Rhyming is eschatological. Compared to the paucity of rhyming in the Bible, which has acrostics, chiasms, numbers of time for a concept in a pericope, a story, rhyming has emerged as 'it all fits together at the end'.

'The human body models earth'

Hmmm.

Everything somehow models everything?

I think so.

I've recently been pondering the Creeds and the Sheffer Stroke.

Sheffer Stroke encapsulates Russell and Whitehead's 5 in 'Principia Mathematica' into one--not both the one and the other. Encapsulates and, or, not, if and only if, if then.

But we hold Both the one And the other as foundational. Modelling.

Both God and Man. Both 3 and 1. Light both particle and wave.

Someday, someone will elaborate this.

What's Next For Chuck? One Room School?

Yes. A hundred years ago in Iowa HIGH SCHOOLS taught HIGH SCHOOL GIRLS to be teachers in country schools after HIGH SCHOOL GRADUATION. My mother walked ½ mile to hers, her sister 1 ½ miles—schools were every 2 miles, and Iowa had the highest literacy rate in the nation. Grades 1-8, one room.

Google Translate would help. ERH says 'yes, no, please, thank you' are 4 basic words

With computers and home school mothers of large families, we can do this. Free Curricula abound. Mangalwadi want to use North's work world-wide also.

It can be done as a ministry or, preferably, as a profit-making enterprise. For profit would attract more imitators, replicators, etc. Plans on request. Later I'll charge \$. Basically hire one at a low wage, give her (usually a she) ½ of tuition, manual sales, consulting, membership site. Etc. See Switzer for other revenues. 10 @\$10K each should do it. Find a businessman to run it.

Thus JBJ's 'Jeremiah Time' 3 are fulfilled. 'The Next Thousand Years A Prayer' is the plot of land. Eschatological Evangelism, per end of Ecclesiastes completes the Jeremiads. And One Room School is 'for the good of the city', given that it is Bible-based. (Luther).

The 3 generations can complete songs of each book (see Bullinger's chiasms and 'Singing Galatians' as well as the 42x4 Response of history). Maybe Adullam in Kenya will do the Biblical Law (Maimonides and Greg Hartman's 'New Testament Imperativity').

This One Room School is in #10 of 12 small enthusiastic groups.

- ADD 50 YEARS SINCE Hartman Space Age Ballot
- (backward BASH (HSAB) made no splash, though Treasurer run got most 3rd party votes) The idea was to delineate how much of the state budget went where, and to have each person/taxpayer write in what that taxpayer wanted spent on what. Over 60% went to education.

- This was before SH SHK and BBL
- It is two words of Twelve Word Platform. Direct Appropriation.
- I'm a living example of Sobran's dictum that we have gone from teaching Latin (and Greek) in high school, to remedial English in college. 65 years ago, I did have Latin in public high school. Later I skimmed French, German and Spanish, then some Hebrew and Greek, and Symbol, and I still struggle with English.

- Now, 'for the good of the city' I hope to get a series of one room schools, like they used to teach HIGH SCHOOL girls to teach in every 2 miles in Iowa, which then had the highest literacy rate in the nation.

- (My mother walked ½ mile, her sister 1 ½ miles to respective schools. My grandmother had taught in Audubon county for \$5 more a month than in Guthrie County. \$25 instead of \$20.

- Now we have computer and free online Hebrew courses.

- We'll see. Is the will there?—the information is. Gurri.

- <https://madgewaggy.blogspot.com/2024/08/how-one-wall-street-giant-is-prepping.html>

-
- Here's How One Wall St. Giant Is Prepping For Financial Collapse (Steal Their 3 Survival Tips Now...)
-
- Jonathon Johnson, the Board Chairman of Overstock.com (a company with over \$1.5 billion in annual revenue and 1,500 employees), gave a talk at a precious metals conference about the company's insights into where the economy is going and what they're doing about it.
-
- Also watch this video- 30 Million Americans Face Hunger As They Can't Afford Insane Grocery Prices: Nearly 10 percent of the U.S. population is facing the threat of hunger and about 70 percent of Americans say they are struggling to pay their grocery bills right now!
-
- The No B.S. Truth Straight From The Mouths Of Financial Insiders
- Here are some highlights from Johnson's speech and what you can do to follow their lead on preparing for what lies ahead...
-
- "We are not big fans of Wall Street and we don't trust them. We foresaw the [2008] financial crisis. We don't trust the banks still and we foresee that with QE3, and QE4 and QE 'N' that at some point there is going to be ANOTHER significant financial crisis.
-
- We expect that when there is a financial crisis there will be a banking holiday. I don't know if it will be 2 days, or 2 weeks, or 2 months."
-
- ► "Deep State: How to Defeat America's Greatest Enemy" and see what YOU can do about it!
-
-
- What That Means For You:
- A "banking holiday" is a Presidential Order (passed in 1933) used to completely shut down banks – without warning – to avoid everyone panicking, pulling their money out and causing a complete financial apocalypse.
-
- The entire banking world suddenly goes "black" and you won't be able to view your balance... withdraw or deposit money... write checks... or even access your bank's web page.
-
- For how long?
-
- Like Overstock Chairman said, it could be "2 days, or 2 weeks, or 2 MONTHS"!
-
- So what can you do?
-
- Immediately after a collapse and a federal "banking blackout", cash is still going to be king (for a little while).
-

- But if you don't have it in your wallet, you're NOT going to be able to go out and get it from your bank or ATM.
-
- That's why the super-wealthy always keep a stash of cold, hard cashola at home (in a safe) for emergencies.
-
- If you have a fire-proof gun safe, that will work too (NOT a bank safe deposit box!)... and you should consider moving some of your savings into primarily \$1 and \$5 bills (stores won't be able to make change as easily) rather than sitting in a no-interest checking account that you may never get access to once the SHTF.
-
- Just stack those duckies up right next to your bricks of 9mm and get used to paying for groceries and other expenses with cash now as good practice.
-
- Should You Consider "Alternative Currency"
- During A Financial Collapse Meltdown?
- Overstock has a very unique look on "money" when preparing for the "death of the dollar"...
-
- "One thing that we do that is fairly unique: we have about \$10 million in gold [and silver], mostly the small button-sized coins, that we keep outside of the banking system.... in denominations small enough that we can use for payroll.
-
- We want to be able to keep our employees paid, safe and our site up and running during a financial crisis."
-
- What That Means For You:
- I was late to the game on gold and silver because I found it hard to believe that anyone following a collapse would ever be out there trading.
-
- Then I learned that the life-expectancy of a paper dollar is only 18 months in circulation – which makes gold and silver better for a long-term crisis.
-
- Besides, if mega-banks and corporations are going to be using gold and silver for currency, that's going to immediately put these small "buttons" into circulation and I think the education level of the average consumer is going to catch up quickly.
-
- You can be sure that stores will begin accepting them in order to stay in business.
-
- When I was in financial planning, we always recommended people take 10% of their weekly paycheck and put it into savings before paying for anything else.
-
- I think that's a good way to save and I'd split that 10% in half between cash in your safe and silver (and some gold) in small coins from an online bullion outlet.

