ABSTRACT

Abstracts are written in one paragraph, should be informative, and accessible, and the maximum number of words is 250 words, including :

Phenomenon/Issue:

Purpose:

Novelty:

Research Methods:

Results:

Research Contributions:

Written using Times New Roman 10 font, 1 space, and italics. please do not include references in this abstract section.

INTRODUCTION

ng of article scripts. Authors can prepare the manuscript in a separate document for later copy and paste into this document. Automatically, the author's manuscript will be adjusted to the format that has been created in this document, then saved in a new file.

The introduction presents the background of the theme or title, novelty, and the systematic role of the chosen issue. the article is written with 11 Times New Roman letters, justify aligned, and spaced 1. The introduction to the bibliography is written in one column with a distance between columns of 1 cm. A4 paper size with normal margins. For the sake of convenience, the article writing pattern should follow the instructions presented in this template. The number of article pages is a minimum of 7 pages and a maximum of 17 pages.

LITERATURE REVIEW AND HYPOTHESES DEVELOPMENT

The literature review contains a critical review of the existing literature that supports the major themes discussed in this article. This sub-chapter should be able to conclude that the topic in this article was chosen based on a careful and in-depth literature review. In the text, citation refers to the APA pattern (www.apastyle.org). Citations should be written with the help of reference software (Mendeley, End Note, Zotero, etc.).

Hypothesis development is used when scientific articles use quantitative research

Hypotheses are written in each discussion of the influence between variables as in the example below.

H1: Inflation has a negative effect on the Composite Stock Price Index for the 2012-2016 period

Figures, Tables, and Mathematical Equations

Images and tables that are needed can be displayed between text with a position in the middle and do not exceed the margin of the text that has been determined. The maximum number of figures and tables included in the article is three each. Each figure and table is numbered and titled. The title of the image is placed right below the image with Arabic serial numbers as in the example in Figure 2, while the title of the table is placed right above the table as in the example of table 1.

Source:

Figure 1. SALES PROJECTION

Tables or images estimated to require more space can be presented in portrait form or on a separate page. Tables or figures should also not be interrupted on one page and then continued on the next page. Tables or figures must be described by mentioning the table number or figure number. The

explanation of the table or figure is endeavored to be on the same page as the page where the table or figure is presented.

Table 1.
RESPONDENT CHARACTERISTICS

Information	Frequency	%
Bachelor Degree	20	21.5
Senior High School	37	39.8
Junior High School	15	17.4
Total	72	100

Source:

If the manuscript contains mathematical equations, the writing of these equations should be Microsoft Equation Editor or the Math Type add-on (<http://www.mathtype.com>) for equations in your paper (Insert | Object | Create New | Microsoft Equation or Math Type Equation). “Float over text” should not be selected. Mathematical equations must be described by mentioning the equation number. The explanation of the mathematical equation is attempted to be on the same page as the page where the equation is presented.

$$Q^2 = 1 - (\sqrt{1 - R_1^2}) \times (\sqrt{1 - R_2^2}) \quad (1)$$

METHOD

The research method describes the type of research, the method of data acquisition, and data analysis. In the research method, it is not necessary to include the definition of the assumption test that is used.

RESULTS AND DISCUSSIONS

This section presents the results and discussion of the research results. Various theoretical and/or practical implications should be presented.

CONCLUSION

This section presents the study conclusions, study limitations, and recommendations for future research

ACKNOWLEDGMENTS

Enter the following information here: 1) all funding sources; 2) collaborators and/or core facilities contributing to the work.

REFERENCES

All references referred to in the text of the article must be listed in the references section. The references must contain references from primary sources (scientific journals) that have DOI numbers and make up at least 80% of the entire bibliography published in the last 10 years. Reference writing **must use reference management applications** such as **Mendeley, End Note, Zotero, or others**. The writing format is the APA (American Psychological Association) 6th Edition format (www.apastyle.org).
