In focus

[AFR/RC72/10](#) presents a draft updated regional strategy for the management of environmental determinants of health (2022-2030). The draft resolution in [AFR/RC72/WP1](#) would endorse the updated regional strategy.

Background

See [Afro topic page](#) for Protection of the Human Environment

See [Tracker links](#) to previous EB/WHA discussions of Environment and Health

See also [Prüss-Ustün et al \(2016\)](#) Preventing disease through healthy environments A global assessment of the burden of disease from environmental risks (WHO)

PHM Comment

Technically useful situation analysis. Massive investment needs. Why are the resources not being found to meet these needs?

What is the role of extractivism in accessing African resources without appropriate controls and requirements?

See [Google search on Extractivism in Africa](#).

See [SeatiniUganda comment on trade and investment](#) See Bilaterals.Org page on [current Africa negotiations](#). See [comment on AfCFTA](#).

Perhaps we can involve the Environment & Health TG in developing a response to this item.

See [Campbell 2015 Imperialism and anti-imperialism in Africa](#) MR 67(3) 98-113. [Whole issue](#)

Notes of discussion

13. Strategie regionale actualisée pour l'action sur les déterminants environnementaux de la santé humaine clans la Région africaine (2022-2032)
