib and extensions
- PHP_INI_SCANDIR - list of dirs for php ini files
- “0 code instrumentation”
- PR open at the Operator
- Technical difficulty - extension needs to be separate binary for each PHP version, we don't know which PHP version is going to run in each container. We need to force the user to tell us what version of PHP is going to run in the container / override default PHP version
- Another binary that pretends to be an actual extension, sniffs the PHP version and will load the appropriate files that loads the extensions

2024-10-02

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Bob Strecansky**

Agenda Items:

- [BM + CLW] laravel-auto 1.0 ready to tag?
 - No news is good news - 🚢
- [BM] core 1.1.0 ready to tag?
- [BM] Auto instrumentation ready to tag?
- Framework versions
 - Does the framework fail to run on our supported versions?
 - No weird workarounds! :)
 - We could be running our tests not just against our composer dependencies, but the [composer] earliest compatible versions.
 - This would double the size of our test suite (which is already big in contrib)
 - Maybe a weekly CI run (just to keep an eye on it!)
 - E2E tests with an actual collector instead of in-memory
 - <https://tracetest.io/> discussion
 - Issue “Help Wanted” to track this work?

2024-09-25

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Sergey Kleyman**

Agenda Items:

- [all] Discussed releasing 1.1.0 and laravel 1.0. Added to next week's agenda.
- [Sergey Kleyman] What do you think about upgrading the current attributes in code.*
from experimental to stable?
 - <https://opentelemetry.io/docs/specs/semconv/attributes-registry/code/>
 - <https://github.com/open-telemetry/semantic-conventions/issues/1377>

2024-09-18

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Pawel Filipczak**
- **Sergey Kleyman**

Agenda Items:

- [BM] ~100 installs/day of beta SDK.
- Elastic's distribution of OpenTelemetry PHP
<https://www.elastic.co/observability-labs/blog/elastic-opentelemetry-distribution-php>

2024-09-11

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**

Agenda Items:

- [BM] extension fixed for 8.4, beta3 released. Betas also out for API, SDK etc, all at 1.1.0betaN

2024-09-04

Attendees:

- **Brett McBride**
- **Ago Allikmaa**

Agenda Items:

- [BM] (still) hoping to get betas out for API, SDK etc soon. One bug in ext-opentelemetry 1.1.0beta1 has been fixed, awaiting PR review to create beta2

2024-08-28

Attendees:

- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Juliano Costa**
- **Aditya Agrawal**

Agenda Items:

- **[BM]** comment from Cedric in <https://github.com/open-telemetry/opentelemetry-php-instrumentation/pull/146#pullrequestreview-2262685000>
- [BM] hoping to get betas out for API, SDK etc soon. We should finish off attribute-based hooking first (as it may involve small API changes, depending on above)
- [JC] DevEx questionnaire: <https://github.com/open-telemetry/sig-developer-experience/issues/3#issuecomment-2314808418>
- OTel Contributor's Experience: <https://cloud-native.slack.com/archives/C06TMJ2R0SK>
 - https://docs.google.com/document/d/1CTQI0p3QF8JP8reV8z_ggcs8KE5YVPpQGvAQknw4qP0/edit#heading=h.1zpfctsf3o6
-

Notes

- [JC] Consider multiple meeting times for SIG?

2024-08-21

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Ago Allikmaa**

Agenda Items:

-

2024-08-14:

Attendees:

- **Bob Strecansky**

- Brett McBride
- Ago Allikmaa

Agenda Items:

-

2024-08-07:

Attendees:

- Bob Strecansky
- Brett McBride
- Ago Allikmaa
- Severin Neumann

Agenda Items:

- [SN] SIG CheckIn
 - the future of opentelemetry discussion during maintainers call
 - <https://github.com/open-telemetry/sig-contributor-experience>
 - <https://github.com/open-telemetry/sig-developer-experience>
 - Project Infra SIG
 - <https://github.com/orgs/open-telemetry/projects/91>
 -

2024-07-31:

Attendees:

- Ago Allikmaa
- Chris Lightfoot-Wild

Agenda items:

-

2024-07-24:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**

Agenda items:

- [BM] RdKafka auto-instrumentation published
- [BM] - OoO next week
- [BS] Security audit sometime in the future

2024-07-17:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**

Agenda items:

2024-07-10:

Attendees:

- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**
- **Severin Neumann**
- **Bob Strecansky**

Agenda items:

- [BM] <https://github.com/php/php-src/pull/14841> (auto-instrumentation segfault with JIT enabled)
- [BM] <https://github.com/open-telemetry/opentelemetry-specification/issues/4138> (trying the spec approach to configuring exporter retry)
- [BM] <https://github.com/open-telemetry/opentelemetry-configuration/issues/102> (trying to ensure my/Nevay's WIP rule-based sampler won't conflict in file-based config with other samplers)
- [CLW] : Versioning of contrib things - 1.0 releases of all things?
- [CLW] How will we back-patch bugfixes into 1.0.x of contrib after we've released 1.1.0?
- [SN] GC Check-In
 - [Allow SIG maintainers to express their requirements](#)
 - [SIG Contributor Experience](#)

2024-07-03:

Attendees:

- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

-

2024-06-26:

Attendees:

- **Brett McBride**
- **Bob Strecansky**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

- [BM] PRs ready for review:
 - <https://github.com/open-telemetry/opentelemetry-php/pull/1304>
 - <https://github.com/open-telemetry/opentelemetry-php/pull/1336>
- [CLW] - Logging

- Log signals (PSR3 vs Laravel hooking in its own thing)
- Use monolog handler for OT logging
 - PSR3 uses this under the hood
- Toggleable is good
- PSR3 auto-instrumentation can do logging as zero code now
- Default mode for logging - not to export them but to check spanID into the log
 - Does it make sense for the default to be exporting?
 - Probably so now that the logging signal is more refined
 - Not too late to change that

2024-06-19:

Attendees:

- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

- [CLW] - Discuss composer-plugin concept:
<https://github.com/ChrisLightfootWild/opentelemetry-php/tree/composer-plugin>
- [BM] PR merged in opentelemetry-configuration to support instrumentation config in file-based config. Updating auto-instrumentation registration PR to use this.

2024-06-12:

Attendees:

- **Bob Strecansky**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**
- **Severin Neumann**

Agenda items:

- [BS] - New spec release for June is out:
<https://github.com/open-telemetry/opentelemetry-specification/releases/tag/v1.34.0>
- [SN] Help maintainers to keep track of spec releases:
 - <https://github.com/open-telemetry/community/issues/2087>
- [SN] Anything top of mind that the Spec Sig can help with?
 - [CLW] - Profiling
 - Elastic - [Universal Profiling Agent](#) (eBPF solution)
 - Something that would come from external
 - No initial work for the SIGs to do
 - Work in .net / Java to have profiling from within the application
 - Code from Splunk, experimental
 - Interesting when we start talking about correlating signals
- [AA] - How to handle logging
 - Application is configured to log to file at INFO level
 - OT can capture DEBUG level
 - [SN] - Bridge APIs
 - Which initial logging config you connect it to
 - Monolog allows you to send it different ways
 - Good question to ask on the spec repo or ask in the otel-maintainers channel
- [CLW] - OpenTelemetry API repo
 - Assumes all the default implementations are noops
 - Issue that was raised with resource detectors
 - Version and service names
 - Default resource detectors call an expensive function to get a hostname, et. al.
 - We might not need to do all of these things and inspect the runtime (php versions, all these other noop things)

2024-06-05:

Attendees:

- **Bob Strecansky**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

- [BS] - service.version [thread](#), Bob Strecansky will create an issue.
- [CL] - metrics question
 - No good uses of metrics to my knowledge?
 - At work we have a redis counter / cron combo -> CloudWatch

- [CL] - auto instrumentation in Laravel
 - Trace events for the log watcher (log hook for Laravel)
 - Experimenting with the Symfony Laravel package
- [AA] - encountered issues with people setting otel-php up
 - Basic things are difficult
 - Quick troubleshooting guide / FAQ - Bob Strecansky will create an issue.
 - See if you get data
 - See if you have all of the required dependencies added

2024-05-29:

Attendees:

- Bob Strecansky
- Chris Lightfoot-Wild
- Ago Allikmaa
- Pawel Filipczak

Agenda items:

2024-05-22:

Attendees:

- Bob Strecansky
- Brett McBride
- Chris Lightfoot-Wild
- Ago Allikmaa
- Pawel Filipczak

Agenda items:

- [BM] will be on vacation 27/5 until 13/6 (will miss 3x SIG meetings)
- [PF] - Working on Elastic Otel distribution, will hopefully be able to release soon!
 - Commit our instrumentations afterwards
 - Working on the native part of the auto instrumentation for Elastic
 - We can adapt it and commit it upstream
 - PHP 8.0 & 8.1 - similar API to the O11y API (quite compatible)
 - Perhaps we can use his work in otel

