

Convincing People or the Planet

Many people have asked me recently how I plan to convince humanity about our mission.

The answer is simple: I'm not.

Neither is GOD. He doesn't push or force anyone into believing anything. He wants people to realize and act on their own, and this mission works in the same way.

Realizing It and Taking Action

Our project is a two-step process: **realization and action**.

Those who "get it" are welcome to work with us in any way they want. For those who don't, they will have the opportunity to see our results and understand that this project is very real. After they see the actions and results, some will open up, understand, and perhaps jump in.

It is very difficult to use plain words to explain something to someone who might be closed-minded.

A Project Based on Intuition

Our project is all about **intuition**. We use words and images to convey our message.

Think of it like building a huge set of LEGOs with **only** written instructions and no pictures. Most people agree it's nearly impossible to imagine something built from words alone. This is exactly our point. You won't understand what we're trying to do with a closed mind.

To grasp what we are teaching and inspiring humanity for, you need to open your mind and ask us a lot of questions.