-
- But a word of warning here...
-
- Don't go crazy and start sinking all of your hard-earned dough into currency because there's something even more important (and more valuable) that Overstock is also planning for.
-
- Also watch this video- Food Confiscation: How to protect your food stores and production from government confiscation
- Thinking Outside The Box For A Financial Collapse...
- Here's the continuation of Overstock Chairman's speech...
-
- "We also happen to have 3 months of food supply for every employee [+ 1 additional family member] to live on during the crisis."
-
- First of all, how cool is it that a corporation – who sees the writing on the wall that our dollar is about to come crashing down – is preparing to even FEED their 1,500 employees and their families for at least 3 months?
-
- Crazy, right? (And pretty damn smart!)
-
- What That Means For You:
- Overstock understands that when the economy collapses, food resupply lines will be severed and most people will be out of food within a matter of a few short days – as little as 3.
-
- Grocery stores that haven't been completely looted or sold out will skyrocket their prices and be forced to work on a "cash-only" basis.
-
- The very best investment you can make right now is in long-term survival food – which is even more valuable than silver and gold coins in an economic crisis.
-
- Not only will you be able to feed yourself and your family while others are starving, but it will be the most valuable barter tool you'll be able to use when no one else around you has a single dollar to their name.
-
- But this isn't something you should wait and slowly save up for.
-
- Overstock already has their food in long-term storage RIGHT NOW because they know that the "death of the dollar" could come at any time and it's too late to build up your stockpile once the government initiates an "instant shut-down".
-
- I highly suggest you plan for at least 3 months of "survival food kits" for your entire family right away.
-
- I have a full year for my family, but start with at least 3 months if you can.

-
- If you fail to plan, you plan to fail, right?
-
- Take Overstock's (and other Wall St. insiders') warnings to heart and follow their lead.

- online unknown unknown holy war

-

'Online' is one of the challenges GodTrinity gives us. We hold in our respective hands access to 'all' the information in the world, a truly world-changing thing. We must make what we do such that we use this for good. Here is the internet in a list of 25+ such technologies. (And Gurri's 'Revolt of the Public' says we are in the Fifth Age (he may use a different word) of information, the first being writing, the second alphabet. Thus, Jordan's view that GodTrinity gives the redeemed holy wars to fight for our maturity holds true today. We have one. For most it's an unknown unknown--we don't even know that we don't know.

https://en.wikipedia.org/wiki/General-purpose_technology

- Reaction to a post that our children spend too much time online

- Also, friend's son took a whole year of high school online during covid

- Further, Khan Academy and numerous other sources have FREE k-12 curricula, others cheap

MIT has free courses online taught by Nobel laureates

--

- Guy Fawkes Day.

- Also, 2 things. Many 'bureaucrats' and state-worshippers know that they are paid far too much for producing far too little, and our liturgy of forgiveness doesn't reach them. So the lash out.

- Second, we are in transition from 'the state' to 'small enthusiastic groups' (ERH's chiastic view of history) and this will be bloody, just as a footnote in Peter's 'End of Protestantism' indicates that the centuries ending in state dominance over church, cities, and nobles was. So it'll be bloody. Combine the with Gurri's Fifth Wave of information, and there will be problems.

- Answer: Get Ready To Help People Locally, while doing liturgy better. I'm very optimistic in the longest/er run(s), but in the short run, one had best read Madge Waggy on what

Overstock CEO is doing--ones, fives, bits of gold and silver, and 3 months worth of food for every employee.

- But do 'we' have the will and the vision for this? Where is Cassiodorus to keep the essential wisdom?

-

- Love in King Jesus,

- Chuck

PS: Perhaps a few state-worshippers will be peeled off, perhaps we are being chastised, surely the redeemed have another form of Holy War to fight unto maturity.

PPS: Ike halved the number of military personnel, Truman helved the budget. Lincoln suspended habeas corpus, and he and Wilson jailed free speakers against war.

- THAT'S why 'they' don't like the Irish?

- Rockwell relates: 'An anarchist society just like the one they described existed in Ireland for 1000 years. Rothbard tells the story: "The most remarkable historical example of a society of libertarian law and courts, however, has

- been neglected by historians until very recently. And this was also a society where not only the courts and the law were largely libertarian, but where they operated within a purely state-less and libertarian society. This was ancient Ireland — an Ireland which persisted in this libertarian path for roughly a thousand years until its brutal conquest by England in the seventeenth century. And, in contrast to many similarly functioning primitive tribes (such as the Ibos in West Africa, and many European tribes), prequest Ireland was not in any sense a 'primitive' society: it was a highly complex society that was, for centuries, the most advanced, most scholarly, and most civilized in all of Western Europe.'

- The Menace of the State - LewRockwell

- The election is upon us. We wonder whether we have to have war, tariffs, and deficit spending, regardless of who...

-

- THAT'S why they don't like the Irish

- Chuck

- <https://www.lewrockwell.com/2024/11/karen-kwiatkowski/the-fifth-of-november/>

- What if the America-first populist, limited government, pro-health and anti-war movement “loses” the election? Delightfully, their philosophy does not require crass and stupid centralized control. There will be 30 states and counting they can continue to migrate to, to find their own center. They can put American first as they wish in a thousand ways. They can resist and ignore overweening government, as they already do. They can get healthier and stronger on their own, as most never needed the government to advise them anyway. They – the backbone of the American military for a century – can refuse to fight for the empire, consistent with a well-established trend. Meanwhile, the woke, finding their cities hollowed out, and their public schools and housing dens of criminality and fraud, will inadvertently push their governors and mayors towards reality-based change. The people who remain in these great cities, and those who left them behind, will together recognize the opportunity that comes from liberty and decentralization – and some of these cities will bloom again.

- Maimonides and 'New Testament Imperativity'
- I divided 613 by 42 and got 14, 371 by 42 and got 8.
- 30 weeks since Resurrection, so $14 \times 30 = 540$, I picked one from Maimonides 541-555
- From 'Imperativity' it's 241-248
- The formula is from Jeff Meyers, who is NOT responsible for my misuse
- 1--What did it mean THEN to individual
- 2--Corporate?
- 3--Fulfilled in/by Jesus
- 4--Means NOW corporately
- 5--Means now individually
- (For 'Imperativity', 3 changes to what's happened in 2000 years, for example who/what are the powers now of Romans 13:1)
- #545 Deut. 22-24 So, Maimonides is about Deut. 22:24, really the verses before and after it, about a virgin raped in the field or city. If city and she did not cry out, both are stoned. In field, only the rapist.
- How did Jesus fulfill this? I don't know. Help?

