

Medication

- Students needing medication while at school must have a statement of permission signed by the parent **AND** a statement from the doctor with directions for administering the medications.
- Permission forms are available in the office.
- A labeled bottle with the student's name, original prescription label and current date is required and must be kept locked by school personnel.
- Medication will not be sent home with the student at the beginning of a holiday or at the end of the school year. An adult must come by and take the medicine home.
- A parent or guardian will need to bring non-prescription medicine (tums, cough drops, etc.). A parent note needs to be with the medication giving permission to the nurse to administer the medicine.
