FORWARD

It's taken me 30 plus years to research and innerstand the truth of the nature of humanity and why we are here. Everytime I thought I had 'THE BIG PICTURE', I got a gut feeling that I was just not there yet, something was missing. If you are one of those that are appalled by the title, then this book just might not be for you…or is it?

You can decide for yourself, as we each search for TRUTH, and what is really going on in this place we call earth.

This book was written, not so much in chronological order but you can skip around if you want, it's how I created it for people like me who like to flip the pages and see where you land…as a message or insight you might need to read. Truth will set you free…as it has for me but not until it's finished with you. And that is when you no longer question, so do the questions ever end? Feel the truth, it's inside you. You just gotta dig….dig away my friends with me. Truth is the first casualty of war.

QUOTE: "The radiant light of our unfettered awareness relies on truth rather than opinion. Like truth, opinion strives for truth but gets captured by dogma and perception of truth. So let our lives be led by truth and not opinion."

Shout outs:

Shout out to my friends, to my frenemies, and to anyone who led a life thinking you're on the right track but find that you are lost….ain't no one driving this ship any more. Last but not least to my family, to the ones that called me crazy or caused them so much pain as if I was anything more than the flavor of the week. Finally shout out to the future me who finally got it right, I know you did ... .and hopefully the rest of them got it too.

BIO

Grandmother, Mother, MUSE and jackie of all trades. Graduated from the college of Life Experience and overcoming challenges of this realm of the mind trap called the matrix. I was born in Kansas and have had the adventures you might think was something from a movie but I assure you it's all true and it forced me to look at it all being a big picture person to search, research and create from the sacred space. To not get lost in the abyss of pain and suffering, the illusion, the matrix.
