

2026 ALBERTA SOIL SCIENCE WORKSHOP

Request for Travel Assistance for Students

The Alberta Soil Science Workshop has budgeted limited funds for travel assistance to encourage graduate and undergraduate students to attend the Workshop, in Olds, Alberta, February 17-19, 2026. The travel assistance is designed to help cover a portion of the costs of travel and accommodation while attending the workshop. It **can't** be used to cover registration costs. The amount of assistance is a maximum of \$150 per student and the amount awarded is at the discretion of the workshop committee based on student participation. Successful applicants will be announced at the Workshop and e-transfers after the workshop.

The Alberta Soil Science Workshop encourages students to make presentations and offers awards for student presentations. The annual meeting provides an excellent opportunity for students to present research ideas and results at a scientific meeting among peers, to network with other researchers and to meet potential government and industry employers.

Submit assistance requests by sending this completed form to soilsworkshop@gmail.com by the submission deadline of **December 21, 2025**.

Name: _____
