How CCP Courses Count for High School Students:		CREDITS (Cs)		QUALITY POINTS (QPs)	TRANSFER (TF)
		How many total credits are these courses worth? This is set by NCDPI and the NC Community College System. Credits are allocated differently between the community college and the high school. CC Credits = Community College Credit Hours HS Credits = High School Credits		How many quality points for GPA purposes will I earn? While dependent on grades earned in the class, this will give you an idea of the added weight for each course. This is set by NCDPI and the NC Community College System. Only courses listed on the Comprehensive Articulation agreement offer added quality points.	How will these transfer? To a university? To a community college? This is set by multiple factors both at NCDPI, the NC Community College System, and individual universities. Please, always check with your intended university as nothing on this list is guaranteed EXCEPT for those courses listed on the Comprehensive Articulation Agreement. CC = Community College UNC = UNC System University