2024-05-15:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

- [BM]
https://github.com/open-telemetry/opentelemetry-php/pull/1304#discussion_r160120412
0 (can we move towards *experimental* file-based config without breaking too many things in the interim?)
- [BM] will be on vacation 27/5 until 13/6 (will miss 3x SIG meetings)

2024-05-08:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Ago Allikmaa**

Agenda items:

-

2024-05-01:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Victor Lu**

Agenda items:

- [CLW] - should we do a 1.0.3 release for instrumentation?
 - Brett will do this today
- [VL] - Introduction to OpenTelemetry
- [BM] - <https://github.com/phar-io/phive>

2024-04-24:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Severin Neumann**

Agenda items:

- [BM] <https://github.com/open-telemetry/opentelemetry-php/issues/950#issuecomment-2065503353> (should we close this as “won’t do”?)
- [CLW] <https://github.com/open-telemetry/opentelemetry-specification/blob/v1.32.0/specification/trace/api.md#link> What is the process for tracking newer additions to the spec and providing newer functionality? Referred to the Span.AddLink as an example, given recent PR where I was looking to use this functionality
- [SN] Governance Committee Check-In Process: <https://github.com/open-telemetry/community/blob/main/gc-check-ins.md>

2024-04-17:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Pawel Filipczak**

Agenda items:

- [CLW] Report initial findings with spi for auto-instrumentation

- [CLW] Composer dependencies in contrib (propose: moving ext-opentelemetry to suggests)
- [CLW] ClockInterface etc usage & mockery depends on SDK. Could it move to API?
- [CLW] OTEL_PHP_EXCLUDED_URLS - applies only during [bootstrap](#).
[Document to highlight this?](#)

2024-04-10:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**

Agenda items:

- [CLW] - Open PRs:
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pull/252>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pull/250>

2024-04-03:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Aditya Agrawal**

Agenda items:

- [BM]
<https://github.com/open-telemetry/opentelemetry-php/issues/1111#issuecomment>

- [-2033227150](#) - removing psr-18 discovery (choose your own http client) and picking a client that we choose would enable http timeouts, CA certs.
 - Brett is going to follow up with the PSR-FIG discord to ask about adding an optional parameter here.
- [CLW] Laravel QueueWatcher questions
 - Hooks are a bit more powerful than adding laravel events
 - Exception raised, provided by an exception event
 - Is it fine to prefer to use a hook in specific instances for flexibility
 - [BM] - someone had written a laravel instrumentation library that was pretty good, someone took the interesting functionality out of it and add hooks. No strong argument if you believe it can be done better without the watchers.
 - Using semantic convention to define where things make sense
 - Other bits might not be mapped into attributes that are already defined
 - Fine to add attributes that aren't defined in semconv
- [CLW] API instrumentation namespace (InstrumentationInterface & trait) query

2024-03-27:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**
- **Pawael Filipczak**
- **Aditya Agrawal**

Agenda items:

- [BM] ready to tag extension 1.0.2
- [BS] Added Ago & Chris to the approvers list

2024-03-20:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**
- **Brett McBride**
- **Chris Lightfoot-Wild**

Agenda items:

- [AA] <https://github.com/open-telemetry/opentelemetry-php/issues/1254>
 - Wanted to make sure this approach was good before starting work
 - Soliciting feedback, will wait for feedback

2024-03-13:

Attendees:

- **Bob Strecansky**
- **Ago Allikmaa**

Agenda items:

- [AA] <https://github.com/open-telemetry/opentelemetry-php/issues/1254>
 - Wanted to make sure this approach was good before starting work
 - Soliciting feedback, will wait for feedback

2024-03-06:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Cedric Ziel**
- **Aditya Agrawal**

- **Agenda items**

- [BM] discuss <https://github.com/open-telemetry/opentelemetry-php/issues/1245> (moving config code into its own package). Breaking things with 7.4 desupport (and requiring betas for 1.1.0) could be a good time to do this?
Update: Nevey submitted a draft alternative, so let's give that some time

- [BM] given the very low usage of php 8.0 (1% reported on packagist, and likely much lower than that when accounting for CI/CD etc), how do we feel about dropping support along with 7.4? It's out of official support, so fits in with our versioning policy.
[AA] suggested not bumping auto-instrumentation version constraints, so that they continue to work with older SDK etc
- [AA] can we 1.0 contrib auto-instrumentation? We should wait for an upcoming draft PR for extension re: closing wrong context
- [CZ] Response Propagation RFC is open and looking for building consensus soon - <https://github.com/open-telemetry/opentelemetry-specification/pull/3825>

2024-02-28:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Ago Allikmaa**
- **Chris Lightfoot-Wild**
- **Aditya Agrawal**

- Agenda items
 - [AA] - doesn't create the span, the end handler will still try and close the scope. Even if the begin handler throws an exception the end handler will try and close (potentially the wrong thing)
 - We aren't sharing any kind of state between the beginning and ending handler
 - Idea: Save instrumentation name in scope as well
 - This will work unless you have nested instrumentation from the same library
 - Idea: Pass a scope between a beginning and ending handler
 - Not just the active scope, but the defined scope
 - No scope if there is an error
 - Would require the changing of the behavior of the begin handler
 - Begin handler has to provide scope somehow
 - Idea: begin handler throw exception but still created an active scope?
 - More of a runtime problem than a development time problem
 - Idea: pass the context from the pre to the post?
 - Make an issue to get feedback from the community
 - Jenky idea: need some sort of unique identifier from the beginning and end handler

- Spooky option: change the call frame modifying parameter values, add another field in the PHP frame for custom things
- [BS] - Log bridge help?
- [BM] - Removing 7.4 Support
- Discussed a generic PHP auto-instrumentation
 - Instrumentation based on what PHP provides?
- What should happen with the server spans?

2024-02-07:

Attendees:

- Agenda items
 - [Liudmila] Please advise what semconv codegen should generate in PHP:
<https://github.com/open-telemetry/semantic-conventions/issues/551>
 - i. How to group attributes (not by signal)
 - ii. Whether we need stable+preview semconv lib
 - iii. Please comment on the issue or in the otel-semantic-conventions-wg channel, thanks!
 - [BS] New PHP releases, deprecating old PHP releases
 - i. Keep support for old releases
 - People are using {very} old versions of PHP
 - Perhaps keep support for 1 year
 - Still thinking through this, would love other IC's opinions
 - Slack thread

- Open Bugs

- <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Agenda items
 - [BM] Tagged core repos as 1.0.0 (!!!)
 - [BM] left some issue notes over in <https://github.com/opentracing/opentracing-php> asking them to consider deprecation and suggesting us as an alternative (as other OT implementations have done). They have about as many installs/day as we currently do.
 - [BM] Tagged extension RC3 with an important bugfix from Ago Allikmaa
 - [BM] Proposed next steps:
 - i. extension to GA: accepted, BM will action this
 - ii. A couple of auto-instrumentation packages to GA
 - iii. Blog announcement

2023-10-18:

 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Agenda items
 - [Packagist installations](#) are on the increase (but unfortunately, 2x 0.* installs vs 1.*)
 - PM - Discussion in slack channel around debian packages
 - i. We don't need Debian to package it
 - ii. Alpine and Remi have picked it up, so it would be cool if we have a .deb as well. Not absolutely necessary
 - Welcome Ago from Splunk!
 - i. Questions for the team:
 - Autoinstrumentation module that tries to capture every incoming request? We have had discussions before but we haven't made progress in this context.
 - First things to look into - fork of datadog that Splunk uses internally - what autoinstrumentations we have
 - Composerless install? - not currently. The API and SDK are developed as composer packages

2023-09-27:

 - [ck.com/archives/C0402K3AW10](https://github.com/archives/C0402K3AW10)
 -

- Agenda Items
 - [PD] - Basic Symfony auto-instrumentation should work with Drupal?
 - i. We need to follow up with someone from the Symfony team to find the correct way to hook into Symfony
 - ii. What classes / interfaces do we need to hook into?
 - iii. Bob Strecansky will create an issue for this.
 - [BS] - ARM update - will update
 - [BM] - Is there anything else we can be doing to advertise the fact we are in beta?
 - i. PHP FIG Discord
 - ii. How do we evangelize?
 - iii. Create a generalized beta release post that is able to be shared
 - (Twitter, Reddit, et. al.)
 - iv. Bob Strecansky will write this post
 - [PD] - There is a library that can be used for building PHP extensions in C++

- i. Tried it, but it only supports PHP7
 - ii. Compilation problems; will be difficult with PHP8
 - iii. <https://www.php-cpp.com/>
 - iv. <https://zephir-lang.com/en> - still very alpha, a way to write an extension using PHP language syntax.
- [PD] - [Issue](#) regarding PHP data object support
- [EZ] - Questions
 - i. php-instrumentation, php-contrib, opentelemetry-php
- [ES] - Follow up question
 - i. Opentelemetry-php requires 7.4, opentelemetry-php-instrumentation requires 8.0
 - ii. Autoinstrumentation vs instrumentation discussion
 - Autoinstrumentation automatically makes calls to the API and SDK
- [AK] - What challenges are we facing currently for autoinstrumentation
 - i. Why are we looking to rewrite it? It would be simpler to write this extension in C++
 - ii. This library hides a lot of complexity we have in the Zend engine
 - iii. It is much harder to write in C
 - iv. C++ would invite more newcomers (you don't need to know all of the internals)
 - v. Extension is tested as a black box
-