#244 Ephesians 5:8 'Imperativity' is about walking in the light, and there are 2 things to note:

1--Jordan has mentioned that 'eth' in 'eth heaven' and 'eth earth' is what I call amegalphis, that is, the word is composed of the last and first letters of the Hebrew alphabet. GodTrinity created all light, first and last, I interpret. 2--We have learned that light is a bothand. That is, both particle and wave. This is downstream from the bothands of 3 and 1 and God and Man. I've left out some obvious things, hoping to get a response from a theological forum.

- New evangelistic field--AI. Convert them. A challenge, as Jordan says for the redeemed for a HOLY War for our maturity. Also: The human brain is as big as the Internet - Science | AAAS

The human brain can store 10 times more memory than previously thought— about 1 petabyte, or as much as the entire internet, according to a new study.

- Hymns Psalms
-
- I'd make an historical argument.
- The Bible rarely uses rhyme. <https://en.wikipedia.org/wiki/Rhyme>
- It's possible that rhyming is a deep cultural post-millennial statement that all will work out in the end. Twain: 'History doesn't repeat, but it rhymes'.
- Cassuto, Jordan, and Cascione have done good work on number as a unifying element. On Psalms, one could take seriously Jim's Psalm translation that have key repeated words/concepts bolded. (These are alas unavailable). Then one could take seriously Psalm 150 and have these bolded words/concept emphasized by one of the instruments.
-
-

-
- Or, one could do Psalm 117 with 150:6, with 5 commands to praise, 6 praisers, and 7 Praised. (KJV) On a 7-note scale, sing the 5 using the 3 highest notes, 6 as the middle, and 7 as the 3 lowest notes.
- This would give musicians som variety.
- Gregorian chant was also invented, historically. Teach 'em when.
- Also use acrostics. The New Jerusalem bible (RC) makes English acrostics in Psalm 25. It's Hebrew in the Bible.
- This would give you a broad argument, to go with you narrow 'I don't like' argument.
-
- Love in King Jesus,
-
- Chuck

PS: If 'they' know what they are doing, they're ok. If they don't know what they're doing, they're in trouble.

- I DO recommend HOWARD Bloom's 'The God Problem'. He avers that all is divided into explorers and consolidators, starting with 'Big Bang' (a Hoyle JOKE). Naturalistic fallacy, but GREAT on history of science.https://www.amazon.com/God-Problem-Godless-Cosmos-Creates/dp/1633881423/ref=sr_1_1?crid=ULQ966OCH8IY&dib=eyJ2IjojMSJ9.sgg9q9iQ3hHE86bYYkTImA.DXhewKtZ25ZmiwnCf14teALgpieG8luBeCayvzsGz8s&dib_tag=se&keywords=the+god+problem+howard+bloom&qid=1730909343&srefix=Bloom+%27The+God+Problem%2Caps%2C326&sr=8-1
- How does the cosmos do something it has long been thought that only gods could achieve? How does an inanimate universe generate stunning new forms and unbelievable new powers without a Creator? How does the cosmos create? That's the central question of a book that in its original edition was called profound, extraordinary, provocative, mind-bending, and daring. Author Howard Bloom takes you on a scientific expedition into the secret heart of a cosmos you've never seen. Not just any cosmos. An electrifyingly inventive cosmos. An obsessive-compulsive cosmos. A driven, ambitious cosmos. A cosmos of colossal shocks. A cosmos of screaming, stunning surprise. A cosmos that breaks five of science's most sacred laws. Yes, five. At the end of this intellectual thrill-ride is a whole new theory of the beginning, middle, and end of the universe—the Bloom toroidal model, also known as the big bagel theory—which explains two of the biggest mysteries in physics: dark energy and why, if antimatter and matter are created in equal amounts, there is so little antimatter in this universe. Called "truly awesome" by Nobel Prize-winner Dudley Herschbach, this paperback edition of The God Problem will pull you in with the irresistible attraction of a black hole and spit you out again enlightened with the force of a big bang. Be prepared to have your mind blown.

- Host A 42A Appendix 1 Why I Am Or Am Not One Of The Richest In the world
-
- Start with how I shot my age in golf ambidextrously—combining rare things
- Rare thing one--

- At a family reunion gold tournament we went around 9 holes twice, taking the best score on each hole of the two rounds to get our final score
- Rare thing two—
- I played one tournament with my old college roommate in which we used big holes
- Rare thing three—
- Thinking we might need another player to make our foursomes for the FUNFUNFUN part of a golf tournament at a family reunion, I practiced a few rounds left-handed. Later I played a few rounds hitting both left-handed and right-handed
- So, after I recovered from a stroke, I played a round combining all these, and at 74, I hot a 68. 4 birdies, 2 bogies, par 36.
- I wanted to put this scorecard on the refrigerator, and asked my wife 'Who do you know that has shot his age ambidextrously?'
- She replied, 'Who would want to?' [Note; She keeps a book of family athletic achievements. Because they weren't in the paper, my two no-hitters, steal of home in fast pitch (delayed steal), 3 outs in 10 games, etc. are NOT in the book. Neither is my dad's 2 for 3 against Hall of Famer Bob Feller, who won 5 games in the majors between his junior and senior years in high school. Neither is my brother's 6 straight home runs, followed by an intentional walk with the bases loaded, followed by an 8th homer. Etc.]
-
- Now move to riches.
- Start with the rare 2009 purchase of a pizza order with 10,000 bitcoin.
- Second rarity—
- Bitcoin is now @ \$50,000. $50,000 \times 10,000$ is 5,000 million, or five billion dollars
- A third rare thing—
- I did not get a receipt for a \$10,000 church donation (cost basis).
- Suppose the pizza order was \$25 (a lot of pizza in 2009)
- 25 into 3,000 is 120.

Multiply 120 x \$5 billion. \$600 billion.

 - So we enter into house/fellowship,
 - Then we 'head',
 - then we eat (fang),
 - through the cross and prayer (bruised heels),
 - so that through the cross, prayer,
 - we feast, eating and being eaten in unity and diversity,
 - so we know, doctrine/head,
- and are in the house, the house, the built fellowship.

