

Day 2: July 30<sup>th</sup>, 2019

Dear Parents,

Welcome back to day 2 of this program! I am loving getting to know all of the wonderful things about your children.

Today we learned some more definitions and some data structures when it comes to programming. We talked about lists, loops, and decisions Yesterday they worked on a madlib program and today they completed a snake game.

At the end of this course your child will have completed a final project using everything that they have learned. Currently, I am thinking an alien invasion games but I like to give the children some free reign. Feel free to talk to them about a (realistic) game they might want to code. As much as I would love to code something like fortnite we dont have the time. If you child does not want to code a game have them talk to me and we can work out another idea! Everyone has different interests and I want to tailor this class towards them.

As always if you have concerns or questions please reach out. My email once again is: [browermb@dukes.jmu.edu](mailto:browermb@dukes.jmu.edu)

Sincerely,  
Maddie Brower