[ck.com/archives/C0402K3AW10](https://github.com/archives/C0402K3AW10)

- Agenda Items
 - Required for beta

Git split for API / SDK choices:

1. Release API and SDK every time a change is made to either
 - Pros: keep version parity between API and SDK
 - Cons: API would be released even if no changes are made, we would have to make this become a manual process with packagist, just for the API.
 2. Release API and SDK separately
 - Pros: correct version number corresponding with API and SDK changes
 - Cons: huge jumps in API release numbers when we release new API versions (ex. Release 1.0, followed by 8 releases of the SDK, followed by a 9th release with an API change would make the API version jump from 1.0 -> 1.9.
-
- [BM] released 0.0.16 (with ~2 months worth of PRs)
 - We believe the notifications from the github repository to slack are becoming too noisy, we are going to move them to #otel-php-alerts

11/02/22:

 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>

- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- Auto-instrumentation
 - Documentation and build instructions PR submitted, should be easier to compile and use soon
 - Request submitted for new repo to hold auto-instrumentation extension
- Any blocker for beta release? Slack poll considerations:
 - Support for PHP 7.4 as its going [EOL for security support](#) on 11/28/2022
 - Metric SDK behavior with 7.4 and 8.x
 - API related issues: [#723](#) and [#795](#)
 - Remove default values from `TextMapPropagatorInterface``
-

9/07/22:

Attendees:

- **Brett McBride**
- **Przemek Delewski**
- **Tobias Bachert**
- **Kishan Sangani**
- **Bob Strecansky**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- Auto-instrumentation
 - Documentation and build instructions PR submitted, should be easier to compile and use soon
- Any blocker for beta release?
 - Slack poll on going to beta? BS to create poll
- [BM] exports + swoole context are now published to packagist and individually installable
- [KS] Difference between approvers on repo and [teams](#):
 - [otel-js](#) configure codeowners differently than [otel-php](#)

8/31/22:

Attendees:

- **Brett McBride**
- **Przemek Delewski**
- **Tobias Bachert**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] Any issue with instrumentation for php admin service in demo application?

8/24/22:

Attendees:

- **Ptah Dunbar**
- **Brett McBride**
- **Tobias Bachert**
- **Amber Khandelwal**
- **Przemek Delewski**
- **Kishan Sangani**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] PR Review: <https://github.com/open-telemetry/opentelemetry-php/pull/691>
 - How does user/dev install this extension?

- Purposer of extension is to "capabilities the the agent without having to create a separate distribution" as mentioned int the opentelemetry Java agent docs, [docs link](#), [example link](#)
- Should we provide the example for the same for OTel PHP?
- [KS] Issue <https://github.com/open-telemetry/opentelemetry-php/issues/574>
 - Are the examples asked in this issue done already?
- [PD] Automatic instrumentation - follow up
 - [KS] Exploring PHP-CPP and Zephir to develop extensions
- [BM + others] Can we set up a working group for those interested in auto-instrumentation? Do we need to agree on a single implementation? Where does it live (main? contrib?)
- [KS] Request for reviewer

8/17/22:

Attendees:

- **Bob Strecansky**
- **Ptah Dunbar**
- **Brett McBride**
- **Tobias Bachert**
- **Amber Khandelwal**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [BM] more code reviewers?
- [BM] PSR-22

8/10/22:

Attendees:

- **Bob Strecansky**
- **Sanket Mehta**
- **Brett McBride**
- **Tobias Bachert**
- **Kishan Sangani**
- **Amber Khandelwal**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- []

8/03/22:

Attendees:

- **Kishan Sangani**
- **Bob Strecansky**
- **Ajay Nagariya**
- **Tobias Bachert**
- **Brett McBride**
- **Amber Khandelwal**
- **Ptah Dunbar**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] - Auto-instrumentation
 - Presentation [link](#)

- Proposal #1: Change the language of implementation of OTel PHP SDK to C/C++
 - i. The project is already behind the other OTel agents/SDK and the # of active contributors is less, changing the language of implementation to C/C++ will raise the entry barrier
- Proposal #2: Implement instrumentation code/logic in C/C++, compile it to extension, and use it with OTel PHP SDK
 - i. Tobias has already done some experimentation and [PoC](#) around the same
 - ii. Tobias, Kishan, and Amber will sync up and make progress on that
- Discussion questions:
 - i. Support for other frameworks, both MVC and non-MVC
 - ii. Support for extensions

7/27/22:

Attendees:

- Kishan Sangani
- Sanket Mehta
- Tobias Bachert
- Ptah Dunbar
- Amber Khandelwal
- Ajay Nagariya

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] - Changes done for comments on [PR-691](#)
 - Unique issue with the code coverage(posted on the channel)
- [KS] - Auto-instrumentation
 - Support for framework okay, support for extensions?
- [SM] - <https://github.com/open-telemetry/opentelemetry-php/pull/677>
- [AK]- <https://github.com/open-telemetry/opentelemetry-php/pull/784>
- [PD] - Update the google calendar link on the [README.md](#) to reference the correct calendar link used in #otel-php (who owns this?)

7/20/22:

Attendees:

- **Bob Strecansky**
- **Kishan Sangani**
- **Amber Khandelwal**
- **Ajay Nagariya**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] - Propagators
 - Why singleton implementation for propagation? Difficult to unit test.
- [AK] - Iterators
 - Iterators may need to be changed:
<https://github.com/open-telemetry/opentelemetry-php/pull/783>
- [KS] - Auto-instrumentation for Beta?
 - Progress with Symfony framework and a couple of more MVC framework?

7/13/22:

Attendees:

- **Bob Strecansky**
- **Sanket Mehta**
- **Tobias Bachert**
- **Brett McBride**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs

- <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
-

7/6/22:

Attendees:

- **Bob Strecansky**
- **Sanket Mehta**
- **Tobias Bachert**
- **Brett McBride**
- **Amber Khandelwal**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- Symfony runtime error
 - Composer update 5 days ago caused this
 - PR coming up from Tobias
- Brett will work on event dispatcher this week
- Sankit's PR will be ready after the Symfony runtime error
- Bob will open a PR in CONTRIBUTING.md to document code coverage is okay
- 7 Issues open required for Beta
- Tobias created a draft PR for metrics :
 - <https://github.com/open-telemetry/opentelemetry-php/pull/750>
 - Bob is going to look into this

6/29/22:

Attendees:

- **Bob Strecansky**
- **Kishan Sangani**
- **Tobias Bachert**
- **Sanket Mehta**
- **Amber Khandelwal**
- **Timo**
- **Ajay Nagariya**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [KS] - PR for laravel and symfony documentation ready with DrLuke's changes
- [KS] - Blocked on the `parentSpanId` field in B3 single header propagator
- [AN] - Roadmap/list of Items for Beta release and projected timeline
- [AN] - Parity/feature gap with other otel lang agents (e.g Python)

6/22/22:

Attendees:

- **Brett McBride**
- **Timo**
- **Tobias Bachert**
- **Ajay Nagariya**
- **Sadik Shahidain**
- **Amber Khandelwal**
- **Sanket Mehta**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>

- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- AWS SDK instrumentation (Carol/Will?)
 - [Carol] Goal is to have an AwsSdkInstrumentor (or AwsSdkInstrumentation package) that can be used to instrument calls made to the AWS SDK (the end goal is for our customers to call AwsSdkInstrumentor.instrument(), for example). Is there any base instrumentation that has been implemented that we can build on top of? (Please see example in [python](#) or [js](#)) Would it be accepted in the php-contrib repo? (AWS SDK instr is hosted upstream in all other languages)
 - [Will] We are based on the west coast so not able to join the SIG, but was hoping to get answers to these questions to unblock us. No need to spend too much time during the SIG since we won't be there, but would love to set up a separate quick chat if they'd be best answered synchronously.
 - [AK] #704 queried requirements, BM to update ticket

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Kishan Sangani**
- **Timo**
- **Tobias Bachert**
- **Amber Khandelwal**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Required for Beta! :
<https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aissue+is%3Aopen+label%3Arelease%3Arequired-for-beta>
- [TM] - creating installer commands, nearly finished, PR coming
- [BS] - only 10 open issues for beta!
- [TM/BM] - will catch up and discuss configuration

6/8/22:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Amber Khandelwal**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [BS] - Backlog cleaned, beta tickets are prioritized [here](#)
- [BS] - [otel-profiles](#) has been opened
- [BS] - [opentelemetry-php for webstore](#)
- [BM] - [PSR-22](#) is getting a bit active!
- [AK] - Issue [704](#)

6/1/22:

Attendees:

- **Bob Strecansky**
- **Sanket Mehta**
- **Timo Michna**
- **Brett McBride**
- **Amber Khandelwal**
- **Ajay Nagariya**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [TM] - dev-tools: <https://github.com/opentelemetry-php/dev-tools>
- [BS] - [#otel-community-demo](#)

- [AN] - Introduction

5/25/22:

Attendees:

- **Bob Strecansky**
- **Timo Michna**
- **Sanket Mehta**
- **Kishan Sangani**
- **Amber Khandelwal**
- **Piyush Mundra**
- **Manasa HG**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [SM] - <https://github.com/open-telemetry/opentelemetry-php/pull/677>
 - A couple of other ideas for this - using fibers (8.0 required)
 - Retries should be configurable (0 by default)
 - Timo will explain more in the [ticket](#)
- [KS] - <https://github.com/open-telemetry/opentelemetry-php/pull/680>
 - Ready for review, Bob will review it today!
- [TM] - Package split
 - Split the repo into separate composer packages (published to packagist.org)
 - 6 or 7 for the main repo, 2 for the contrib-repo
 - <https://packagist.org/packages/open-telemetry/>
 - Still a WIP - will have to add some tests for validating the composer files are correct.
 - Bob will open a ticket for composer.json validation in CI.
 - i. Timo is going to create a devtools package for this

- ii. A wrapper with a Symfony command
- [BS] - Will publish 0.0.11 release today for opentelemetry-php and opentelemetry-php-contrib
 - Same version number on both the main and contrib repo in the future
 - Will release 1.0 for both at the same time.

5/18/22:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Timo Michna**
- **Kishan Sangani**
- **Amber Khandelwal**
- **Piyush Mundra**
- **Sanket Mehta**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [KS] - Status update on instrumentation with Symfony
- [TM] - Creating and splitting packages
- [BS] - Beta release talk
 - Work through the open issues with the tag [required-for-beta](#)
 - Get feedback from other SIG maintainers and the community
 - Follow with RC and GA releases
- [TM] - Configuration updates with Brett
- [TM] - Only depend on the API
 - We should look again at this to make sure the API is spec compliant
 - Noop something so the API can work without the SDK
 - A couple things that don't work as expected
 - Do not break if there is only the API!
- [TM] - Kishan with B3 propagator? Kishan is raising a PR
- [TM] - How do we update the documentation correctly? What are the success criteria for this documentation?
- [BM] - RoadRunner otel support released, works with php-opentelemetry

- [BM] - PSR-22 work continues

5/11/22:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Sanket Mehta**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [BS] - Follow up with Timo on : <https://github.com/open-telemetry/opentelemetry-php-contrib/pull/57>
- [BS] - concurrent context PR
- [SM] - <https://github.com/open-telemetry/opentelemetry-php/issues/328>

5/4/22:

Attendees:

- **Bob Strecansky**
- **Brett McBride**
- **Kishan Sangani**
- **Sanket Mehta**
- **Yukti**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [BS] - Doppler tokens

- [BS] - Beta release blockers?
- [KS] - Issue in instrumenting SDK in Symfony framework
- [BM] - Working group (Tracing OpenTelemetry PSR-22)
 - Discord:
 - <https://discord.com/channels/788815898948665366/966289619744325632>
- [BM] - RoadRunner is adding OpenTelemetry instrumentation
- [BS] - OpenTelemetry Community Demo Application [#otel-community-demo](#)

4/27/22:

Attendees:

- **Bob Strecansky**
- **Sanket Mehta**
- **Kishan Sangani**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- [BS] - New meeting time!
- [BS] - Kishan's Events and Listener PR
- [BS] - Brett's Protobuf fix will get merged today
- [BS] - Will release 0.0.10
- [KS] - Auto-instrumentation: how are we planning to do it(specific to Symfony)
 - Follow up with Timo

4/20/22:

Attendees:

- **Brett**
- **Yukti**
- **Bob**

Agenda:

- Open PRs

- <https://github.com/open-telemetry/opentelemetry-php/pulls>
- <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Let's move this meeting to 8AM EST so Brett
- Brett is going to pick up protobuf work
- Subtree split (follow up with Timo) - read only copy of our repository api/sdk/contrib so we can generate individual packages for packagist
 - We will discuss this in channel for Timo (he's created repo et. al.)
- Yukti - Identifying tests for compliance, annotating them.
 - Going to do this in a single PR.
 - Yukti's next task is going to be <https://github.com/open-telemetry/opentelemetry-php/issues/589>

4/14/22:

Attendees:

- **Brett**
- **Kishan**
- **Amber**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [KS] - Need help on issue [500](#) with B3 propagators
 - [AK] - Issue [632](#) will start soon
 - [BM] - Protobuf generation broken (missing image) - brett to raise issue
 - i. [660](#) created

3/30/22:

Attendees:

- Bob
- Brett
- Timo
- Kishan
- Sadik

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [BS] - 0.0.9 Release Today
 - [BS] - Changing the time for this meeting?

3/23/22:

Attendees:

- Timo
- Kishan
- Sadik
- Adam

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [KS] - Unable to relate SRP in issue [#621](#)

3/16/22:

Attendees:

- Bob
- Kishan
- Yukti
- Timo

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [BS] - Member group distinction for Kishan
 - [BS] - New tasks for Yukti
 - [BS] - Release next week (will release 0.0.7 for opentelemetry-php and 0.0.3 for opentelemetry-php-contrib to follow our monthly cadence)
 - i. Timo will make sure that this works by next week
 - [BS] - New time for our meeting?
 - i. I'll make a note in our channel to discuss this.
 - [TM] - E2E testing
 - [TM] - B3 Propagator
 - i. <https://github.com/open-telemetry/opentelemetry-php/issues/500>
 - ii. B3 is a protocol (which has been used by zipkin and jaeger in the past, does the same as the W3C propagation mechanisms)
 - iii. Two Propagator implementations. One for B3 [Single Headers](#), one for B3 [Multiple Headers](#).

3/9/22:

Attendees:

- Bob
- Timo

- **Brett**
- **Kumar**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [BS] - Yukti is starting as our mentee for spring
 - i. Work for her to do?
 - Check compliance matrix
 - Integration tests / End-to-end test for compliance matrix things
 - Perhaps <https://codeception.com/>
 - Documentation for the opentelemetry.io website
 - [BS] - Kishan
 - i. <https://github.com/open-telemetry/community/issues/996>
 - [TM] - Assignments
 - i. [B3 Propagator](#) - started on this, but will unassign himself from it
 - ii. Brett - <https://github.com/open-telemetry/opentelemetry-php/issues/552>
 - Will work on this

3/2/22:

Attendees:

- **Brett**
- **Kishan**
- **Timo**
- **Sadik**
- **Kumar**
- **Bob**

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>

- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>

- Open Discussions
 - [TM] - Logging issue
 - i. GlobalLoggerHolder
 - ii. Symfony bundle
 - iii. Demo - resembles real world scenarios
 - iv. Getting the logger into the SDK is nearly impossible because most frameworks come with loggers out of the box
 - Implemented with dependency injection
 - Use DI wherever you need the logger
 - No object can be created in the GlobalLoggerHolder
 - DI must have a dependency on the GlobalLoggerHolder
 - You'd need to artificially create this dependency (won't be automatically injected)
 - The Symfony SDK bundle doesn't have a real way to do this
 - No real way to get the logger from the framework in the SDK
 - We can solve this by making the GlobalLoggerHolder a singleton
 - [TM] - Next release will have all the "magic" in place I promised :)
 - [TM] - Remove the Github action associated with the documentation building
 - i. All of our documentation should now go to opentelemetry.io
 - [BS] - Access control discussion is happening in #otel-maintainers
 - i. <https://cloud-native.slack.com/archives/C01NJ7V1KRC/p1646067521976299>
 - [TM] - merged the changes in the CONTRIBUTORS.md
 - [SS] - very close to thrift support

2/23/22:

Attendees:

- Brett
- Kishan
- Timo

Agenda:

- Open PRs

- <https://github.com/open-telemetry/opentelemetry-php/pulls>
- <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - Brett and Timo will pick up the configuration tasks(s) again, to work on them
 - We want to run the tests of the contrib repo on PRs in the main repo to find issues earlier. This can be set up with e2e tests.
 - Possible changes to stale bot config (exclude “help-wanted” issues, pin other issues with “pinned” label)
 -

Open Discussions

2/16/22:

Attendees:

- Kumar
- Brett
- Sadik
- Timo
- Amber
- Michal
- Kishan

Agenda:

- Interns
- Scraggler PR closer
 - <https://github.com/apps/stale>
- Release 0.0.6 release coming soon (monthly cadence)
-
- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>

- i. <https://github.com/open-telemetry/opentelemetry-php/pull/563>
 - o <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>

 - o

2/2/22:

Attendees:

- Bob
- Brett
- Timo

- Kishan
- Kumar

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [BS] Tracing project board:
<https://github.com/open-telemetry/opentelemetry-php/projects/1>
 - [TM] k3s discussion
 - [TM] issues in the contrib repo
 - Discussions feature in Github
 - i. Going to use it for now
 - Protobuf commit almost done:
<https://github.com/protocolbuffers/protobuf/pull/9370>

1/26/22:

Attendees:

- Timo
- Bob
- Brett
- Sadik

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>

- Open Discussions
 - Open PR from Sadik
 - Timo is working on server stuff
 - Don't use Yoda conditions (`null === $value`)

1/19/22:

Attendees:

- Timo
- Bob
- Kumar Pratyush
- Brett

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - 0.0.5 release today
 - i. Releasing once per month
 - PHP 7.4
 - i. Use rektor eventually to downgrade 8.x releases and keep a branch.
 - K8s updates
 - i. Using temporal for testing.
 - ii. Using the second half of next meeting for this (not recorded for security sake)
 - First time creating an issue
 - i. Github action
 - Protobufs!
 - i. 8.1 is failing with the protobuf extension
 - ii. Brett has a PR open for this
 - iii. Bob will bump with Google
 - iv.