- Rare thing 1—

- While working at Post Office for decades, I could do my job while listening to tapes (this was before
- advances such as MP3) So I listened to James Jordan, among many others, such as Rosenstock (www.erhfund.org
- Jordan is an www.biblicalhorizons.com
- 'Through New Eyes' a seminal Jordan work is free online at www.garynorth.com/freebooks
- Rosenstock or Rosenstock-Huessy website is free and includes audio and transcripts of Dartmouth lecture, and more
- Rare thing 2—
- I got pneumonia or Covid and was in intensive care for 15 days, forcibly retiring me
- Rare thing 3—
- During convalescence I was very weak, but got flashes of ideas almost daily, so I worked in the universe of Jordan (he's not responsible for my errors) to produce 'The Next Thousand Years A Prayer' 1 should be soon on Amazon. 1A is on Google Docs. 2 should be attached to something sent to a few friends, 3 is what is done after this. It has 5 parts—supplemental to church years, catechisms, etc.: 1—A Bible book a week, based on Jordan's 49 at 'Rethinking the Order of the Old Testament. I go backward (ERH 'Out of Revolution' and re-retuned (Jordan's Revelation commentary indicates that at the pictured Ascension, 5:12 to 7:12, the universe is retuned, giving us our days of the week:1234567 to 4152637 (planets and 'gods' thereof incorporated. I re-retune, since Pentecost and A. D. 70 and flip (world turned upside down0 to get 8531642, Hebrews to Exodus.
- 2—A liturgy through the year, from Resurrection to Resurrection. After 10,11,11 there is an equivalency of Cleansing—confession and forgiveness, with historical events of Red Sea and A. d. 70. Then conversion of Constantine, Sinai, and Consecration (Readings and Sermon). Then Communion as Totus Christus (2 weeks, Bread and Wine) as Full Conquest of Promise Land and Conversion of Iceland. 3—Singing of each book (see 'Singing of Galatians', etc.)
- 3—The 42s. We do 42 weeks, plus 7. Since celebration.of.resurrection.anno.mundi (yes, a pun for 'coram' is face/presence in Latin) to coram varies, sometimes the 42nd week is one book stretched out, sometimes it is many book in one week.
- 4—Our response, a history of 42s. These are not necessarily chronological. This is my 4th attempt, and since I am engaging 3 generations and more, it will advolve—change toward theodicy. I was inspired by Jordan's view that 'et'/'eth' in the first sentence of Genesis included the first and last letters of the Hebrew alphabet, and secondly, his portrayal of chiasms in 'Trees and Thorns', and thirdly, his saying that a Hebrew letter was also a word in 'Rethinking...' to use the consonants (they bigly count) of the first word of the Bible, bereshith, B R SH T, to propose a chiasm of chiasms. House, Head, Eat (fang), Cross. This is used somewhat in Acts 2:42, as Fellowship, Apostles' Doctrine, Breaking of Bread, Prayer. But my chiasm includes these, such that history if the bruising of heels in Cross/Prayer, the meals (energy), the head movements in liturgy plus encompassing thought systems—knowing that we know, and finally, we end up with fellowship/house.
- These advolve (change toward) respectively Full Final Forever Fellowship, Full Final Forever Head/Body, FFF Feasts, FFF HumbleDing.

- House/Fellowship would include Nisbet's forms of society, Hall's 10x10 of society, the covenants in the Bible, the succession of 'Powers That Be' to include Guilds, States, Other Empires, Bishops, Aristocrats, Cities, etc. These will change. Head/Body would include various thought systems, creeds and catechisms, and actions during worship such as confessing, kneeling, singing, listening, etc. Idols. Eating would include energies, Kardashev, General Purpose Technologies, etc. And Cross/Prayer would include bruising of heels in million-death military battles, unknown unknown wars (subtleties of Adversary), Holy Wars the redeemed fight for maturity, etc.

- I try to fill all 42, and apply them for each week, but K now that the 42s will change.

- 5—Also will change the 12 small enthusiastic groups. We'll know more at A. D. 3000.

This is based on Rosenstock's 'Universal History 1954' course at Dartmouth, also at www.erhfund.org. He held that history was Tribes, Empires, Israel and Greece, then after He Who Reversed The Trend, Greece became a companion only, Israel without the exclusions became the Church for 100e years (emphasis), then the nation-state, Empires without slavery, predominated for the next 1000, and now we are in a transition to small enthusiastic groups. I used ERH's and Jordan's 4 steps, in each of the 3 decks of the universe to get 12. These are listed in earlier work. The first uses Maimonides' 613 and Greg Hartman's 371 ('New Testament Imperativity') to illustrate/embody Law/Imperative.

- FINALLY, this is all 'Jeremiah Time' and JBJordan told me. I have 3 parts: 'The Next

- Thousand...' is his plot of land. Eschatological Evangelism (You will be judged) is my jeremiad. I'm working on 'for the good of the city'. A one-room, one-teacher school may be my emphasis, as well as though optimistic in the long run, some problems may arise with the transition, as they do with all transitions. Gurri. . - Someone needs to do 'both/and logic' since the key confessions teach it--Both God and Man, Both 3 and one. Principia Mathematica by Russell and Whitehead had 5 operators: and, not, or, if and only if, if then. The Sheffer Stroke claimed to be able to derive all 5 from 'not both the one and the other' But we believe Both the one AND the other.

Who is working on both/and logic?

--

- Charles Howard Hartman

- David Oates I think there is more to communication. Reverse speech and metaphors is one part. So is ideographs. So is the fact that you have found the children speak backward first. So are many languages, reading in many ways--right to left for Hebrew, for instance.

Pictographs, ideographs, body language. ToneSo is cursive and printing. There is more to know. 'Both/And' logic vs. 'not both the one and the other', the Sheffer stroke from which can be derived Russell's and Whithead's 5 operators in Principia Mathematics. (and, or, not, if the, if and only if). We've only had electricity for a few centuries. There is more ahead of us. Yes, we must judge all by the Bible, but there is more to the Bible than we think.

- As an example, the U. S. Coast and Geodetic survey has erected a plaque honoring the man who got them charting the 'pathways of the seas' from Psalm 8. Jordan's 'Trees and Thorns' sees a pattern of 7x throughout Genesis. Mike Bull sees something similar throughout the Bible .Cassuto, Jordan, and Cascione see significances in the number of time something is mentioned in a passage. Leithart does something similar with the gematria of YHWH in early Genesis in 'Creator'. Keep on. David Oates

- Non-zero-sum transactions, good for all. Do they show both/and?
- The Hinckly Rule makes sense to me: Hinlicky Rule make sense?
- “You shall not criticize the position of another...until you can state that position with such accuracy, completeness and sympathy, that the opponent himself declares, ‘Yes, I could not have said it better myself!’ Then, and only then, may you criticize. For then you are engaging a real alternative and advancing a real argument. Otherwise you shed only heat, not light.” (Alan Stevo)

Next year I'll do a simple Question and Answer form, and copyright these books, GodTrinity willing. As Jordan says about his work, this is not a final word, but prayerfully and hopefully, a helpful word.

November 16: I hold that all the feasts of Ancient Israel are recapitulated in liturgical worship today.

Passover; Into house of worship. First Fruits: Arise alive after forgiveness. Pentecost: Readings. Trumpets: Sermon. Atonement: Communion. Tabernacles: Worshipers made into. Purim: Go out

What's the advantage of adding as a supplement, one book a week of JBJ's 49-book Bible? Total Bible Saturation. See 'Crisis, Opportunity and the Christian Future' and 'Rethinking the Order of the Old Testament' at Biblical Horizons dot com. For extra points, one could connect each book to each of the others, and also one could use the letter-words of each of the 'old' books/Hebrew! Wow!\

Use AI to generate the 42x4, with hints of what I have done already?

