### Andrew Naegele

Honestly your dedication to this is unrivaled... I've been in a lot of courses and purchased a lot of online products, 90% of which had some sort of a telegram/discord/signal, which is usually worthless. I've never had a single teacher/mentor as active or as committed as you...

They typically show up once a week for an hour (MAX 1.25hrs) and then a Facebook group which usually is 99% peer-to-peer rather than the people you actually paid to get guidance from...

And it's not just this active trader group... I mean, this is absolutely amazing and you are extremely helpful, but it's also Mike and Moonstream as a whole.. even with the number of people that are in Moonstream you and Mike both make it a point to personally respond to a lot of the questions that people have and almost always end up going to 2-3+ hours on a webinar or zoom or whatever thats supposed to be just one hour.

As someone who's thoroughly familiar with Digital Marketing and the value of an honest and Positive Video or Written Testimonial, if you guys ever need one for this service or for Moonstream as you grow and decide to take on more people - I'd be happy to give you one!

I second andrews comment - I've had a few others myself and none as active as you all - not even close - which is why I ask so many questions! Lol so nice being heard and answered!! THANK YOU!

Hope I didn't scare everybody away from commenting. Anybody happy with the nice wknd gains from ADA and MATIC? AMP is starting to breakout of it's trading range, as I've been sharing this past week.

Loving 62% gains on MATIC, 40% gains on ADA, and 30% gains on ATOM! 70% on SOL...

Plus some of my own wins... Up over 60% on NMR, 57% on HOT, AND 100% on LRC! Does it get any better than this..

Its definitely amazing so far and love getting all the info and its super valuable... I've tried paying for everything 100% with earnings from Crypto and thus far have been able to do so... So as long as that continues to be the case for me its a definite no brainer. Thanks for everything... definitely not a complaint - just curiosity is all.

Yes I am new! I have been messing with it little by little and got tired of winning big then losing even bigger. Then I found Moonstream! 😭 so I'm trying hard to learn so I can make money of stead of losing it! I'll Google it cuz now I'm curious.

By the way thank you guys for having the courage to join. It was a great time and I don't know that we'll see these kind of market set up conditions again anytime soon so kudos to all of you.

Thank you for doing all of this! I had a very expensive afternoon, but I am definitely looking forward to making great use of the investments here! Without your guidance, I feel as though I would continue to buy monthly recommendations, but not really capitalizing on my investments the way I hope to!

Brett and Myrene, I have been in a lot of groups and traded day and swing for many years but your timeliness, should receive an A+ plus rating. I have been with Larry Williams, trend fund, base camp, And some private groups but you too excel!

Thank you, Brett! I can't believe how much money I have already made by joining the group for few days. I appreciate your alert on ATOM! Some beginner's luck and your guidance has made this happened. I can't wait to see what the future holds after I finished all the courses! 🍀🍀🍀

All very turbulent. Took 31% from atom earlier with a view to getting back in lower, obviously took my eye off the ball for too long. Only small amounts but very pleased. Thanks to Moon stream.

Wow looks like I missed getting into REN but hopefully some of you caught it. I did buy FTM yesterday though and it's ...

I started paying attention to it two days ago. Today, I sold 1/3 of my coins at \$1 with a 51.52% in profit 😊

I'm glad I saw it. I picked REN as an experiment to apply everything I learned from your videos. Thank you, Brett!!

Thank you @bjfprivate for your guidance again! I have exited out most of my BTC and sold at the top. Now I will wait patiently to entry and not catching falling knife. Getting in this group is one of the best decision I have made for crypto investing. Thank you thank you 🙏

You sound like an infomercial 😂 but I hear ya - I've made about 35-40% overall since joining 2 months ago. Which is huge compared to what I was making in the stock market.

Brett, I'm so grateful for this group. I have learned a lot about trading, read charts, indicators amount other things. Money's essential and is the reason why we are here. But, knowledge is priceless. I have gained so much knowledge, which translates into confidence when deciding which coin to buy and when. Thank you, Brett. I would support the group for as long as I possibly could.