1/12/22:

Attendees:

-

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions
 - [Sadik] - What to do with the dead code?
 - i. This seems okay with me :
<https://github.com/open-telemetry/opentelemetry-php/pull/545#issuecomment-1010567210>
 - ii. Brett was able to try out the branch functionality
 - iii. Let us know when you are ready to have this merged.
 - iv. Next - getting the file with the commented out code up to spec compliance. Will use other languages for a comparison.
 - After this we should only need 1 or 2 PRs for HTTP support (using Timo's generic way to make a HTTP reporter.
 - Once this is merged, Tydal mentioned he wanted to extract the Thrift and Protobuf pieces (potentially into another repository) so that it'll get auto updates with new packages being published.
 - [Kishan] - Scope of issue #[225](#)
 - i. [User research document](#): things could have changed / outdated
 - Spec may have changed
 - We should follow the spec rather than the things in this ticket (as this ticket was created a very long time ago.
 - Tydal has some auto-instrumentation tinkering in the works
 - He will publish once it's a bit more flushed out.
 - Creating an extension (monkey patching other libraries so we don't have to create a complicated solution for auto instrumentation)

- [Pratyush] - Issue #[298](#) - Redundant/Non-redundant after PR merge of logging API
 - i. Started working on the API part
 - ii. We merged the logging API 2 weeks back
 - iii. What extra metrics or information do we want to gain from the runtime that will be missing in the logging API and included in the event handling API?
 - The specification is not very verbose on what needs to be handled here
 - The logging API and the event handling API may become redundant?
 - We should use the tools we have to get metrics from the library
 - This is a rather complicated issue, it's not really clear
 - Feedback loops could be created
 - We can try a couple things and see how it works out
- [Timo]
 - i. [K3s](#) setup
 - Basic k3s setup is done and can be recreated with a script
 - Some gotchas
 - Aiming to use [Linkerd](#) (service mesh)
 - [Traefik](#) as the ingress controller
 - Very complicated to get this working (needed to use Calico)
 - They didn't work very well together
 - [Istio](#) for service mesh attempt
 - Working towards connecting another k3s worker to the master (main) node
 - Once Timo is completed, we can set up a meeting to present how all of these things work together

1/5/22:

Attendees:

- Bob
- Tydal
- Kishan Sangani
- Kumar Pratyush
- Sadik Shahidain

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>

- <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 - [BS] - Next priorities
 - i. Working towards a stable release
 - ii. Overhaul of the exporters (unified)
 - Parts that are different are abstracted out
 - iii. Generic gRPC client and HTTP client
 - A lot of work on the exporters
 - They aren't abstracted enough! :)
 - iv. Requirements for beta release: [Link](#)
 - v. NOTE: Go over the user research tickets in the next SIG meeting
 - vi. [User research document](#): things could have changed / outdated
 - Spec may have changed
 - vii. Beta release is the next step
 - viii. Configuration is important (follow up with Brett)
 - [TM] - Package distribution
 - i. Separate organization: <https://github.com/otel-php>
 - ii. If you have questions, please ask Timo!
 - iii. We will present how this works in a future SIG meeting; it's easier to present when it's working as intended.
 - [BS] - k3s on equinix metal
 - i. Received resources from equinix metal!
 - ii. Asked for 3 servers (we can get more if need be)
 - iii. Setting up service on these hosts
 - iv. Consulted with Brett & Bob
 - We decided on k3s for now for simplicity
 - Setup in process (networking, et. al.)
 - v. Guide for k3s on equinix metal: <https://metal.equinix.com/developers/guides/k3s/>
 - vi. ArgoCD for deployment - <https://argo-cd.readthedocs.io/en/stable/>
 - vii. Up and running hopefully this week!
 - viii. Performance / end-to-end tests / demo website.
 - Verify things are working as expected
 - [TM] - Semantic Conventions
 - i. Can't remember what he meant!
 - [TM] - PHPStorm
 - i. We have 3 licenses from JetBrains (from CNCF)
 - ii. If you'd like a license, we can hand them out

- [BS] - Doppler for secrets
 - i. We are going to use for now to manage secrets until we have access for our bare metal assets
 - ii. We can add more users if need be - please ping if need be.
 - iii. Timo can send an affiliate link if we need more -> \$100
- [SS] - Working on revamping this [PR](#)
 - i. Goal is to be able to revamp the Jaeger support
 - ii. Back of mind - I don't really yet know how to functionally test this
 - iii. <https://codeception.com/> could help us out here
- [TM] - Changed how the protobuf is created
 - i. Before it was updated upstream and pulled down
 - ii. Changed to use the `last` tag
 - iii. Automate the creation of these packages?

12/29/21:

Attendees:

- Tydal

12/22/21:

Attendees:

- Sadik
- Tydal

Agenda:

- Open Discussions:
 - Organizing thrift and grpc code
 - Exporter refactoring

12/15/21:

Attendees:

- Bob
- Tydal
- Kishan
- Kumar
- Brett

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 - [BM] Logging: global vs LoggerAwareTrait
 - [TM] Okteto
 - [TM] PHP 8.1 compatibility: [PR](#)
 - [TM] Missing retries on exporter errors: [Issue](#)
 - [BS] Secrets for repo
 - [BS] Packagist next steps
 - Set up a webhook
 - 1 secret for this to work
 - [BS] Out of office for the year
 - [TM] git splits (packages), automation, etc.
 - [TM] adding new thrift/grpc generated code

12/8/21:

Attendees:

- Bob
- Tydal
- Sadik
- Kumar
- Brett

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 - “Instrumentation library” to “instrumentation scope” question: <https://github.com/open-telemetry/opentelemetry-php/issues/504>
 - Submit a CODEOWNERS PR - remove Benjamin... Brett to submit PR
 - Discussed 0.4 release - we should do one really soon

- Packagist access is waiting on a PR, Bob to follow up on this + secrets in repo (for subtree splitting)
- Don't forget to create issues for things that you want to work on, tag for new starters looking for work
- Should we use github community/discussions feature?
- Php-cs-fixer still not updated for 8.1, which is holding us back on 8.1 builds

12/1/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Brett McBride (Deakin) brettmc on github
- Timo Michna () tidal on github
- Kishan Sangani kishansangani on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 - Project maintainers
 - Visibility of work-in-progress (resurrect project boards?)
 - SpanProcessor env var removal?
<https://github.com/open-telemetry/opentelemetry-php/pull/496>
 - Alpine-based docker image
<https://github.com/open-telemetry/opentelemetry-php/pull/487>
 - Make grpc extension optional
 - Publishing separate composer packages for contrib/sdk components
 - Update documentation/readme
 - How to do logging?
<https://github.com/open-telemetry/opentelemetry-php/pull/495>

10/13/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:

10/6/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 -

9/29/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:
 - Getting started documentation.
 - Implementing a console exporter for said documentation
 - Span refactoring

9/1/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>

- Open Discussions:
 - Cut 0.0.3 release this week with all of our new changes
 - For beta and for GA issue tags

8/25/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:

7/21/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/pulls>
- Open Bugs

- <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - <https://github.com/open-telemetry/opentelemetry-php-contrib/issues>
- Open Discussions:

7/21/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Oliver Hamuy, olihamuy@amazon.com, ohamuy on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - i. <https://github.com/open-telemetry/opentelemetry-php/pull/352> Sean's OTLP PR , a few more fixes to go in, needs some reviewers, almost ready.
 - Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Discussions:

7/14/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Oliver Hamuy, olihamuy@amazon.com, ohamuy on github

- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - i. <https://github.com/open-telemetry/opentelemetry-php/pull/352> Sean's OTLP PR , a few more fixes to go in, needs some reviewers, almost ready.
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Discussions:

6/23/21:

Attendees:

- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Oliver Hamuy, olihamuy@amazon.com, ohamuy on github
- Sean Hood, seanhood on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
 - i. <https://github.com/open-telemetry/opentelemetry-php/pull/352> Sean's OTLP PR , a few more fixes to go in, needs some reviewers, almost ready.
 - ii.
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Discussions:
 - For the contrib repo, we need to decide a folder structure for when we migrate everything over. Currently it's setup where each service has it's folders. Other repos have detectors/exporters separate.
 - i. Proposal File Design:

- detectors
 - aws
 - gcp
 - Etc....
- Propagators
 - jaeger
 - aws
 - etc...
- Exporters
 - cortex
 - aws
 - etc...
- packages (alternative: instrumentation)
- examples
- Tests
 - unit
 - Aws
 - jaeger
 - Newrelic
 - integration
- How will the core repo dependency be handled?? Open question for discussion next week.

