

Playtech have begun the “soft” launch of new online poker and **Agen Slot** software they have developed. Titled iPoker the product has been launched by using it for some play for fun, not money tables in the last week. The software can be found on Clubdicepoker.com, FairPoker.com, Noblepoker.com and SIACasino.com and soon at UK company Betfred

The iPoker game allows either a 2D or 3D version of the games to be played, with the 3D option having actual characters who change expression Togel Online during the course of the game. The software also has tournaments for players who want to enter at that kind of competitive level- including one on one options, private games which players can organise with their friends, multi-table tournaments, a knockout version and an add-on/rebuy version.

Playtech is one of the newer software providers in the online gambling market. Based in the Netherlands it is developing a strong reputation for the advanced technology they use, as well as the good speeds for downloading their products.

Prior to iPoker, their most recent launch was a new blackjack game, which introduced the function of playing two hands simultaneously, and allowing a player Togel Online to swap cards from one hand to the other if they feel it is advantageous to do so. They already provide software for a whole range of casino games, encompassing all of the traditional table and video games.