--

- I think JBJ intimated that since 'eth' includes both the first and last letters of the Hebrew alphabet, GodTrinity created all light.
- I hope this isn't off-topic.

- Put 7 in bottom 3 notes.
- Fit this and other such renderings of Psalms somewhere in liturgy.

-

- Dear Pastor:

-

- You mentioned re: Psalm 127 that we should train our children to service in the 'gates'--if I understood it correctly.

-

- There are 12, significantly.

-

- How so?

-

- Both Jordan and Rosenstock write that we are entering a neo-tribal era. (References at end).

-

- We could ask, can we fill the three-decker universe with 4 each, making 12.

-

- I think so, but I am more interested in your thoughts. Mine have advolved greatly.

- PPS: Jordan in 'Crisis, Opportunity and the Christian Future'

- PPPS: Rosenstock in 'Universal History 1954' FREE transcript and audio at www.erhfund.org

PPPS: Jordan sees history as a successive emphasis on each person of the Trinity, and after the Resurrection he sees 3 700-year periods. Rosenstock holds to a chiastic view, and after He Who Reversed The Trend, there have been two 1000-year periods. Both see the future as neo-tribal. Nuances.

NEXT YEAR (coram) I'll do a short Question and Answer form of 'The Next Thousand Years A Prayer. This year I'll continue with applying the Meyers' Five to Maimonides and (modifiedly) Greg Hartman's 'New Testament Imperativity'. I'll also add Beatitudes to THEEEOS at the end. PMMHMPPP.

We should note that the king in ancient Israel was required to write 'the law' in his own hand. This resulted in the king getting into his mind and actions the geist/gist/essence of the law. This is shown by Solomon's decision in the case of two harlots and one baby. The gist of the matter was that the true mother wanted the baby to live.

Now to Maimonides. Dividing 613 by 42, we get 348 done, so we pick one from 349-362. I'll do #359 'To follow the procedure of the peace offering — Lev. 7:11'. What did it mean THEN individually, corporately, how as it FULFILLED in/by Jesus, what does it mean NOW corporately, individually. First, they were in a time of priesthood. In that time, they were given commands to obey exactly, in order that they might be taught. As I've said, the king was to apply the gist, and now we are in a prophet stage. We eat the peace offering as members of the heavenly council, as prophets. Some have crackers, some have grape juice, some do not have a loaf. Some have one prayer only. We should strive toward being better, and toward better understanding.

Now Greg Hartman's 'Imperativity'. We should say first that some maintain that declaratives ad imperatives, thus Matthew 25:31-46. OK, 256 done, choose from 257-264. We modify Meyers by asking, 'What has changed in 2000 years?'. The best example is 'authorities' in Romans 13: 2. #260 Phil. 3:15. '...perfect...' Others may elucidate us with word studies, but I will go with 'maturity'. A pattern in the Bible is that GodTrinity is growing us. He gives the redeemed new types of Holy War to fight, for our maturity. (The church body is the new temple, I hold, and how we should act is a way of reinforcing the building). So we should ask, what types of Holy War is GodTrinity giving us NOW for our maturation? There are many that are coming, from social media, to AI, to food, to governance...

- James 'Bold' Jordan expanded. Total Bible Saturation
- We start here:
- [biblicalhorizons](#) » No. 80: Rethinking the Order of the Old ...
- [biblicalhorizons.com/biblical-horizons/no-80...](#)
- The purpose of this essay is "to boldly go where few have gone before," and open the possibility that there is another, more definitive order to the Old Testament canon, one that can be discerned from the text itself, which is superior to both the Hebrew and the Greek Canons.
-
-
-
- Then we go through Total Bible Saturation ('Crisis, Opportunity, and The Christian Future')
-
- What do we get? We get one thing that might help: A book a week.
-
- Putting these on a 'year' starting at Easter, we get 3 John on Dec .8, Sunday.

-
- The chiastic center of 3 John is 'Malice of Diotrephes' from Bullinger, commanded for us to get by JBJ.
-
- But that's not all.
-
-
-
- In JBJ's Revelation commentary he writes that at the Ascension, Rev. 5: 12 to 7: 12, the universe is retuned.
-
- It's retuned from 1234567 'by fifths' to 4152637, and we get our days of the week, eating/incorporating plants and their gods.
-
- (2 and 3 somehow are switched)
-
- But that's not all.
-
- After ascension comes Pentecost, and then A. D. 70.
-
- Should they not entail retuning too?
-
- I think so. We get 2461357, and since we turned the world upside down we eventually get 8531642 by adding earth.
-
- And amening Rosenstock's 'Out of Revolution' which went backwards through the revolution, we start at Easter (Resurrection) with Hebrews and and with Exodus.
-
- But that's not all.
-
- With this retuning, Dec. 8 is Ezekiel, the chiastic center of which is Elders, per Bullinger, but I think shows a visionary temple.
-
- But that's not all. (What do I know)
-
- Tell these little snippets to your congregation as part of Total Bible Saturation?
-
- Love in King Jesus,
-
- Chuck

Some intellectual should do both/and logic (Both God and Man, Both 3 and 1) as opposed to the Sheffer Stroke (not both the one and the other) from which he thought that all5 of Russell/s and

Whitehead's operators for Principia Mathematica could be derived (no, and, or, if then, if and only if). Who is working on this?

--

- Host A 53 Twelve Imperatives 2025
-
- SHORT PRELIMINARY. 1—'Without the imperative there is no future' Bledsoe/Rosenstock. 2—'The Bible comes to us first as Law'. Jordan. 3—'A declarative implies an imperative'. Harlow. (Maybe, Hartman).
- 4—Because a, do B. The imperative will be in bold. Add 'Thus saith the Lord' after every bold. 5—We will weave the Beatitudes and Decalogue into 7, and then do 8—Resurrection, 9—Ascension, 10—Pentecost, 11—A. D. 70, and 12—Already Not Yet Eternal Condition.
-
- First of Decalogue (Protestant—though Cascione, LCM, says it might be even 12?!) and First Beatitude.
- No other gods. Poor in spirit. The nature of GodTrinity is both 3 and 1. So too is Jesus both God and Man. But much contemporary logic (not Goedel) includes the idea that from the Sheffer Storke (Noth both the one and the other) and be derived all 5 of Russell's and Whitehead's 'Principia Mathematica' operators (and, not, or, if-then, if-and-only=if). #1 Because the key fact of the universe is Both/And, articulate a Both/And Logic!
-
- Idols and Mourn. The Hebrew Scripture tell us over and over that the Redeemed must fight (a different) Holy War, for Maturation. Sun Tzu tells us that the ultimate victory is to win without the opponent knowing he is in a battle. #2 Because of this, tell us what the battles are now.
-
- Don't take the name emptily, be meek. #3 Because of this, do a 'Chuck Galeazzi' Help.Other.People.Everyday. Get Ready To Help People Locally. Do Matthew 25:31-40.
-
- Sabbath, Hunger and Thirst for Righteousness. Jesus prays that we be one. We're separated. #4 Because of this, follow Leithart's 'End of Protestantism'. Do a Boulder and a Tri-City. Practice weekly communion, sing Psalms (and all books). Cooperate in commonalities, such as pro-life, marriage courts, praying..
-
- Now, Jordan says 5 and 8 go together, 6 and 9, 7 and 10. Honor father and mother, no theft and be merciful. #5 Because of this, do a Meyers Five on Maimonides and 'New Testament Imperativity'. What did it mean THEN individually, corporately, how was it fulfilled in/by Jesus, what does it mean NOW corporately and individually. (For 'NTI' what new applications after 2000 years—example, what authorities NOW as compared to THEN.
-
- No murder, no false witness against your neighbor, and pure in heart.
- #6. Do Total Bible Saturation. Jordan's 'Rethinking the Order of the Old Testament' is valuable here, read it, mark, learn, and inwardly digest.
-