6/16/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Oliver Hamuy, olihamuy@amazon.com, ohamuy on github
- Alolita Sharma
- Tobias Bachert

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Discussions:

- [Nevay] - API as a decoupled dependency:
<https://github.com/open-telemetry/opentelemetry-php/issues/356>
- Oliver's Design Proposal:
<https://docs.google.com/document/d/1qSL7dD8GjGG1WTuVhQ3N0GTix5AZhFfOYQMnH1loYC4/edit#>

6/9/21:

- <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Discussions
 - OTLP exporter work to do?
 - New release this week
 - SpanContext -> Baggage change
 - PSR Improvements

5/5/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Sean Hood, seanhood on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
 - This [bug](#) came up yesterday. Fahmy should have a PR up for it today.
- Open Questions
- Issue creation
 - Sean put a good list of remaining [todos](#) for the otlpExporter, we can make issues of each of them.

4/21/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Questions

4/14/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Questions
 - [BS] - Integration guides
 - [BS] - W3c trace context service
 - [BS] - OTLP/gRPC exporter
 - [BS] - UDP & Thrift
 - [BS] - Events tagging

4/7/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Questions

3/31/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Sean Hood, seanhood on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Questions
 - [BS] - Website-docs
 - [BS] - OTLP/GRPC (Sean)
 - i. Getting closer. 90% feature complete but not fully tested nor tests written

- ii. Code and commit cleanup required before merge
- o [BS] - W3C test service (Fahmy)
 - i. PR is almost ready. Mounted directory with local repo changes for the test service to use is now added. All that's left is a bit of cleanup and adding Psalm suppressions so the GH actions run through without failure.
- o [BS] - Other exporters?

3/24/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Sean Hood, seanhood on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- Open PRs
 - o <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Bugs
 - o <https://github.com/open-telemetry/opentelemetry-php/issues?q=is%3Aopen+is%3Aissue+label%3Abug>
- Open Questions
 - o [BS] - Website-docs
 - o [BS] - OTLP/GRPC (Sean)
 - o [BS] - W3C test service (Fahmy)
 - i. PR is almost ready. Need to add mounted directory with local repo changes for the test service to use. Also need to add Psalm suppressions so the GH actions run through.
 - o [BS] - Other exporters?

3/17/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

- Sean Hood, seanhood on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Questions
 - [BS] - Website-docs
 - [BS] - OTLP/GRPC

3/10/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Jodee Varney (New Relic) jvarney@newrelic.com jodeev on github
- Onyemenam Ndubuisi (Intern)

Agenda:

- Open PRs
 - <https://github.com/open-telemetry/opentelemetry-php/pulls>
- Open Questions
 - The following issue is completed and can be marked done/closed: <https://github.com/open-telemetry/opentelemetry-php/issues/238>
- Thoughts on <https://github.com/open-telemetry/opentelemetry-php/pull/264>?
- Merged <https://github.com/open-telemetry/opentelemetry-php/pull/277>
- Merged <https://github.com/open-telemetry/opentelemetry-php/pull/275>
 - Contrib reproducibility? DRY? 😞

3/3/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Onyemenam Ndubuisi (Intern)
- Dave Nielsen (Traceable.ai) dave.nielsen@hypertrace.org, dnielsen on github

Agenda:

- Open PRs
- Open Questions
 - From Dave (has user with 25+ services they want to instrument)
 - What's the current ETA? Answer: ~ 6 months or more
 - What's the best approach if I want to get started now? Answer: Use open census and otel collector
 - What PHP version is currently supported Answer: v7.3 or later (v7.3 is required by HR time package)
 - What else should I know? Answer: Contributions are welcome. There are ~ 30 open issues

2/24/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Jodee Varney (New Relic) jvarney@newrelic.com jodeev on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- Transition to slack
 - Bob will post instructions on how to get to the CNCF slack and mention that is where we are going to communicate from now on.
- Ticket prioritization

- Spec freeze
- GA
- Internship opportunity
- Jaeger agent UDP support
- [Feedback](#) → need tickets

2/17/21:

Attendees:

- Amber Sistla (New Relic) asistla@newrelic.com, zsisla on github

Agenda:

- Please assign <https://github.com/open-telemetry/opentelemetry-php/issues/238> to Amber.
- <https://github.com/open-telemetry/opentelemetry-php/issues/241> is closed but still in ToDo column

2/10/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- User Research blog post
- Open issues
- New upcoming work
- Internship link for Fahmy

- Dev mode priority vs new functionality

2/3/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

1. PHP 8.0 / Thrift
 - a. <https://www.php.net/supported-versions.php>
 - b. PHP8 compliance : <https://github.com/apache/thrift/pull/2288>
 - c. Going to put php8.0 CI on hold and make default dependency be 7.4
2. Approver requests - <https://github.com/open-telemetry/community/issues/360>
3. Internship opportunity
4. Languishing issue

1/20/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- 1) Parent Based spans for remote requests
- 2) Approver roles for Amber and Fahmy :
<https://github.com/open-telemetry/community/issues/360>
- 3) PHP 8.0
- 4) Testing service being worked on

1/6/21:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Jodee Varney (New Relic) jvarney@newrelic.com jodeev on github
-

Agenda:

- 5) Semantic Versioning
 - a) <https://github.com/open-telemetry/opentelemetry-php/pull/232>
- 6) Open items
- 7) Next direction

12/16/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Benjamin Calota
- Amber Sistla
- Ritick Singh

Agenda:

- 8) PHP8 Compatibility
- 9) Semantic Versioning
- 10) Holiday meetings? Cancel 12/23 and 12/30

12/9/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Jodee Varney (New Relic) jvarney@newrelic.com jodeev on github

Agenda:

- 11) Bob worked with one of the other maintainers yesterday to talk about semantic versioning for OpenTelemetry-PHP. Would love some feedback on it!

https://docs.google.com/document/d/1qJn8LnCyI1oYAev6dTShC_lcdl1lnQf8jXl8f5qPGfg/edit?usp=sharing

- 12) Projects boards: <https://github.com/open-telemetry/opentelemetry-php/projects>

11/11/20:

Attendees:

-
- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- [tedsuo in absentia] User Research / Dogfooding Guide
 - https://docs.google.com/document/d/1rXT2eEAniVM7r8KiikzgJJ-r36shOg_twZP6GPzNvao/edit
 - Now that the tracing spec is stable, we want to ensure the getting started experience for new users is clear and understandable. I've created a user research exercise that walks through the basic operations an end user must understand in order to use OpenTelemetry tracing.
 - When PHP tracing is ready for user feedback:
 - Add PHP to the list of languages in the user research guide
 - Please run through the user research exercise, in order to identify where we need to improve the experience. 🙏🙏🙏
 - Please recruit 1 - 2 people each (perhaps from where you work) to also try the exercise. 🙏🙏🙏

- Completed studies can be submitted here: <https://forms.gle/VrrPnCKpMcL2mBQ6A>
- W3C spec compliance test service: <https://github.com/w3c/trace-context/tree/master/test>

11/4/20:

Agenda:

- [tedsuo in absentia] User Research / Dogfooding Guide
 - https://docs.google.com/document/d/1rXT2eEAniVM7r8KiikzgJJ-r36shOg_twZP6GPzNvao/edit

10/28/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
-

Agenda:

1. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
2. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

10/21/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

3. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
4. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

10/14/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github
-

Agenda:

5. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
6. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

10/7/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github

- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

7. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
8. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
- 9.

9/30/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Ndubuisi Onyemenam onyemenamndu@gmail.com prondubuisi on github

Agenda:

10. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
11. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

9/23/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Ndubuisi Onyemenam onyemnenamndu@gmail.com prondubuisi on github

Agenda:

12. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
13. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
14. During today's meeting, we are going to be talking through a couple things:
 - 1) Current works in progress
 - 2) The [Spec Compliance Matrix](#)
 - 3) The new [Tracing](#) and [Metrics](#) boards

4) Our first alpha release?!

9/16/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github

Agenda:

15. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
16. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

9/9/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github

Agenda:

17. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
18. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

9/2/20:

Attendees:

- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github

- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Notes:

- Reviewed open items in [compliance matrix](#): w3c trace context, create with explicit parent spancontext, span exceptions. Interest in creating an issue to track all of this work, starting with w3c trace context. See discussion in gitter.