Brett - I've only been part of this group for a few weeks now but I can honestly say that Active Trader has changed my life in a positive way. Instead of just telling us what to trade, you are teaching us what to think about when looking at the charts and indicators. You're sharing your thought process with us so we can think critically about what we're seeing. This has allowed me to minimize my trading risk and see returns that I would never have without your guidance. Also you are kind and patient in your approach, which is very much appreciated. I've learned so much and am excited to continue learning, thank you for everything Brett!!

Hey Brett, sorry for delayed testimonial (U.K. time and baby duties)

2 weeks into this group and am getting a handle on things, So much insight to trading & how to navigate charts and the crypto market.. armed with knowledge and a great community, my confidence to trade well has grown exponentially In this little time, the main thing I'm learning is to not give into fomo and to not impulse buy and there's always opportunity.. I've made some huge errors before the training and no doubt will make others but but at least I'm gaining the knowledge to risk assess, minimise losses and maximise gains. From passenger to pilot, I'm definitely on my way, I'll meet you on the moon (or in a tiki bar). Thanks for all that you are!!

Mike

Mike and Brett I have traded for a long time, From bonds with Larry Williams to Forex futures crypto. I recently retired and I have held bitcoin coming up on eight years in February as a HODL. Mike and Brett approach crypto from different perspectives One being what do the charts say for today and the other what do the charts say 5 to 10 years from now with the same ultimate goal. I have learned a tremendous amount from both of you. So I have a longer-term goal living off interest from Mike and I am making money each weekWith Brett trading alts. The proprietary indicators are a must have and the passion and teachability that Brett brings to the table is unmatched. Thanks guys for teaching us how to fish!

I joined active trader about 6 weeks ago and am loving the community and Brett's clear teaching style. He does a great job demystifying the charts and helping us move from being emotional buyers and sellers to becoming strategic traders. I no longer feel like I am doomed to continually buy the tops, sell the bottoms and miss all the best trades and am learning the importance of capital preservation and letting the market come to you (no, you did not just miss the only opportunity, there are or will be others).

I'm still making mistakes but I am definitely less emotionally driven to panic buy or sell and am learning all the time. Thanks Brett and everyone in the group for the insights, fun chats and support.

I used to panic sell .. but with this group and moonstream helped me go through...

I'm extremely grateful for Moonstream Active Trader as well.. Because of the conversations we have had and the talks about the potential for this large dip. I've been largely in cash for the last few days/week. It saved or as Brett likes to say "Preserved" a lot of my Capital. Moonstream Active Trader Mantra = "Preservation of Capital is our number one priority"

Appreciated all of it 🙏

do we use the information provided by the

Hey Brett, no problem.. just read Andrews message and saw this too.. just need to make sure I can log in and watch the replay from today, if I can pick up from where I left off then all good.. no harm done. Don't want to be without active trader.. been a life line for me and a very steep learning curve, I owe it to myself to stay. Will check emails etc.. Cheers! And yes my senses are all glued to the next move.. keep getting little bouts of fomo on these bounces as ultimately I'm trying to accumulate btc and currently in cash.. at least I've learnt to stay out when in doubt.. thanks for the continuous guidance... this is a journey I'll never forget and will be telling the grandkids one day 🤔 (would obviously like to come out on top)

Thank you for another great moment for learning. You never miss an opportunity to teach the nuances of reading the charts. That is what makes you and this group so special. And it is very kind of you to spend time to explain this to me. Very much appreciated.

5:12 PM

The only reason I brought this up is that I was looking at the dots and not the lines when scanning through my rather lengthy basket of coins. I would magnify the TSI indicator if it looked critically close to the 20 line. But I noticed that I was usually about 2 days late when the cross occurred. This has been an excellent learning experience for me and your graphics illustrate just how excellent the indicators perform. This is really the cat's meow in trading indicators! 🐱

I Just want to give a huge thank you to the M3 crew and all it's work. Brett, your constant reminders, whether it's setting SLs, ERI TSI Signal Bell, take profits when profits are to be taken, all the little messages are ringing in this noggin. As I check my earnings instead of seeing the profits drop and not taken; I am met with delightful profits taken thanks to SLs. I did some accounting on my spread sheet and it's a major difference compared to when I wasn't in M3. Now, onto mastering the skill of "fishing". And 🚀