- No adultery, no coveting and peacemakers=sons of God. #7 Read Hoppe's 'Democracy, the God that Failed'. Compare democratic war casualties, massive, to dynastic one, minimal. Avoid nuclear war—also biological and chemical.

Interlude. Cross and two Persecutions. We're in the Fifth Wave of information, Gurri. First was writing, second was alphabet. Paul vs. Socrates. 'Who will save me from the body of this death?' Vs. The more you know, the more moral you are. Gilder's MIGW. Money is time, information is surprise, growth is learning, Wealth is knowledge in 'Life After Capitalism'. Fuller's ephemerality. Diamandis' Ds. Rosenstock: New technology increases space over which you act, decreases the time it takes, and destroys old groups. Diamandis' Ds. Do study and apply all these. Read, mark, learn, and inwardly digest these words.

- Resurrection. 'If you know what you are doing, OK. If not, you're in trouble. The church reformed is always reforming. #8. Re-examining all liturgical practices and architecture. Two examples; Candles lit before service, extinguished after evening and morning Creation. Or, in electric light, microphones, pews. Another: Pastor sits at table, congregants stand, or pulpit and lectern, or pulpit.
-
- Ascension. Jordan says the universe was retuned as the Ascension is retuned (by 5s?) in Revelation 5:12 to 7:12, thus we have new days of week. #9. Ask yourself, should we have new days of the week names, since there are more days?
- Pentecost. Africa and the Global South is the future. South America going Protestant more rapidly than Europe during the Reformation. Jesus appearing to Muslims in dreams. China on pace to become the world's largest Christian nation. Google Translate, Reverse Speech. #10. Evangelize migrants in their languages. Do Urban Nation on larger scale.
-
- A.D. 70. #11. Because it fits into the Biblical pattern of the old house (Garden Ark, Tabernacle...) being destroyed and a new one erected, remember that the Greek Scriptures are building instructions for the whole Creation, and act like it.
-

Eternal Condition, Already and Not Yet. #12 Because the creation is not fallen, because Christ has overcome the world and is King, having all authority, act as if you are already heavenly beings in the Council, and pray and act like it, knowing that present condition will pass, and that each will be judged at the End of Days.

- 'Thus saith the Lord' Comprehensive Imperatives 2025
- This beats various 'declarations', but addressing specific issues may be necessary
- The importance of the imperative cannot be overstressed
-
- To be comprehensive, conflate the Decalogue to the Beatitudes.
- Use JBJ's 5 & 8, 6 & 9, 7 & 10, schema (Protestant version. That gives you 7.

- 8 is Resurrection and 2 persecutions, 9 is Ascension, 10 is Pentecost, 11 is A. D. 70 (celebrated 70th after Easter when LCM worshiped in German) 12 is already-not-yet Eternal Condition.

- Do this and you won't be chasing after fads.

- Dear Travis Finley I got 'Inner Work' and a couple of thoughts (among many) from 'Steiner Time' today. Steiner taught about the time between waking and sleeping. I think the brain works differently then, NOT that we speak with the dead then.

-

- I'm thinking one of the points of Jung is that the collective unconscious make us do things, 'acts us' There's more to know.

-

- I adduce only 2 of many on this: 'The God Problem' by Howard Bloom hold that from the smallest sub-atomic particles to the largest, all is divided into explorers and consolidators. We're included.

-

- Second is Reverse Speech @David Oates.

- Children speak in reverse first. Metaphors. He has tapes! And Reverse Speech is metaphoric. He has a dictionary. When what one says forward fits with what one says backward, one is congruent. He finds congruencies where one would not think he would.

-

Both of these are hidden in plain sight, like Jung. Please continue to post your findings.

Both/And Logic Needed. 1--Goedel 2--Sheffer Stroke (not both the one and the other, from which all Russell's and Whitehead's 'Principia Mathematica' operators can be derived---and, not, or, if then, if and only if, BELIED be the basic articles of Creeds. 3--We need a Christian logician (Goedel was Lutheran--that's good) to do a both/and logic: BOTH the one AND the other. Or has this been done?

- What musical instruments to respond to God?
- Why rhyme?
- We should respond to Him as He initiates to us?
- Psalm 150 lists instruments.
- But the Holy Spirit gives more.
- Thus, if we use the pianoforte, or organ, that's OK.
- It's OK as long as we properly acknowledged.
- As priests we respond differently.
- As kings and prophets we should respond even more differently.
- Priests first.
- God rarely rhymes.
- He unifies by the number of times a word or concept is used.
- Jordan's work on Psalms is an example.
- He bolded.
- We should then use one of the Psalm 150 instruments at boldings.
- Sadly we ask where the Psalms are.
- Jordan was informed by Cassuto, influenced Cassion.
- As Cassione-ization of Psalm 117, with 150:6 and be done.
- There are 5 commands to praise, 6 praisers, 7 Praised, KJV>
- Thus praise phrase can be at the top 3 of 7.
- Praisers could be middle note.
- Praised could be bottom 3.
- The Twelve (minor prophets) as a unit have 4 in non-chronological order first.
- The last 8 are chronological
- Is this a way of showing the descent to earth?
- (New Bible Commentary is a source.
- Now, Kings.
- Be like Solomon, apply the principles.
- the case is One baby, two harlots.

- Be sure to say so in introduction.
- Prophets are even freer.
- Yet do all 3, for you need to know whence you came.
- If you know what you are doing, you're OK.
- If you don't know what you are doing, you're in trouble!
- The sentence was invented. (Leithart 'Solomon...')
- So was rhyming. So was the 3-syllable ending of Psalms.
- The Bible unifies in other ways.
- Get Jordan's Psalms work, with bolding.
- Do it once a service.
- Thus you will 'eth', aleph to tav, do A to Z, build omegalphacity.

- Thought on Psalm singing--since Gregory is long enough?
Demonstrates Hebrew Cadence in the WHOLE Bible. It's the number of times a word/concept is used in a Psalm or passage. Using instruments in Psalm 150, these can be 'played', for instance by cymballing each time. Helped by JBJ.