8/26/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Kyle Kneitingner (New Relic) kkneitingner@newrelic.com, kkneitingner on github

Agenda:

19. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
20. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

8/19/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

21. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
22. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

8/12/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisstla on github
- Jodee Varney (New Relic) jvarney@newrelic.com, jodeev on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

23. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
24. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
25. Metrics PR Merged!
26. Amber's PRs to be merged
27. Fahmy's PR to be merged
28. PHPUnit PR
29. Making exporting more implicit

8/5/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisstla on github
- Jodee Varney (New Relic)

Agenda:

30. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
31. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

7/29/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github
- Artem Prozorov

Agenda:

- 32. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 33. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

7/22/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github

Agenda:

- 34. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 35. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Notes:

- Merged PRs:
 - <https://github.com/open-telemetry/opentelemetry-php/pull/154>
 - <https://github.com/open-telemetry/opentelemetry-php/pull/152>
 - <https://github.com/open-telemetry/opentelemetry-php/pull/150>
 - <https://github.com/open-telemetry/opentelemetry-php/pull/149>

-

7/15/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Kyle Kneitingner (New Relic) kkneitingner@newrelic.com, kkneitingner on github

Agenda:

- 36. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 37. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Notes:

- Merged PRs:
 - replaceAttributes should only accept Attributes:
<https://github.com/open-telemetry/opentelemetry-php/pull/147>
 - setSpanKind implementation:
<https://github.com/open-telemetry/opentelemetry-php/pull/146>
 - Only sampled spans should be exported:
<https://github.com/open-telemetry/opentelemetry-php/pull/145>
- Fahmy mentioned to expect a metric PR in a couple days
- New Relic people planning to be more involved (becoming the priority)

7/8/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- 38. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 39. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Notes:

- Added some new tickets around GA
- Correlation context PRs are going to get merged
-
- Fahmy is working on the Meter Interface, will have more updates next week

7/1/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Kyle Kneitingner (New Relic) kneitingner@newrelic.com, kneitingner on github
- Ted Young (Lightstep) tedsuo

Agenda:

40. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

41. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Notes:

- [ted] GA requirements
 - Request: please use “release:required-for-ga” to help track GA issues and PRs
 - GA is getting put together in maintainers meeting
 - <https://docs.google.com/document/d/1-tGqaT9fn9Bpuy4roLS1YDfLzIWHodUFfyrBlyJVz9g/edit#>
 - Meets monday at 9am pacific, everyone is welcome to participate
 - GA Spec Project Board (spec/oteps):
 - <https://github.com/orgs/open-telemetry/projects/4>
 - GA Planning Sheet:
 - <https://docs.google.com/spreadsheets/d/1Hhw26JzUldj9OhsAaEWM50q-3L8qIBdo6M6R3W4nNeM/>
- [ted] Community Issue: Let's add a Triager role so that community members can help manage the backlog.
 - <https://github.com/open-telemetry/community/pull/357>
- [BS] Context and CorrelationContext PR is open:
<https://github.com/open-telemetry/opentelemetry-php/pull/132>
- [BS] Upgraded Phan

- [BS] Audit for the Tracing spec this week
- [ted] Looking for champions for OTel GA requirements. Maintainer's meeting occurs on Mondays at 9am PST and is open to all.
 - Looking to add a label to each backlog along the lines of ga-requirement to track pending criteria
 - Potential target date: Kubecon NA
 - Possible need for redefinition of API stability. Currently refers to release as a whole meeting 1.0 spec, but granularity of components could be useful (e.g. Tracing vs. Metrics vs. Logging)
 - Opportunity to work on defining that schema if interested
- [FM] - Questions about the metrics API
 - Fahmy started work yesterday on [113: Implement a Meter Interface](#)
 - Question about assigning issues: "How do we indicate we're working on them?"
 - Ideally assign issue to self, but Fahmy was unable to
 - Ted advocating for 'triager' role to complement maintainer/approver roles

6/17/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github
- Kyle Kneitingner (New Relic) kkneitingner@newrelic.com, kneitingner on github

Agenda:

- 42. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 43. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Notes:

- Michael and Bob are working on the CorrelationContext implementation:
 - Michael mentioned in channel:

```
@bobstrecansky and I have continued working on the draft PR for the CorrelationContext and ran into some hurdles particularly when it comes to method signatures, php's type system and the inability to true straight forward
```

object conversion from one user-defined class type to another user-defined class type or method overloading... all that to say, its looking like the Context implementation will need to be converted to a trait. That will happen soon and the draft CorrelationContext will be re-written on top of that

- PRs for repo rescoping from Benjamin has been merged in.
- Test fixes from both Benjamin and Michael have been merged in.
- NewRelic just finished a large milestone at work
 - Kyle took a peek at the gauge API
 - Compared it across languages
 - Getting in a good position for contributing
 - Kyle would like to (as an internal team) talk through how to divvy that work and allot some time to it!
- Changelog of the specification versions
 - This is difficult to determine what is implemented and what is not implemented.
 - Spec audit for the current tracing implementation - Bob
 - Find any discrepancies between the current implementation and the latest version of the spec
 - Real world implementation tests - Benjamin
 - He is going to try on a microservices on some of his k8s resources to find any glaring bugs.

6/10/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Michael Orr (Mailchimp) michaelorr on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsistla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

44. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
45. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
46. Merged in Context PR
 - If we want to separate it to its own package later, we can
 - Not super important right now.
47. Michael is planning on starting to work on the correlation context bits sooner or later
48. The New Relic team is planning on looking at the Metrics API bits

- Milestone here: <https://github.com/open-telemetry/opentelemetry-php/milestone/5>
- 49.

6/3/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Michael Orr (Mailchimp) michaelorr on github
- Kyle Kneitingner (New Relic) kkneitingner@newrelic.com, kneitingner on github
- Amber Sistla (New Relic) asistla@newrelic.com, zsisitla on github
- Fahmy Mohammed (New Relic) fmohammed@newrelic.com, Fahmy-Mohammed on github

Agenda:

- 50. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- 51. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
- 52. Data structure for the context
 - Update?
 - [Michael's draft PR on personal fork](#)
- 53. More tickets
- 54. Library implementation
 - Amber has been working on autoinstrumenting things
 - Wrapping around PHP layers
 - Wordpress
 - Laravel
 - Symphony
 - Presence of specific files to determine frameworks
 - Plenty of different ways to detect frameworks
 - Dicey! : We'd like to do differences between different framework versions
 - CONSTs - Monolog API version
 - Laravel & Others have CONSTs
 - Possibility of contributing metric reporting mechanisms to upstream projects
 - Python goal to instrument pyramid? Flask?
 - What frameworks might we want to instrument? (Future discussion?)
- 55. Code of conduct?
 - We should implement one if one hasn't been globally implemented - opened PR [here](#)
- 56. Current project status in README?
 - Breakdown of features/high-level implementation status indicated by red checkmark, green checkmark, yellow checkmark etc. - opened ticket [here](#)

57. Context addition

- OTEP is well thought out
- Spec is extremely hand wavy
 - Clarification on OTEP -> Spec

58. NewRelic Team is going to start taking a look into Correlation Context and use Bob's PR as a springboard: <https://github.com/open-telemetry/opentelemetry-php/pull/95>

59. Bob Will create tickets for the Metrics API and SDK

1/8/20:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Aust

Agenda:

60. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

61. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

62. <https://github.com/open-telemetry/opentelemetry-specification/blob/master/README.md>

Notes:

- Scrutinizer was installed waiting on approval
- Tracer factory was instantiated
- Next steps are to integrate with zipkin so we can see end to end traces
- Need to create more tickets in order to have smaller, more consumable chunks of work for new contributors.
- Metrics API / SDK need to be started, would like for someone to pick these up.
- Metrics & Context Propagation
 - Ted has a big open PR in context propagation
 - <https://github.com/open-telemetry/oteps/pull/66>
 - Josh has a couple PRs open for metrics, spec describes the go prototypes
 - Spec: <https://github.com/open-telemetry/opentelemetry-specification/pull/347>
 - SDK (old): <https://github.com/open-telemetry/opentelemetry-go/pull/172>
 - Aggregation (new): <https://github.com/open-telemetry/opentelemetry-go/pull/265>

- Aggregation side of metrics needs to be nailed down.
- Austin is going to look at the zipkin exporters for opencensus
- Most useful integrations
 - Laravel
 - Guzzle
- How does context propagation work in OpenCensus?

