In terms of children's learning, what we find is that technology, when it's used well, can provide a seamless experience between the classroom and between learning at home. Which is fantastic when it comes to partial school enclosure, remote learning. But it's also an enormous support when it comes to home learning of any kind in the classroom. Teachers are able to use technology almost like another member of staff. If the children know how to use their devices well, they can be getting on with their learning independently.

While the teacher is supporting children, individuals or in groups to catch up to keep up with the learning. In terms of school improvement, we find that technology has had a huge part to play in enabling teachers to work collaboratively together. It no longer matters whether you're in the same building. You can plan together. You can learn together.