- Yes, pray for peace.

- As Sun Tzu said 'The ultimate victory is to win without the other fellow know there's a war on'

- What wars are 'we' in--4th generation, 5th, more...?

- After Nap and massed armies, came 2nd artillery, then third, tanks. 4th was the cancelling of Westphalia (only nation states) fifth may be nets (networks) and jets, then there are psyops, etc.

- Remember though, that 'The devil is God's devil' and that GodTrinity chastizes those He loves, and that the Redeemed fight (different) Holy Wars for their maturity.
- GodTrinity drags us into His future, change us, and as we are torn in the present between the past and the future, the in and the out, our howls become music, and we the singing song. A hero is one between time, the proagoist, the first sufferer, helping explicitly reconciling opposites in necessary contingencies.

- Microstrategy's been very good for me.
- I'd like to give teh \$47,000 increase this year to Theopolis, but I'm not sure how to do it.
- Mises Institute has someone dedicated to making transfers. I'd need that.
- You, of course, can do what you want with the mone, but here are some thing I'd like.
- 1--Get JBJ and his books together.
- 2--Handle the donations to 3 ministries in Africa.
- 3--Do something with Adullam Bible Institute and Elisha Nehemiah in Africa (on Facebook, he has a 'Biblical Law Practitioner' among his many courses. Facebook He wanted to support my Maimonides and Hartman through Meyer's 5 plan.
- 4--Start an electronic free book service, like Mises, with 'Contagious Disciple Making' and my brother's 'New Testament Imperativity'.
- 5--If I could get hold of JBJ's Psalms work that he sent out to monthly donors, that hadthe significant number of words/concepts bolded, that'd be good.
- 6--If John Barach or someone could make my work sensible, I'd appreciate it. I was very sick for two years when I wrote it. It is a 'New Abrahams' thing. I used your 'Elements' to show how one could sing Galatians and proleptically encompass (march around) the congregation, tabernacle-wise, as amening that we are to disciple all.
- 7--I know this is much, but it would be more valuable than my 3-generation effort with godparents and grandchildren.

- Past 30 Years. Past 30 years--what's changed? New technology, per 'Abundance' and Peter Diamandis. 'His 5 Ds. The Jim stuff is good--another way of Psalm singing, and his books to him. And the 'New Abraham' 1000-year deal is a 3-generation project anyway. But a book a week in addition avoids 'doctrine' and could be unifying. The LCMS when they worshiped in Gaerman celebrated A. D. 70, so liturgy through the year conflated with historical evens isn't bad. To sing each book and proleptical tabernacle tour it could be valuable. I'm one of the few who can do a 42x4 of history, and the 12 small enthusiastic groups to start ain't bad. Add:'New Abraham

- Let's sing Samuel! It's easy
- It's 3 generation.
- Start with Bullinger.
- Arrange pastor in center front.
- If you use pews, 'chiasm' it toward and away from pastor.
- Proleptically encompass redeemed congregation as tabernacle, through shewbread and lampstand and back.
- Aaronic blessing.
- Pastor greets all as the leave through altar/prayer/cross--opposite HOH.
- Singing and candle extinguishing make 4 graces.
- BUT IS THE WILL THERE?

Yes, extravagant. Soon I'll forward 'Just entering my prime' in which I propose the the letter-words of the First Word (B, R, SH, T) are a proto-liturgy conflated with Acts 2:42 and giving 42 (!) instances should help compose 'the opera of history' that responds to singing the opera of each boo, a theodicy. It's 'the most important thig I can do at which I would be most difficult to replace' 3 generations at least.

-
- The 4th part of 'The Next Thousand Years A Prayer' is the Opera of History.
- It responds to the singing/marching/opera of each book of the Bible.
- The books are structured. Anything structured can be music.
- It informs the 12 Small Enthusiastic Groups of the next 1000 years.
- I list 42 in each of 4 categories. Freom 'bereshith' through Acts 2:42.
- I'm not publishing yet because they still need work.
- I've been much helped by General Purpose Tedchnology on wikipedia.
- GPT lists technology that greatly impacts society.
- However, individuals, ideas, and insstitutions are important, in addition to these inventions.

- I'll report more later. My mind works serially.
-
- Love in King Jesus,
- Chuck
- PS: opera is more comprehensive than Rosenstock's symphony,
- PPS: We'll have a 4-note response, like Beethoven's 5th--it will not necessarily be chronological.

PPPS: Bullinger and Dorsey are big helps.

- 'The Christian Era is when liabilities are turned into assets': Rosenstock again.
- So, could mass 'illegal immigration be turned into as asset, despite 'government'?

For extra points use Dorsey, Bullinger chiasms and sing the whole book, singers in pews.
Congregation as Tabernacle is proleptic of whole world converted.

- Feasts=> Liturgy How Tabernacles?
 -
 -
 - The others are easier, but...
 - Before the Aaronic benediction, Pastor stands in the well and enunciates the center of a book (JBJ's 49)
 - and walks around the congregation through Table, then Lampstand, ending up back there.
 - After the benediction and during the singing, he moves to the altar (again, in the Tabernacle) and blesses the living sacrifices (shaking hands, our seeming equivalent to a holy kiss) as they go out as Purim.
 - Thus we have 4 'Good News'--the singing (glorified speech), the Aaronic, the living sacrifices, and the night-to-day extinguishing of the candles.

Add 'Chinese' history to 'Opera of History'

This book by 'Spengler' on China is very valuable. I Recommend reading starting on page 119 for a summary, and especially pages starting at 216 about trust, ending at 219-220 about the infinite worth of each individual. Other parts are very good too, e. g. the meritocracy. the CCP as a continuation of Empire mandarins, that only 1/10 of Chinese can speak Mandarin, the innovation is 'our' key, etc. 'You Will Be Assimilated' by Goldman (The title...I think it misrepresents the book) https://www.amazon.com/You.../dp/1642935409/ref=sr_1_1...