12/11/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github

Agenda:

63. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
64. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>
65. [AS] - Review Spec updates and change PHP accordingly.
66. Tracer workflow questions about spec:
 - Clarify what is meant by “crossing process boundaries”
 - Why does “SpanContext” data need to be separated from a “Span”
 - “When creating a new Span, the Tracer MUST allow the caller to specify the new Span's parent in the form of a Span or SpanContext. “
 - In what situation would only SpanContext be available without a Span, and why would you intend to create a new Span via tracer with it?
67. Is there/come up with a workflow diagram for implementation of Tracer -> Span/SpanContext -> Export (including links/propagators/factories that we haven't covered)

Spec Link:

<https://github.com/open-telemetry/opentelemetry-specification/blob/master/README.md>

12/04/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Austin Schoen (Mailchimp)
- Levi Morrison (Datadog)

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

68. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

69. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pulls>

Spec Link:

<https://github.com/open-telemetry/opentelemetry-specification/blob/master/README.md>

Todo:

- What are links?
- What is the state of the exporter?
- Bits of the spec that we aren't familiar with?
-

1:50PM - 2:20PM EST: Ownership discussion

11/27/19: NO MEETING

11/20/19: NO MEETING

11/13/19: NO MEETING

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

70. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

71. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pull/20>

1:50PM - 2:20PM EST: Ownership discussion

11/6/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Ted Young (LightStep)
- Chris Kleinknecht (Google)

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

72. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

73. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pull/20>

1:50PM - 2:20PM EST: Ownership discussion

Notes:

- CNCF CLA: <https://identity.linuxfoundation.org/projects/cncf>
- Follow up with Sergey about adding contributors / maintainers / approvers
- Talking through the metrics API and SDK
- Initial PR merged!
- Bob is working on sampling
- Levi looking at metrics, but been busy
 - Can review tracing, but might not have time to drive the Metrics API
- Levi hit a snag with the CLA
 - Will make a small PR to get a commit in and re-sign
- Next Steps
 - Get context propagation working
 - Get a working exporter
 - Then we will have a basic, end-to-end tracing system
- Which exporter should we write?
 - gRPC in PHP is terrible
- Object creation in PHP is very heavyweight
 - DataDog tries to push a lot of work down into C++
 - Tries to minimize object creation
 - <https://github.com/DataDog/dd-trace-php>
 - Not clear how to follow the spec and avoid overhead
- Order of operations for new tasks
 - Finish Sampler work
 - Exporter (to Jager / Zipkin)
 - Context Propagation
 -

10/30/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Austin Schoen (Mailchimp)
- Levi Morrison (Datadog)
- Sammy Powers (Datadog)
- Ted Young (Lightstep)
- Emmanuel Odeke (Orijtech)
- Chris Kleinknecht (Google)

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

74. Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>

75. Pull Requests: <https://github.com/open-telemetry/opentelemetry-php/pull/20>

1:50PM - 2:20PM EST: Ownership discussion

Notes:

- CNCF CLA: <https://identity.linuxfoundation.org/projects/cncf>
- Follow up with Sergey about adding contributors / maintainers / approvers
- Talking through the metrics API and SDK

10/23/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
-

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

- CLA check in with Ted
- First PR almost there; just some CLA signing to be waiting on.
 - <https://github.com/open-telemetry/opentelemetry-php/pull/18>
- Levi Introduction
 - PHP contributor
 - Datadog PHP implementation
- Bob has worked on the sampling spike
 - https://github.com/open-telemetry/opentelemetry-php/compare/sampling_spike?expand=1
- Levi may be able to take a look into the metrics API:
 - <https://github.com/open-telemetry/opentelemetry-php/issues/15>
- Dmitry is going to look into the distributed context specification:
 - <https://github.com/open-telemetry/opentelemetry-specification/blob/master/specification/api-distributedcontext.md>
- Gitter.im for communication: <https://gitter.im/open-telemetry/opentelemetry-php>
- Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- Open PRs: <https://github.com/open-telemetry/opentelemetry-php/pulls>

1:50PM - 2:30PM EST: Future steps

10/16/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Ted Young (LightStep)
- Austin Schoen (Mailchimp) austin.schoen@mailchimp.com, austinschoen on github
- Emmanuel Odeke (Orijtech) emmanuel@orijtech.com, odeke-em on Github

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

- First PR almost there; just some CLA signing to be waiting on.
- Bob is planning on working on the sampler after Dmitry's PR is merged.
- We can continue to work through the API and the SDK after ^ is completed.
- PHP was added to the product status page
- Custom issue template was created
- Backlog is filled
- Gitter.im for communication: <https://gitter.im/open-telemetry/opentelemetry-php>
-
- Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- Open PRs: <https://github.com/open-telemetry/opentelemetry-php/pulls>

1:50PM - 2:30PM EST: Future steps

10/9/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Ted Young (LightStep)

- Chris Kleinknecht (Google)

Agenda:

1:30PM - 1:35PM EST : Meeting inflow

- Howdy everyone

1:35PM - 1:50PM EST: Current tickets and flow

- Open Issues: <https://github.com/open-telemetry/opentelemetry-php/issues>
- Open PRs: <https://github.com/open-telemetry/opentelemetry-php/issues>
-

1:50PM - 2:20PM EST: Ownership discussion

- Bob and Dmitry - maintainers
- Brian - approver
- Getting Dmitry's PRs moved into OpenTelemetry will require a little thought.
- Performing TDD will be helpful for new feature implementation.
- Need additional maintainers, Bob was unable to create PRs and merge them because he was the only person doing so :)
- Org wide reviewer policy.
- Don't blindly repeat painful things!
- Need to find some external contributors for php-telemetry
- Following up in the #php room in IRC to see if we can find anyone else
- Following up with other php'ers we know.

2:20PM - 2:30PM EST: Future steps

- Backlog/Project status links: <https://opentelemetry.io/project-status/>
- Powered by github milestones
- Add php to yaml here, to raise awareness:
https://github.com/open-telemetry/opentelemetry.io/blob/master/data/progress_source.yaml
- How to run the tests, how to use the library, et. al.
- Dmitry should sign the CLA before we move his code over:
<https://github.com/kubernetes/community/blob/master/CLA.md>
- Going to open up an initial PR not using Dmitry's work in order to kickstart the project. Will hope for reviews / additional insight there.

10/2/19:

Attendees:

- Bob Strecansky (Mailchimp) bob@mailchimp.com, bobstrecansky on github
- Ted Young (LightStep) ted@lightstep.com
- Brian Akins (Mailchimp) @bakins brian.akins@mailchimp.com
- Dmitry Krokhin (nekufa)
- Emmanuel Odeke (Orijtech) emmanuel@orijtech.com, odeke-em on Github
- Eoin Keegan (Etsy) eoin@etsy.com
- Morgan McLean (Google) @mtwo, morganmclean@google.com
- Jigar Parsana (Google) jparsana@google.com
- Chris Kleinknecht (Google) @c24t, libc@google.com

Agenda:

1:30PM - 1:35PM EST : Introductions

- Hi everybody!!

1:35PM - 1:55PM EST: Current state of tracing in PHP / OpenCensus / OpenTracing

- https://docs.google.com/document/d/1CRiRq_wpzOuG9VKM_ealmcrS12lie2V7LePnH9AwclU/
- Just kicked off the SIG! No work started yet.
- High level review of current state of the project
 - Spec describes the API and core features/requirements
 - Projects generally start from an OC implementation
 - Add API/SDK separation
 - Adjust API to match new spec (which is somewhat different from OC)
 - Create Exporters for Zipkin, Jaeger, and Prometheus
 - **AI: Reach out to slack people to talk about opentelemetry-php**
 - **AI: Errybody research your contacts for other PHP shops**
 - Add an OpenTracing Bridge for backwards compatibility with OT
 - Create new OpenCensus SDK that migrated people to OTel

1:55PM - 2:10PM EST: Next steps towards OpenTelemetry-php

- Python started from scratch by defining the API
 - Started with Tracing
 - Created a test/fake/mock implementation
 - Java is the farthest ahead, can be used as a reference
- The first version of the metrics spec is just getting finalized
 - Draft is here: <https://github.com/open-telemetry/opentelemetry-specification/pull/250>
- Please contribute to the Spec! It is a work in progress.
- Spec can still feel to java-centric in some ways...
- <https://github.com/basis-company/opentelemetry-php> has already seeded the effort
- Let's start by porting this repo
- AI: review seeded API from a cross-language spec perspective

- AI: plan to move php domain socket based sidecar to the OTel Collector.
- There is little interest in a C++ approach
- Please leverage GitHub issues and Milestones
 - Milestones show progress on the website:
 - <https://opentelemetry.io/project-status/>
 - **help-wanted** and **good-first-issue** are great labels for getting contributions
- What versions of PHP are to be supported?
 - AI: what does OpenTracing support?
- Bob will seed the backlog with Issues

2:10PM - 2:30PM EST: Open Floor

Gitter room: <https://gitter.im/open-telemetry/opentelemetry-php>

Specification: <https://github.com/open-telemetry/opentelemetry-specification>

Python Repo: <https://github.com/open-telemetry/opentelemetry-python>

RFC repo: <https://github.com/open-telemetry/oteps>

Current OpenCensus contributors:

<https://github.com/census-instrumentation/opencensus-php/graphs/contributors>

First Python Implementations:

<https://github.com/open-telemetry/opentelemetry-python/pulls?page=4&q=is%3Apr+is%3Aclosed>

Dmitry's Spec: <https://github.com/basis-company/opentelemetry-php>

Python tracer API PR: <https://github.com/open-telemetry/opentelemetry-python/pull/11/files>

Milestones specification:

<https://github.com/open-telemetry/opentelemetry-specification/blob/master/milestones.md>

Product Status: <https://opentelemetry.io/project-status/>
