

## Open Letter to *We the People*

### Dear Fellow Citizens: Our Unfinished Urgent Call of 1776 Founders

The opening declaration of our Declaration of Independence calls for a profound separation from any political codes or bands that compromise or violate our innate dignity, independence and freedom.

These opening lines of our Declaration begin with the Self-Evident Truth of our human nature and the Sacred Endowment of our Infinite Source- declaring that we form governments to serve and protect this profound Human Endowment.

At the same time this Divinely Inspired Foundation of our Human Rights and Responsibilities is found to be in consensus with the collective wisdom of mankind.

This consensus of the Wisdom of the Ages flows forth from the Universal Light of Reason, from the Unifying Force of Infinite Logos. This is the Source of Self-Evident Truths, hence of the Origin of our Human Dignity: Life, Liberty and Well Being.

Our Founders were thus not just expressing their “personal beliefs” and “opinions”, but tapping the Foundational Truths of the Universal Light of Reason.

In this Light of Reason they insisted we must “separate” from any form of political life or governance that compromises, inhibits or violates our Inalienable Rights as Humans.

This Infinite Logos is the Source of all life, all existence, all worldviews, cultures, religions, belief systems and forms of life. As such Logos is not just another ideology, religion, worldview or “belief system”. This Universal Light of Reason (Being, Reality, Truth) is the *UnumPluribus* Law governing all there is or can be, and is the Law governing all Human forms of life.

And the Consensus of Wisdom Teachings through the Ages concur that when we Humans are separated or alienated from this Source of Life we suffer wide ranging personal and collective dysfunction and pathologies. Hence the Wisdom of Logos calls on all Humans, all Persons to separate from derivative life codes or mental processes that violate our Innate Human Nature, Dignity and Freedom.

The Logos Inspired call of our 1776 Founders to separate from any cultural or political forms of Life that violate our Personal and Collective Independence, Dignity and Freedom in Self Governance is grounded in this Call of Logos to evolve and mature as Rational Beings flourishing together in Well Being.

In this Light it is clear that authentic Self Governance begins with each Person coming to terms with this pervasive Logos call to separation from dysfunctional patterns of life which violate or compromise our Dignity and Freedom as Humans.

It has become painfully clear in our continuing Holy Experiment since our 1776 Founding that We as a People have not yet performed that all-important separation from cultural and political dysfunctions, and have not yet emerged together as We the People, One Nation under Logos, Indivisible, with Liberty and Justice for All.

With recent events it has become starkly clear that our “Democracy” is in grave danger and we remain lodged in chronically entrenched patterns of ideological battles, cultural fragmentation, culture wars and civil strife. Our Holy Experiment to become We the People thriving together in the Land of the Free in a true Republic remains in profound existential crisis.

So the primary issue before us now is whether we can or will fulfill the urgent Logos Call tapped by our Founders in our Declaration of Independence from pathological patterns that alienate us from healthful Self Governance in the Light of Reason that opens the way a more perfect *UnumPluribus*.

I call on my Fellow Citizens to face this issue with highest priority and urgent care. And this call of our Founding Ethos must resonate in all local Communities and for all Citizens across the USA. Have we Personally and Collectively faced this most urgent existential challenge? Our survival and future turn on this now.

And here in Philadelphia I pose this question and challenge to my Fellow Residents. Are we ready, willing and able as Citizens in the Light of Logos to rise together to manifest and embody true and authentic Democratic Self Governance? Does “Philadelphia” have the Human Rational and Spiritual Resources to fulfill our Founding Ethos and shine forth in our Holy Experiment to be a City of Light for our Nation? Can we rise together as a New “Philadelphia”, a City of Brotherly and Sisterly Love?

This must be our primary concern as we prepare to “vote”: this is our Moment of Choice.