--

- JBJ's Psalm translations important--anyone have them? These are the ones sent to monthly contributors. I didn't keep mine. They bolded the words repeated a significant number of times, and showed better structure. 2

SF bests also show why. Benford's 'Sigma Structure Symphony': Music as mathematical proof? '...Mozart..music of joy... ' '...Bach...music of glory...' '...emergent patterns in mathematics that you translated into what our minds best see as music.' (This was a story about translating form alien artifact. Also in Popke's 'Sudden, Broken, and Unexpected' there's this: '...music tied together into the history of a person...' I thought of Rosenstock's autobiography of western man and symphony of history. So when we use Hebrew Cadence (Cassuto, Jordan, Cascione) with JBJ's Psalms, we get comprehensivity. Chuck

- Host A 67 American History Community => Health

-

- If I don't do this SOMEBODY should
 - Community => Health
 - Based on Gladwell/s 'Outliers' and Roseto Effect
 - Roseto effect - Wikipedia
 - en.wikipedia.org/wiki/Roseto_effect
 - The Roseto effect is the phenomenon by which a close-knit community experiences a reduced rate of heart disease. The effect is named for Roseto, Pennsylvania.
 -
 - CONCEPT: Teach American History in high school, using community members as exoerts.
 - Write a book. Put it on 'YouTube'.
 - Make money with membership site. Distribute the wealth
 - To school employees, school board, experts, and students too.
 -
 - Divide the period 1620-2020 (400 years) by the number of students. Each studies an individual, institution, Idea, or Invention with its predecessors and successors for the class. Also use before 1620 (especially 'America B. C.' by Harvard prof Barry Gell, and for after, mention Kardashev (Civilization 1, all the energy of the planet, 2 = solar system, 3 = galaxy). And more... Key book would be atheist Howard Bloom's 'The God Problem'—from subatomic particles on, explorers and consolidators. Has good history of science. All Jordan' 'Through New Eyes.Great Christian.
 -
 - The textbook with its quizzes is assumed to be read, and is basis for grades.
 -
 - For the after 2020, add futuristic fiction and non-fiction. For before 1620 add Cremo, Hancock, Velikovsky and more. Studens would have questions written for experts, experts would have 1-pagers made, parents would be encouraged to present. 'No battle plan survives first contact with the enemy' So too for marketing plans and market.
 -
 - Examples: John Wesley for Awakening, Newspaper-Ben Franklin, etc. Horace Mann.
 -
 - The key emphasis would be First Amendment, especially freedom of speech. And 'doers'.
 -
- Teenagers who made history would seque into treating students as participants in book writing.
- Extensive use will be made of General Purpose Technologies, especially by asking what would a 'super' one be like. General-purpose technologies (GPTs) are technologies that can affect an entire economy (usually at a national or global level).[1][2][3] GPTs have the potential to drastically alter societies through their impact on pre-existing economic and social structures. The archetypal examples of GPTs are the steam engine, electricity, and information technology. Other examples include the railroad, interchangeable parts, electronics, material handling, mechanization, control theory (automation), the automobile, the computer, the Internet, medicine, and artificial intelligence, in particular generative pre-trained transformers. (Obviously, each would become class expert on a chapter or two, a document).

What would be 'super' electricity? 'Super' automobile?

- Couple More 'Too Radical' Things
- 1--All we have in COMPREHENSIVITY, Goedel destroys non-contradiction/logic. Shroedinger's cat destroys correspondence. That's why it is so important to sing as the Bible does. So I double down on Genesis 1:1 sing per Psalm 119 as 3 sevens/scales. We should

'sing as the angels sing'. And that's why my Psalm 117 (150:6 kjv) run through Hebrew Cadence is important. Cassuto-Jordan-Cascione. RHYMING IS GOOD, BUT FOR COMPREHENSIVITY WE NEED Biblical tunes. Use Psalm 150 instruments too. New Jerusalem Bible's English acrostic is valuable.

- 2--GOD WROTE BOOKS. Lectionaries/Confessions are good, but JBJ's 49-book Bible written on the year is now needed ALSO. 66 has connotations, 73 is at least a prime. More to come. Chuck

Both not both the one/and the other and both the/one and the other. We confess 3 AND one, both God AND man, not the Sheffer Stroke of 'not both the one and the other' which all 5 of Russell's and Whitehead's 'Principia Mathematica' uses for all mathematics (and, or, not, if-then, if-and-only-if)

- Early Days For Languages David Oates
- 1—JBJ says we'll learn languages—God is word, Languages—in Heaven.
- 2—Leithart ('Solomon Among the Post Moderns') says the English sentence was 'recently' (1000 years) invented, and punctuation was a lot for music.
- 3—Hebrew had no spaces between words, no vowels, etc. 5/6 of the Bible. Recent.
- 4—JBJ says Hebrew was mostly voices (modes, stems). Few tenses
- 5—Oates ('Reverse Speech') has recordings of infants first, first, recordings, speaking backward, in Reverse Speech.

- 6—Some languages go left to right, others right to left, some up and down.

- 7—Revolutions beget are begotten by new words, names—Rosenstock.

8—It's early days. ERH has history going backward through Bible (start Gregory VII) and through person's ages (end, Soviet adolescent) and history (start, Aquinas and Aristotle).

- General-purpose technologies (GPTs) are technologies that can affect an entire economy (usually at a national or global level).[1][2][3] GPTs have the potential to drastically alter societies through their impact on pre-existing economic and social structures. The archetypal examples of GPTs are the steam engine, electricity, and information technology. Other examples include the railroad, interchangeable parts, electronics, material handling, mechanization, control theory (automation), the automobile, the computer, the Internet, medicine, and artificial intelligence, in particular generative pre-trained transformers.
-
- In economics, it is theorized that initial adoption of a new GPT within an economy may, before improving productivity, actually decrease it,[4] due to: time required for development of new infrastructure; learning costs; and, obsolescence of old technologies and skills. This can lead to a "productivity J-curve" as unmeasured intangible assets are built up and then harvested. [5] Impending timeframe to utilize the latent benefits of the new technology is deemed a trade-off. Spin-out firms/inventors from organizations that had developed GPTs play an important role in developing applications for GPTs. However, it has been observed that the level of cumulative innovation in GPTs diminishes as more spin-outs into application development occur.[6]
-
- Historical GPT according to Lipsey and Carlaw
- Economists Richard Lipsey and Kenneth Carlaw suggest that there have only been 24 technologies in history that can be classified as true GPTs.[7] They define a transforming GPT according to the four criteria listed below:
-
- is a single, recognisable generic technology
- initially has much scope for improvement but comes to be widely used across the economy
- has many different uses
- creates many spillover effects
- Since their book, more GPTs have been added for the 21st century.[by whom?]
-
- A GPT can be a product, a process or an organisational system.
-
- Foundational

- The earliest technologies mentioned by Lipsey and Carlaw occur before the Neolithic period and have not been cast as GPTs, however, they are innovations that the other 24 rely upon.

-
- GPT in military and defense-related procurement
- In his book, *Is War Necessary for Economic Growth?: Military Procurement and Technology Development*, Vernon W. Ruttan, Regents Professor Emeritus in the Department of Applied Economics at the University of Minnesota, examines the impact of military and defense-related procurement on U.S. technology development.[9] Ruttan identifies the development of six general-purpose technologies:

-
- Interchangeable parts and mass production
- Military and commercial aircraft
- Nuclear energy
- Computers and semi-conductors
- The Internet
- The space industries
- Based on his reading of the histories of these technologies, Ruttan finds that military and defense-related procurement has been a major source of technology development. He believes that the current technological landscape would look very different in the absence of military and defense-related contributions to commercial technology development. However, from his research, Ruttan determines that commercial technology development would have occurred in the absence of military procurement but more slowly, e.g., the aircraft, computer, and Internet industries. He cites nuclear power as an example of a general-purpose technology that would not have developed in the absence of military and defense-related procurement.
